The process of changes in favor of the Bolivian majority is at risk of being brutally restrained. The rise to power of an Indigenous president with unprecedented support in that country and his programs of popular benefits and recovery of the natural resources have had to face the conspiracies of the oligarchy and United States interference from the very beginning.

In recent days the increase in conspiracy has reached its climax. The subversive and unconstitutional actions of the oligarchic groups to try to divide the Bolivian nation reflect the racist and elitist minds of these sectors and constitute a very dangerous precedent not only for the country's integrity, but for other countries in our region.

History shows with ample eloquence, the terrible consequences that the divisionary and separatist processes supported and induced by foreign interests have had for humanity.

Faced with this situation the signers below would like to express their support for the government of Evo Morales Ayma, for his policies for change and for the sovereign constituent process of the Bolivian people. At the same time we reject the so-called Santa Cruz Autonomy Statute due to its unconstitutionality and the attempt against the unity of a nation of our America.
