

“The Non-Profit Industrial Complex”, and the Co-opting of the NGO Environmental Movement

Global Research News Hour Episode 139: A Conversation with Cory Morningstar

“Why do people continue to believe that NGOs such as 350.org/1Sky that are initiated and funded by Rockefeller Foundation, Clinton Foundation, Ford, Gates, etc. would exist to serve the people rather than the entities that create and fund them? Since when do these powerful entities invest in ventures that will negatively impact their ability to maintain power, privilege and wealth? Indeed, the oligarchs play the “environmental movement” and its mostly well-meaning citizens like a game of cards.” -Cory Morningstar, [Keystone XL: The Art of NGO Discourse](#)

“If activists fail to address the crucial issue of liberal philanthropy now this will no doubt have dire consequences for the future of progressive activism – and democracy more generally – and it is important to recognize that liberal foundations are not all powerful and that the future, as always, lies in our hands and not theirs.” — Michael Barker [Do Capitalists Fund Revolutions?](#)

April 22nd, when this episode first went to air, was Earth Day, an occasion when ecologically conscious community members around the globe attempt to channel their energies toward protection of our natural world. [1]

Human generated climate change, of course, is very much top of mind at this time in human history. Indeed, the twenty-first century climate movement has been compared to the anti-war, civil rights, gay rights, and women’s liberation movement in terms of its dynamism and its presentation as a political force to be reckoned with. [2]

Spearheading this movement have been the big environmental Non-Governmental Organizations, including Greenpeace, The Sierra Club and most notably the group 350.org. Tactics employed by these NGOs have involved the mobilization of people in New York City

and around the world for the Peoples Climate March in September of 2014, direct actions frustrating attempts to build TransCanada's Keystone XL pipeline, petitions, divestment campaigns and a 40,000 person protest outside the White House in February of 2013. [3][4][5][6]

It is widely believed that the movement is enjoying success in terms of fundamentally shifting the priorities of political leaders like US President Barack Obama. We are presented then with a classic 'David vs. Goliath' narrative where grassroots activists are pushing the Powers That Be into compliance with the demands of the world's peoples for a secure future for our children and grandchildren.

But to borrow a term from Al Gore, there is at least one "inconvenient truth" complicating this heroic story-line. Elite funders like the Rockefeller Foundation, Bill Gates, and the Clintons finance and foster these NGOs; or so argues Cory Morningstar.

Cory Morningstar has written extensively on the role of these NGOs in playing into the hands of their Wall Street benefactors.

Morningstar attended the COP15 UN Climate Conference and was on hand to video-record the following press conference by Lamimba Di-Aping, the chief negotiator for the G77 bloc of developing countries. In this conference, Di-Aping blasts the international NGO community for not embracing the ambitious (science-based) reduction targets favoured by the G77 and the Alliance of Small Island States, in favour of the compromise targets restricting global temperature rise above pre-industrial levels to (as much as) 2 degrees Celsius. This goal would mean, in Di-Aping's words, "certain death for Africa" and "certain devastation of small island states."

"...and I will say this to our colleagues from Western civil society — you have definitely sided with a small group of industrialists and their representatives and your representative branches. Nothing more than that. You have become an instrument of your governments." -Lamumba Di-Aping

Cory Morningstar is an independent investigative journalist, writer and environmental activist, focusing on global ecological collapse and political analysis of what she calls the non-profit industrial complex. She resides in Canada. Her writings can be found on [Wrong Kind of Green](#), [The Art of Annihilation](#), [Political Context](#), [Canadians for Action on Climate Change](#) and [Countercurrents](#). She is also a frequent guest on the [Nature Bats Last](#) podcast on the [Progressive Radio Network](#).

On the Earth Day edition of the Global Research News Hour, Morningstar talks about fossil fuel divestment as a flawed climate strategy, the failure of climate activists to address imperialism, a critical [UN Advisory Group report](#) which environmental groups conspired to keep buried from public view, and other inconvenient truths plaguing the non-profit industrial complex.

This episode also includes a brief clip from a 2016 Winnipeg talk by celebrated author, journalist, and 350.org Board member Naomi Klein.
