There is now [statistical evidence that the higher the rate of mRNA-inoculations](#) in a country, the higher is the incidence of actual Covid cases. [The source of this statistical evidence must be addressed. How is the incidence of higher covid cases measured? The rRT-PCR test is TOTALLY invalid. Does this mean that more people are getting sick (and it is diagnosed as Covid-19.)]

According to Zero Hedge:

The inventor of the mRNA “experimental gene-therapy”, Dr. Robert Malone, is worried. And rightly so. He actually said from the beginning that mRNA-type inoculations were not meant as vaccines, they were experimental cancer therapies.

Here’s what has Malone worried:

[click for details and data](#)

Here’s what has Malone worried:

According to lab exams conducted by a Spanish group of scientists, yet to fully ascertained, the Pfizer vaccine vial contains *graphene oxide*.

Graphene Oxide is a toxin and only used in cancer patients in severe cases and for specific localized treatments.

See this [revealing interview](#) with **Ricardo Delgado**, of the Spanish Research Team, “The Fifth Column”, and **Prof. Michel Chossudovsky**

The results of the Spanish study suggest, yet to be fully confirmed, that the recorded

vaccine related deaths and “adverse events” (e.g. published in the US by the CDC and in the EU) are attributable to the presence of graphene oxide nano-particles contained in the Covid vaccine vial.

Of significance, (acknowledged by national health authorities) graphene oxide is also contained in [the face mask](#).

Graphene has electromagnetic properties which have been detected in people who have been vaccinated. These effects have been amply documented and confirmed. See the study conducted by the [European Forum for Vaccine Vigilance](#)

The positive take on this news is that gradually but surely the truth is emerging.

***Peter Koenig** is a geopolitical analyst and a former Senior Economist at the World Bank and the World Health Organization (WHO), where he has worked for over 30 years on water and environment around the world. He lectures at universities in the US, Europe and South America. He writes regularly for online journals and is the author of [Implosion – An Economic Thriller about War, Environmental Destruction and Corporate Greed](#); and co-author of Cynthia McKinney’s book “When China Sneezes: From the Coronavirus Lockdown to the Global Politico-Economic Crisis” (Clarity Press – November 1, 2020)*
