

No Family Gatherings: The Omicron Fraud Used to Justify the “Christmas and New Year Covid Lockdown”

The unspoken objective is to isolate human beings. Prevent people from socializing and meeting up with their loved ones. It’s a despicable agenda on the part of our governments.

Update

In recent developments, several Western governments have implemented curfews and restrictions which prevent family and friends from celebrating New Year.

Nonsensical political statements abound. They invariably point to the “deadly Covid-19 Omicron Variant”, despite the fact that Omicron is one among thousands of harmless variants of the SARS-CoV-2 virus. (See analysis below).

Media disinformation prevails. According to CNN quoting expert opinion:

The Omicron variant “is extraordinarily contagious”, and if you are in a crowd now, and certainly if you’re unvaccinated, you are at great risk of contracting this virus,”

A small celebration at a friend’s house should be OK if everyone is vaccinated and boosted and tested negative before the party, he said. Big outdoor parties are less risky unless they’re crowded.

“I would not eat in a restaurant now without a mask,”

“I would absolutely not go into a bar.” emphasis added.

Government statements and media reports are intent upon creating divisions between “vaccinated” and “non-vaccinated”. According to Dr. Anthony

Fauci who is behind the Omicron scam:

People should avoid large New Year's Eve gatherings where they don't know the vaccination status of guests ... Small gatherings of vaccinated family or close friends are safe"

In chorus, Western governments (pressured by the financial establishment) repeatedly tell us that these restrictions are there "to save lives" and protect people from being infected by the deadly Omicron variant.

In turn, they pressure millions of people to get the vaccine booster. And we now know, beyond doubt, amply documented, that the mRNA jab is a "Killer Vaccine" which has resulted in countless deaths and injuries Worldwide.

While the official data on mortality and morbidity are available, the media will portray the "vaccine" as the solution to resolving the alleged pandemic.

The fear campaign prevails. Governments also point to a "dangerous" increase in "Confirmed Covid-19 Cases" during the Christmas holiday period resulting from the flawed and invalid RT-PCR test without acknowledging the fact that an increase in RT-PCR positive cases at this time of the year indicates a greater incidence of seasonal influenza and corona "common colds".

Quebec Premier Legault's Press Conference. He announces Curfew on December 30th to be implemented on the following day.

In Quebec, Premier François Legault ordered at short notice from one day to the next a nightly curfew starting on the 31st of December 2021 (from 10 p.m. to 5 a.m).

The justification of this far-reaching decision which jeopardizes New Year celebrations of 8.5 million people, is "to curb the spread of the Omicron variant as COVID-19 cases surge". What utter nonsense!

The social, cultural and economic impacts of these measures are far-reaching. People are prevented from socializing which is a fundamental human right. The entire urban landscape is affected. New Year curfews and restrictions have also contributed to a further wave of bankruptcies of bars and restaurants. And it is all based on a Big Lie.

Meanwhile in the US, the RT-PCR is to be withdrawn by the CDC effective December 31st 2021. The CDC acknowledges that the PCR test does not effectively differentiate between Covid-19 and Seasonal Influenza.

Amply documented and analyzed by numerous scientists, the RT-PCR test does not detect

or identify SARS-CoV-2 and its variants. See:

[Bombshell: CDC No Longer Recognizes the PCR Test As a Valid Method for Detecting “Confirmed Covid-19 Cases”?](#)

By [Prof Michel Chossudovsky](#),

May solidarity and human dignity prevail.

Our thoughts and best wishes for the New Year

Michel Chossudovsky, Global Research, December 31, 2021

Scroll down: analysis of the Omicron variant

The alleged spread of the “deadly” Omicron variant has now become the pretext and justification for implementing partial lockdowns, restrictions on travel as well as confinement and stay at home mandates.

Anthony Fauci is leading the disinformation campaign, intimating that [Omicron “is already in the United States but has yet to be detected”](#).

These measures are political in nature. They have no scientific basis. They sustain the fear campaign prior to the Christmas holiday period. They trigger a new wave of economic and social chaos. They are sustained by a 24/7 [media disinformation campaign](#)

A Friday November 26 statement by the WHO’s [Technical Advisory Group \(TAG-VE\)](#) (integrated by selected Bill Gates appointees) stated the following:

This variant [omicron] has a large number of mutations, some of which are concerning. Preliminary evidence suggests an increased risk of reinfection with this variant, as compared to other VOCs. The number of cases of this variant appears to be increasing in almost all provinces in South Africa.

This advisory had been “staged”. Moreover, the TAG-VE statement was an advisory. It was not an official WHO statement.

Two days later on Sunday November 28, the WHO issued an “Official Update” which refuted the TAG-VE advisory. In fact it said exactly the opposite:

Preliminary data suggests that there are increasing rates of hospitalization in South Africa, but this may be due to increasing overall numbers of people becoming infected,

rather than a result of specific infection with Omicron.

There is currently no information to suggest that symptoms associated with Omicron are different from those from other variants. (emphasis added)

While the WHO's Update on Omicron passed virtually unnoticed, it contradicted both the [TAG-VE](#) November 26 advisory as well as the numerous "Warnings" expressed by the (corrupt) WHO Director General Dr. Tedros Adhanom.

[Update: See also the [WHO's Technical Brief dated December 17, 2021](#)]

The damage had already been done.

On "Black Friday", November 26, 2021, the TAG-VE advisory statement as well as media reports contributed to spearheading the collapse of stock markets coupled with a dramatic rise in the value of Big Pharma vaccine stocks, with Pfizer in the lead:

[Pfizer Inc.](#) jumped to a record Friday [November 26, 2021] on the promise of its Covid-19 vaccine and antiviral pill even as fears of a new variant tamped down much of the rest of the U.S. stock market.

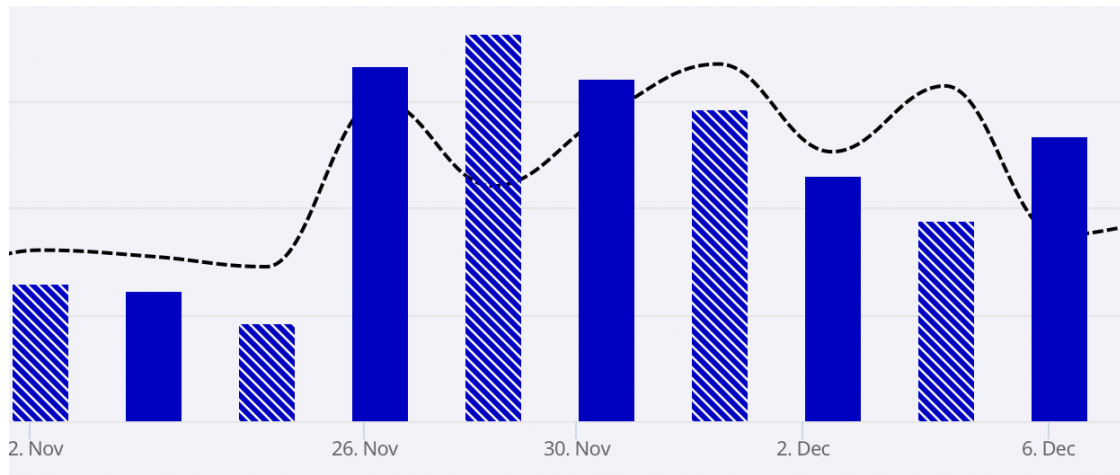

The drug maker added \$17.5 billion to its market value as the shares closed 6.1% higher in New York trading. Pfizer's vaccine with BioNTech SE is on track to be the [best-selling](#) drug product on a yearly basis and received backing from a European regulatory panel on Thursday [to expand its use](#) into children as young as five. BioNTech shares surged 14% to the highest in two months. ([Bloomberg](#))

Bloomberg

Pfizer's Pill, Shot Push Stock to Record as Variant Emerges

- Its vaccine is best-selling drug product on a yearly basis
- Drug maker is awaiting authorization in U.S. for Covid pill

\

[NYSE Pfizer Shares. for full diagram click here](#)

Big Bucks for Pfizer based on a combination of “inside information”, “foreknowledge’ and “fake science” coupled with media disinformation regarding the “deadly” Omicron Variant.

What is at stake is a \$17.5 Billion Financial Gain on “Black Friday” (following Thanksgiving), which we might describe as “A Good Friday” Windfall for Pfizer Thanks to Omicron. “No conflict of interest”!

Christmas Lockdown. Or Should We Call it “Covid Xmas Chaos”

The great Covid exodus 2.0: Londoners flee the capital amid fears they will be plunged into Christmas lockdown AGAIN after spike in Omicron cases

[Source Daily Mail, December 16, 2021](#)

- Boris faces growing pressure from his own advisers to hit the panic button on Plan C to curb new variant
- Londoners are leaving the capital fearing the PM could change his mind on a lockdown or more restrictions
- Irate residents put up signs telling visitors to ‘f**k off’ while man at Devon resort dressed as Grim Reaper
- Chief medical officer Chris Whitty told people to pick the events they attend this Christmas ‘carefully’
- Are you leaving the capital - or unhappy about Londoners visiting? ([Daily Mail](#), December 16, 2021)

It's an exercise in social engineering.

The omicron variant is said to be spreading in numerous countries in all regions of the World. What's the evidence?

Restrictions on air travel, no large Christmas reunions, stay at home mandates, partial closure of bars and restaurants (leading to more bankruptcies), sports and culture events. It is all for good cause: saving lives.

Image Pakistan Daily Times, December 2020: Trainee Santas in UK

It is worth noting that what is now unfolding is a staged repeat of last year's restrictions pertaining to Christmas and New Year reunions.

The unspoken objective is to isolate human beings.

Prevent people from socializing and meeting up with their loved ones. It's a despicable agenda on the part of our governments.

It's the same concepts and directives as last year. Two years in succession. Lies and nonsense committed by corrupt officials.

Get vaccinated. Go for your third vaccine boost:

"The rapidly spreading Omicron coronavirus variant means Canadians should be "ready to pivot" their travel plans within the country during this holiday season, said medical experts studying COVID-19.

"If [you] can avoid travel, avoid it," said Dr. Peter Juni, the head of Ontario's COVID-19 Science Advisory Table. "We just need to really seriously cut down on our contact."

The PCR Test Used to Detect Omicron Variant

What's the Evidence? Media reports confirm that the standard PCR test is being used to "detect" the omicron variant.

That's an impossibility! The PCR test cannot under any circumstances identify or detect the original virus (SARS-CoV-2) nor can it detect its numerous variants. What it identifies are genetic sequences. This is corroborated both by the WHO as well by numerous scientific studies.

According to Dr. Kary Mullis, inventor of the PCR technique: "The PCR detects a very small segment of the nucleic acid which is part of a virus itself." According to renowned Swiss

immunologist [Dr B. Stadler](#)

So if we do a PCR corona test on an immune person, it is not a virus that is detected, but a small shattered part of the viral genome. The test comes back positive for as long as there are tiny shattered parts of the virus left.

These omicron PCR tests have no scientific basis. They are nonetheless used by corrupt politicians to justify the Christmas lockdown, which in several countries consists in preventing families and friends from getting together during the holiday period.

The instructions are twofold:

1. Test, test, test, which makes the number of so-called “Covid-19 confirmed cases” allegedly “detected” by the PCR go fly high.

As outlined above, The PCR test does not confirm or detect the variant. A positive PCR could indicate a corona B common cold or an A, B influenza. In January 2021, [the WHO formally acknowledged the flaws of the PCR test.](#)

2. Get protected: Go for your third vaccine jab, ie. your booster:

“Vaccines have given us substantial protection from infection and severe outcomes to date, ... said Dr. Theresa Tam, chief public health officer of Canada ...

While it’s possible that the new Omicron variant might evade some vaccines, she believes they should still provide good protection.

“We’re safer when everyone who is eligible is fully vaccinated and if all who are eligible also get a COVID-19 booster dose,” she said.” ([Global News Canada](#))

Utter **nonsense** on the part of Canada’s chief public health officer.

It’s not Omicron which is “Deadly”. It’s Pfizer’s mRNA “killer vaccine”.

This is now corroborated by the release under Freedom of Information (FOI) of [Pfizer’s “Confidential” Internal Report](#) on deaths and adverse events.
