*Although every war makes ample use of lies and deception, the dirty war on Syria has relied on a level of mass disinformation not seen in living memory. The British-Australian journalist Philip Knightley pointed out that war propaganda typically involves 'a depressingly predictable pattern' of demonising the enemy leader, then demonising the enemy people through atrocity stories, real or imagined (Knightley 2001). Accordingly, a mild-mannered eye doctor called Bashar al Assad became the new evil in the world and, according to consistent western media reports, the Syrian Army did nothing but kill civilians for more than four years. To this day, many imagine the Syrian conflict is a 'civil war', a 'popular revolt' or some sort of internal sectarian conflict. These myths are, in many respects, a substantial achievement for the big powers which have driven a series of 'regime change' operations in the Middle East region, all on false pretexts, over the past 15 years.*

Dr. Tim Anderson

This book is a careful academic work, but also a strong defence of the right of the Syrian people to determine their own society and political system. That position is consistent with international law and human rights principles, but may irritate western sensibilities, accustomed as we are to an assumed prerogative to intervene. At times I have to be blunt, to cut through the double-speak. In Syria the big powers have sought to hide their hand,

using proxy armies while demonising the Syrian Government and Army, accusing them of constant atrocities; then pretending to rescue the Syrian people from their own government. Far fewer western people opposed the war on Syria than opposed the invasion of Iraq, because they were deceived about its true nature.

Dirty wars are not new. Cuban national hero Jose Martí predicted to a friend that Washington would try to intervene in Cuba's independence struggle against the Spanish. 'They want to provoke a war', he wrote in 1889 'to have a pretext to intervene and, with the authority of being mediator and guarantor, to seize the country ... There is no more cowardly thing in the annals of free people; nor such cold blooded evil' (Martí 1975: 53). Nine years later, during the third independence war, an explosion in Havana Harbour destroyed the USS Maine, killing 258 US sailors and serving as a pretext for a US invasion.

The US launched dozens of interventions in Latin America over the subsequent century. A notable dirty war was led by CIA-backed, 'freedom fighter' mercenaries based in Honduras, who attacked the Sandinista Government and the people of Nicaragua in the 1980s. That conflict, in its modus operandi, was not so different to the war on Syria. In Nicaragua more than 30,000 people were killed. The International Court of Justice found the US guilty of a range of terrorist-style attacks on the little Central American country, and found that the US owed Nicaragua compensation (ICJ 1986). Washington ignored these rulings.

With the 'Arab Spring' of 2011 the big powers took advantage of a political foment by seizing the initiative to impose an 'Islamist winter', attacking the few remaining independent states of the region. Very quickly we saw the destruction of Libya, a small country with the highest standard of living in Africa. NATO bombing and a Special Forces campaign helped the al Qaeda groups on the ground. The basis for NATO's intervention was lies told about actual and impending massacres, supposedly carried out or planned by the government of President Muammar Gaddafi. These claims led rapidly to a UN Security Council resolution said to protect civilians through a 'no fly zone'. We know now that trust was betrayed, and that the NATO powers abused the limited UN authorisation to overthrow the Libyan Government (McKinney 2012).

Subsequently, no evidence emerged to prove that Gaddafi intended, carried out or threatened wholesale massacres, as was widely suggested (Forte 2012). Genevieve Garrigos of Amnesty International (France) admitted there was 'no evidence' to back her group's earlier claims that Gaddafi had used 'black mercenaries' to commit massacres (Forte 2012; Edwards 2013).

... Two days before NATO bombed Libya another armed Islamist insurrection broke out in Daraa, Syria's southernmost city. Yet because this insurrection was linked to the demonstrations of a political reform movement, its nature was disguised. Many did not see that those who were providing the guns - Qatar and Saudi Arabia - were also running fake news stories in their respective media channels, Al Jazeera and Al Arabiya. There were other reasons for the durable myths of this war. Many western audiences, liberals and leftists as well as the more conservative, seemed to like the idea of their own role as the saviours of a foreign people, speaking out strongly about a country of which they knew little, but joining what seemed to be a 'good fight' against this new 'dictator'. With a mission and their proud self-image western audiences apparently forgot the lies of previous wars, and of their own colonial legacies.

I would go so far as to say that, in the Dirty War on Syria, western culture in general abandoned its better traditions: of reason, the maintenance of ethical principle and the search for independent evidence at times of conflict; in favour of its worst traditions: the 'imperial prerogative' for intervention, backed by deep racial prejudice and poor reflection on the histories of their own cultures. That weakness was reinforced by a ferocious campaign of war propaganda. After the demonisation of Syrian leader Bashar al Assad began, a virtual information blockade was constructed against anything which might undermine the wartime storyline. Very few sensible western perspectives on Syria emerged after 2011, as critical voices were effectively blacklisted.

In that context I came to write this book. It is a defence of Syria, not primarily addressed to those who are immersed the western myths but to others who engage with them. This is therefore a resource book and a contribution to the history of the Syrian conflict. The western stories have become self-indulgent and I believe it is wasteful to indulge them too much. Best, I think, to speak of current events as they are, then address the smokescreens later. I do not ignore the western myths, in fact this book documents many of them. But I lead with the reality of the war.

Western mythology relies on the idea of imperial prerogatives, asking what must 'we' do about the problems of another people; an approach which has no basis in international law or human rights. The next steps involve a series of fabrications about the pretexts, character and events of the war. The first pretext over Syria was that the NATO states and the Gulf monarchies were supporting a secular and democratic revolution. When that seemed implausible the second story was that they were saving the oppressed majority 'Sunni Muslim' population from a sectarian 'Alawite regime'. Then, when sectarian atrocities by anti-government forces attracted greater public attention, the pretext became a claim that there was a shadow war: 'moderate rebels' were said to be actually fighting the extremist groups. Western intervention was therefore needed to bolster these 'moderate rebels' against the 'new' extremist group that had mysteriously arisen and posed a threat to

the world.

That was the 'B' story. No doubt Hollywood will make movies based on this meta-script, for years to come. However this book leads with the 'A' story. Proxy armies of Islamists, armed by US regional allies (mainly Saudi Arabia, Qatar and Turkey), infiltrate a political reform movement and snipe at police and civilians. They blame this on the government and spark an insurrection, seeking the overthrow of the Syrian government and its secular-pluralist state. This follows the openly declared ambition of the US to create a 'New Middle East', subordinating every country of the region, by reform, unilateral disarmament or direct overthrow. Syria was next in line, after Afghanistan, Iraq and Libya. In Syria, the proxy armies would come from the combined forces of the Muslim Brotherhood and Saudi Arabia's Wahhabi fanatics. Despite occasional power struggles between these groups and their sponsors, they share much the same Salafist ideology, opposing secular or nationalist regimes and seeking the establishment of a religious state.

However in Syria Washington's Islamists confronted a disciplined national army which did not disintegrate along religious lines, despite many provocations. The Syrian state also had strong allies in Russia and Iran. Syria was not to be Libya Take Two. In this prolonged war the violence, from the western side, was said to consist of the Syrian Army targeting and killing civilians. From the Syrian side people saw daily terrorist attacks on towns and cities, schools and hospitals and massacres of ordinary people by NATO's 'freedom fighters', then the counter attacks by the Army. Foreign terrorists were recruited in dozens of countries by the Saudis and Qatar, bolstering the local mercenaries.

Though the terrorist groups were often called 'opposition', 'militants' and 'Sunni groups' outside Syria, inside the country the actual political opposition abandoned the Islamists back in early 2011. Protest was driven off the streets by the violence, and most of the opposition (minus the Muslim Brotherhood and some exiles) sided with the state and the Army, if not with the ruling Ba'ath Party. The Syrian Army has been brutal with terrorists but, contrary to western propaganda, protective of civilians. The Islamists have been brutal with all, and openly so. Millions of internally displaced people have sought refuge with the Government and Army, while others fled the country.

In a hoped-for 'end game' the big powers sought overthrow of the Syrian state or, failing that, the creation of a dysfunctional state or dismembering into sectarian statelets, thus breaking the axis of independent regional states. That axis comprises Hezbollah in south Lebanon and the Palestinian resistance, alongside Syria and Iran, the only states in the region without US military bases. More recently Iraq - still traumatised from western invasion, massacres and occupation - has begun to align itself with this axis. Russia too has begun to play an important counter-weight role. Recent history and conduct demonstrate that neither Russia nor Iran harbour any imperial ambitions remotely approaching those of Washington and its allies, several of which (Britain, France and Turkey) were former colonial warlords in the region. From the point of view of the 'Axis of Resistance', defeat of the dirty war on Syria means that the region can begin closing ranks against the big powers. Syria's successful resistance would mean the beginning of the end for Washington's 'New Middle East'.

That is basically the big picture. This book sets out to document the A story and expose the B story. It does so by rescuing some of the better western traditions: the use of reason, the maintenance of ethical principle and the search for independent evidence in case of conflict. I hope it might prove a useful resource. Here is a brief overview of the chapters.

### **Chapter Overview:**

Chapter 1, **'Syria and Washington's 'New Middle East''** puts Syria in context of the US plans for a 'New Middle East', the latest chapter in a longer history of US attempts to dominate the region.

Chapter 2, **'Barrel Bombs, Partisan Sources and War Propaganda'** addresses the problem of reporting and reading the Syrian crisis. Media channels have shown a hyper-reliance on partisan sources, committed to the war and denigrating the Syrian Army. This is the key barrier to understanding the controversies around chemical weapons, civilian massacres and the levels of support for or opposition to President Assad.

Chapter 3, **'Daraa 2011: Another Islamist Insurrection'** reconstructs, from a range of sources, the Saudi-backed Islamist insurrection in Daraa in March 2011. Those armed attacks were quite distinct from the political reform rallies, which the Islamists soon drove off the streets.

Chapter 4, **'Bashar al Assad and Political Reform'** explains the political reform movement from the time Bashar assumed the presidency in the year 2000 to the beginning of the crisis in 2011. From this we can see that most opposition groups were committed to reform within a Syrian context, with virtually all opposing attacks on the Syrian state. The chapter then reviews the role of Bashar as a reformer, and the evidence on his popularity.

Chapter 5, **'The Empire's Jihadis'** looks at the collaboration between Salafist political Islam and the imperial powers in the Middle East. Distinct from the anti-imperial Islamic currents in Iran and south Lebanon, Salafist political Islam has become a sectarian force competing with Arab nationalism across Egypt, Palestine and Syria, and drawing on long standing collaborative relations with the big powers. This history provides important background to the character of Syria's Islamist 'revolution', and its various slogans.

Chapter 6, **'Embedded Media, Embedded Watchdogs'** identifies the propaganda techniques of media channels and the network of 'human rights' bodies (Human Rights Watch, Avaaz, etc) which function as megaphones and 'moderators' for the Washington agenda. Many have become fierce advocates for 'humanitarian war'. A number of newer western NGOs (e.g. The Syria Campaign, The White Helmets) have been created by Wall Street agencies specifically for the dirty war on Syria. A number of their fabrications are documented here.

Chapter 7, **'The Houla Massacre Revisited'** considers in detail the evidence from the first major massacre designed (following success of the technique over Libya) to influence UN Security Council consideration of military intervention. While the first UN inquiry group, actually in Syria, found contradictory evidence on this massacre, a second UN group outside Syria and co-chaired by a US diplomat, tried to blame the Syrian Government. Yet more than a dozen witnesses blamed Farouq FSA Islamists, who killed pro-government villagers and took over the area, holding it for some months. Several other 'false flag' massacres are noted.

Chapter 8, **'Chemical Fabrications: the East Ghouta Incident'** details the second major 'false flag' incident of international significance. This incident in August 2013, which nearly sparked a major escalation involving US missile attacks on Syria, was used to accuse the Syrian Government of killing hundreds of civilians, including children, with chemical weapons. Within a fairly short time multiple sources of independent evidence (including North American evidence) disproved these accusations. Nevertheless, Syria's opponents have repeated the false accusations, to this day, as though they were fact.

Chapter 9, **'The Responsibility to Protect (R2P) and the Double Game'** addresses a recent political doctrine, a subset of 'humanitarian intervention' popularised to add to the imperial toolkit. The application of this doctrine in Libya was disastrous for that little country. Fortunately the attempts to use it in Syria failed.

Chapter 10, **'Health and Sanctions'** documents the NATO-backed Islamist attacks on Syria's health system, linked to the impact of western economic sanctions. These twin currents have caused great damage to Syrian public health. Such attacks carry no plausible motive of seeking local popular support, so we must interpret them as part of an overall strategy to degrade the Syrian state, rendering it more vulnerable to outside intervention.

Chapter 11 **'Washington, Terrorism and the Islamic State (ISIS)'**, documents the links between the big powers and the latest peak terrorist group they claim to be fighting. Only evidence can help develop informed opinion on this contentious matter, but the evidence is overwhelming. There is little ideological difference between the various Salafi-Islamist groups, and Washington and its allies have financed and armed every one of them.

Chapter 12, **'Western Intervention and the Colonial Mind'** discusses the western cultural mindset that underlies persistent violations of the rights of other peoples.

**New eBook in PDF Format**

Chapter 13 **'Towards an Independent Middle East'**, considers the end-game in the Syrian crisis, and its implications for the Middle East region. At tremendous cost the Syrian Arab Republic, its army and its people, have successfully resisted aggression from a variety of powerful enemies. Syria's survival is due to its resilience and internal unity, bolstered by support from some strong allies. The introduction of Russian air power in late September 2015 was important. So too were the coordinated ground forces from Iran, Iraq and Lebanon, in support of an independent Syria.

When the attacks on Syria abate the Middle East seems set to be transformed, with greater political will and military preparedness on the part of an expanded Axis of Resistance. That will signal the beginning of the end for Washington's 15 year spree of bloodshed and 'regime change' across the entire region.

Professor Anderson demonstrates unequivocally through carefully documented research that America's "Moderate Opposition" are bona fide Al Qaeda affiliated terrorists created and protected by the US and its allies, recruited and trained by Saudi Arabia, Turkey, in liaison with Washington and Brussels.

Through careful analysis, professor Anderson reveals the "unspoken truth": the "war on terrorism" is fake, the United States is a "State sponsor of terrorism" involved in a criminal undertaking. **Michel Chossudovsky**, Director of the Centre for Research on Globalization, Professor of Economics (Emeritus), University of Ottawa.
