

Thyroid Problems Post-COVID-19 mRNA Vaccination – New Japan Study Shows Increased Thyroid Auto-antibodies After Two Doses & Booster

Thyroid dysfunction after mRNA vaccination is a common complaint

There has been a flood of anecdotal reports on social media of thyroid dysfunction and new thyroid diseases following COVID-19 mRNA vaccination, for both Pfizer and Moderna.

A new Japanese study by Morita et al., of 70 healthcare workers showed increased thyroid auto-antibodies following 2 Pfizer jabs as well as booster shot ([click here](#)).

These effects were long-lasting (> 32 weeks). The increase of thyroid auto-antibodies (TRAb) after 2 jabs and after booster jab can be seen in the graph below:

The authors conclude:

“SARS-CoV-2 BNT162b2 (Pfizer) vaccine not only disrupted the steady state of Graves’ Disease, but also newly induced the disruption of thyroid autoimmunity. These findings support previous cases and series that showed the relapse or even new onset of Graves’ Disease potentially associated with the SARS-CoV-2 BNT162b2 mRNA vaccine.”

Types of thyroid dysfunction post mRNA vaccination:

COVID-19 mRNA vaccines can significantly worsen thyroid function (increase or decrease it). These effects are usually permanent, resulting in a need for medication for life. Symptoms usually appear in **10-15 days** following mRNA vaccination.

Subacute thyroiditis – thyroid inflammation, mostly in women ([click here](#)). Seems to be the most common thyroid disease reported after mRNA vaccination, with symptoms developing on average 10 days after 1st or 2nd dose. Treated with NSAIDs or steroids ([click here](#)).

Graves Disease is the most commonly reported autoimmune thyroid disease post mRNA vaccination which can cause new onset Graves’ disease or a relapse of Graves’ Disease hyperthyroidism ([click here](#)), also about 10 to 15 days after 1st or 2nd jab.

Jamie Chennells @bombszelberger · Sep 17, 2022

Replying to @Johnbloodrage and @drsimonegold

I ended up in hospital after my first Pfizer jab (10 days later after starting to feel ill 3 days afterwards), never had thyroid issues before and my thyroid had gone mental. Still suffering now and I now also have graves disease.

Hashimoto's Disease (decreased function) is also starting to show up ([click here](#))

Natalie Jarrett 🌱🙌 @Nat350 · Nov 16, 2022

The number of women who message me stating they have JUST been diagnosed with Thyroid issues after their jab is unnerving. Even my endocrinologist said she has been shocked to see the number of women with Hashimoto's this past year. #realnotrare #VaccineSideEffects #pfizer

Susan Burns Cone @BurnsCone · Dec 23, 2022

Replying to @DrAseemMalhotra

Since my 3rd dose of Covid Pfizer vaccine I have developed Hashimoto thyroid disease and chronic rhinitis neither of which I had before

Replying to @jo_and_bailey and @MegJC28

2 months before Pfizer I had a full Thyroid panel plus Autoimmune disease panel done for my physical. ALL Normal. Get 2 jabs of Pfizer..now have Hashimoto's Disease, Costochondritis, and Lupus. In bed right now because I can barely move due to dizziness and nausea. I'm only 39.

Thyroid storm - a severe case of thyroid inflammation requiring hospitalization has been reported in the literature ([click here](#)).

Amber @ambermarie1001 · May 27, 2022

Replying to @drsimonegold

3 weeks after 2nd Pfizer dose I was in the hospital in a thyroid storm. Most likely have to take meds forever and I had no health issues prior at 41 y/o.

Thyroid cancer - these are most concerning stories of all. People develop strange lumps in the neck following mRNA vaccination and sometimes these turn out to be malignant.

VICI Therapeutic Interventions @LorraineFrankly · Nov 6, 2021

Replying to [@InformedNurse](#)

My 44 year old brother found a lump in his neck 2 weeks after 2nd Pfizer jab...long story short, medullary thyroid cancer. No family history. I'll leave the details out. Surgeon said he "got it all". Follow up with oncologist next month.

Mortsgirl 🇨🇦 @Mortsgirl93 · Apr 5, 2022

Replying to [@Storiesofinjury](#)

Friends 19 yr old son, 2 Pfizer shots during summer for College. A lump quickly appeared on neck- surgery to remove in Nov. Pathology came back- cancer-- has now had thyroid removed in 2nd surgery and on meds rest of his life. More tests to come to ensure all cancer was removed

My Take...

This is yet more evidence of immune system damage and dysfunction following COVID-19 mRNA vaccination.

This new Japanese study of 70 healthcare workers shows an increase of thyroid auto-antibodies after every Pfizer mRNA dose. The authors suggest it may be due to “**molecular mimicry** of the SARS-CoV-2 mRNA vaccines encoding proteins that may cross-react with thyroid antigens”, which results in auto-antibodies being produced against your thyroid gland.

Thyroid problems following mRNA vaccination seem to be increasing in frequency and anyone experiencing unusual symptoms in the first few weeks after mRNA vaccination, should have their thyroid function checked by their doctor.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
