

# In the Wake of the COVID-19 Pandemic: Towards A New World Order? The Global Debt Crisis and the Privatization of the State

Has the Pandemic Been Used to Precipitate the World into a Spiral of Mass Unemployment, Bankruptcy and Despair?

By [Prof Michel Chossudovsky](#)

*There is a serious health crisis which must be duly resolved. And this is a number one priority.*

*But there is another important dimension which has to be addressed.*

*Millions of people have lost their jobs, and their lifelong savings. In developing countries, poverty and despair prevail.*

*While the lockdown is presented to public opinion as the sole means to resolving a global public health crisis, its devastating economic and social impacts are casually ignored.*

*The unspoken truth is that the novel coronavirus provides a pretext to powerful financial interests and corrupt politicians to precipitate the entire World into a spiral of mass unemployment, bankruptcy and extreme poverty.*

*This is the true picture of what is happening. Poverty is Worldwide. While famines are erupting in Third World countries, closer to home, in the richest country on earth,*

*“millions of desperate Americans wait in long crowded lines for handouts”*

*“Miles-long lines formed at food banks and unemployment offices across the US over the past week”*

Long lines continued to form outside food banks and unemployment offices in dozens of cities over the weekend as the coronavirus pandemic takes a heavy toll on families, leaving many unsure of when their next paycheck will come. Pictured: Hundreds of people wait to receive meals at the Bowery Mission in New York City on Monday

In India:

[“food is disappearing, .... in shanty towns, too scared to go out](#), walking home or trapped in the street crackdowns,

In India there have been 106 coronavirus deaths as of today, to put things in perspective 3,000 Indian children starve to death each day”

*From Mumbai to New York City. It's the “Globalization of Poverty”.*

*Production is at a standstill.*

*Starvation in Asia and Africa. Famine in the U.S.*

*All countries are now Third World countries. It's the “Thirdworldisation” of the so-called high income “developed countries”.*

## **Hunger grows in Mumbai: Working poor now queuing up for free food**

Three weeks into the national lockdown, organisations and individuals providing free meals in Mumbai are unanimous: hunger in the financial capital has grown sharply and continues to grow.

And what is happening in Italy?

People are running out of food. Reports confirm that the Mafia rather than the government “is gaining local support by distributing free food to poor families in quarantine who have run out of cash”. (The Guardian)

This crisis combines fear and panic concerning the COVID-19 together with a sophisticated process of economic manipulation.

Let us first examine the impacts pertaining to the developing countries.

Developing Countries. The IMF’s “Economic Medicine” and the Globalization of Poverty

Is the coronavirus crisis part of a broader macro-economic agenda?

First some historical background.

I spent more than ten years undertaking field research on the impacts of IMF-World Bank economic reforms in Africa, Asia, Latin America, Eastern Europe and the Balkans.

Since the early 1980s, “strong economic medicine” was imposed on indebted developing countries under what was called the “structural adjustment program” (SAP).

From 1992 to 1995, I undertook field research in India, Bangladesh and Vietnam and returned to Latin America to complete my study on Brazil. In all the countries I visited, including Kenya, Nigeria, Egypt, Morocco and The Philippines, I observed the same pattern of economic manipulation and political interference by the Washington-based institutions. In India, directly resulting from the IMF reforms, millions of people had been driven into starvation. In Vietnam - which constitutes among the world’s most prosperous rice producing economies - local-level famines had erupted resulting directly from the lifting of price controls and the deregulation of the grain market. (Preface to the Second Edition of the Globalization of Poverty, 2003)

The hegemony of the dollar was imposed. With mounting dollar denominated debt, eventually in most developing countries the entire national monetary system was “dollarized”.

Massive austerity measures were conducive to the collapse in real wages. Sweeping privatization programs were imposed. These deadly economic reforms -applied on behalf the creditors- invariably triggered economic collapse, poverty and mass unemployment.

In Nigeria starting in the 1980s, the entire public health system had been dismantled. Public hospitals were driven into bankruptcy. The medical doctors with whom I spoke described the infamous structural adjustment program (SAP) with a touch of humor:

“we’ve been sapped by the SAP”, they said, our hospitals have literally been destroyed courtesy of the IMF-World Bank.

From Structural Adjustment to Global Adjustment

Today, the mechanism for triggering poverty and economic collapse is fundamentally different and increasingly sophisticated.

The ongoing 2020 Economic Crisis is tied into the logic of the COVID-19 pandemic: No need for the IMF-World Bank to negotiate a structural adjustment loan with national governments.

What has occurred under the COVID-19 crisis is a “Global Adjustment” in the structure of the World economy. In one fell swoop this Global Adjustment (GA) triggers a Worldwide process of bankruptcy, unemployment, poverty and total despair.

How is it implemented? The lockdown is presented to national governments as the sole solution to resolve the COVID-19 pandemic. It becomes a political consensus, irrespective of the devastating economic and social consequences.

No need to reflect or analyze the likely impacts. Corrupt national governments are pressured to comply.

The partial or complete closing down of a national economy is triggered through the enforcement of so-called “WHO guidelines” pertaining to the lockdown, as well as to trade, immigration and transportation restrictions, etc.

Powerful financial institutions and lobby groups including Wall Street, Big Pharma, the World Economic Forum (WEF) and the Bill and Melinda Gates Foundation were involved in [shaping the actions of the WHO pertaining to the COVID-19 pandemic](#).

The lockdown together with the curtailment of trade and air travel had set the stage. This closing down of national economies was undertaken Worldwide starting in the month of March, affecting simultaneously a [large of number of countries](#) in all major regions of the World. It is unprecedented in World history.

Why did leaders in high office let it happen? The consequences were obvious.

This closing down operation affects production and supply lines of goods and services, investment activities, exports and imports, wholesale and retail trade, consumer spending, the closing down of schools, colleges and universities, research institutions, etc.

In turn it leads almost immediately to mass unemployment, bankruptcies of small and

medium sized enterprises, a collapse in purchasing power, widespread poverty and famine.

What is the underlying objective of this restructuring of the global economy? What are the consequences? *Cui Bono?*

- A massive concentration of wealth and corporate capital,,
- the destabilization of small and middle sized enterprises in all major areas of economic activity including the services economy, agriculture and manufacturing.
- facilitates the subsequent corporate acquisition of bankrupt enterprises
- It derogates the rights of workers. It destabilizes labor markets.
- It creates mass unemployment
- It compresses wages (and labor costs) in the so-called high income “developed countries” as well as in the impoverished developing countries.
- It leads to an escalation of the external debt
- It facilitates subsequent privatization

Needless to say this Global Adjustment (GA) operation is far more detrimental than the country-level IMF-WB structural adjustment program (SAP).

It is neoliberalism to the nth degree.

In one fell swoop (in the course of the last months) the COVID-19 crisis has contributed to impoverishing a large sector of the World population.

And Guess who comes to the rescue? The IMF and the World Bank:

The IMF Managing Director Kristalina Georgieva has casually acknowledged that the World economy has come to a standstill, without addressing the causes of economic collapse.

“The WHO is there to protect the Health of the People, The IMF is there to protect the health of the World economy” says Georgieva.

How does she intend to “protect the World economy”?

At the expense of the national economy?

What’s her “magic solution”?

“We rely on \$1 trillion in overall lending capacity.” (IMF M-D Georgieva, [Press Conference in early March](#))

At first sight this appears to be “generous”, a lot money. But ultimately it’s what we might call “fictitious money”, what it means is:

“We will lend you the money and with the money we lend you, you will pay us back”.(paraphrase).

## Joint Press Conference on Covid-19 by IMF Managing Director and World Bank Group President Washington, D.C.

March 4, 2020

The ultimate objective is to make the external (dollar denominated) debt go fly high.

The IMF is explicit. In one of its lending windows, the Catastrophe Containment and Relief Trust, which applies to pandemics, generously,

“provides grants for debt relief to our poorest and most vulnerable members.”

Nonsensical statement: it is there to replenish the coffers of the creditors, the money is allocated to debt servicing.

“For low-income countries and for emerging middle-income countries we have ... up to \$50 billion that does not require a full-fledged IMF program.”

No conditions on how you spend the money. But this money increases the debt stock and requires reimbursement.

The countries are already in a straight-jacket. And the objective is that they comply with the demands of the creditors.

That’s the neoliberal solution applied at a global level: No real economic recovery, more

poverty and unemployment Worldwide. The “solution” becomes the “cause”. It initiates a new process of indebtedness. It contributes to an escalation of the debt.

The more you lend, the more you squeeze the developing countries into political compliance. And ultimately that is the objective of the failing American Empire.

The unspoken truth is that this one trillion dollars ++ of the Bretton Woods institutions is intended to drive up the external debt.

In recent developments, [the G20 Finance ministers decided to “put on hold”](#), the repayment of debt servicing obligations of the World’s poorest countries.

The cancellation of debt has not been envisaged. Quite the opposite. The strategy consists in building up the debt.

It is important that the governments of developing countries take a firm stance against the IMF-World Bank “rescue operation”.

### The Global Debt Crisis in the Developed Countries

An unprecedented fiscal crisis is unfolding at all levels of government. With high levels of unemployment, incoming tax revenues in developed countries are almost at a standstill. In the course of the last 2 months, national governments have become increasingly indebted.

In turn, Western governments as well as political parties are increasingly under the control of the creditors, who ultimately call the shots.

All levels of governments have been precipitated into a debt stranglehold. The debt cannot be repaid. In [the US, the federal deficit “has increased by 26% to \\$984 billion for fiscal 2019, highest in 7 years”](#). And that is just the beginning.

In Western countries, a colossal expansion of the public debt has occurred. It is being used to finance the “bailouts”, the “handouts” to corporations as well as “the social safety nets” to the unemployed.

The logic of the bailouts is in some regards similar to that of the 2008 economic crisis, but on a much larger scale. Ironically, in 2008, US banks were both the creditors of the US federal government as well as the lucky recipients: the rescue operation was funded by the banks with a view to “bailing out the banks”. Sounds contradictory?

### The Privatization of the State

This crisis will eventually precipitate the privatization of the state. Increasingly, national governments will be under the stranglehold of Big Money.

Crippled by mounting debts, what is at stake is the eventual de facto privatization of the entire state structure, in different countries, at all levels of government, under the surveillance of powerful financial interests. The fiction of “sovereign governments” serving the interests of the electors will nonetheless be maintained.

The first level of government up for privatization will be the municipalities (many of which are already partially or fully privatized, e.g. Detroit in 2013). America’s billionaires will be

enticed to buy up an entire city.

Several major cities are already on the verge of bankruptcy. (This is nothing new).

Is the city of Vancouver up for privatization?: “the mayor of Vancouver has already indicated that he feared the bankruptcy of his city.” ([Le Devoir](#), April 15, 2020)

In America’s largest cities, people are simply unable to pay their taxes: [The debt of New York City for fiscal 2019 is a staggering \\$91.56 billion](#) (FY 2019) an increase of 132% since FY 2000. In turn personal debts across America have skyrocketed.

“U.S. households collectively carry about \$1 trillion in credit card debt”. No measures are being taken in the US to reduce the interest rates on credit card debt.

The New World Order?

The lockdown impoverishes both the developed and developing countries and literally destroys national economies.

It destabilizes the entire economic landscape. It undermines social institutions including schools and universities. It spearheads small and medium sized enterprises into bankruptcy.

What kind of World awaits us?

**"Control oil  
and you control  
nations;  
control food  
and you control  
the people."**

– Henry Kissinger A diabolical “New World Order” in the making as suggested by Henry Kissinger? ([WSJ Opinion, April 3, 2020](#)):

“The Coronavirus Pandemic Will Forever Alter the World Order”

Recall Kissinger’s historic 1974 statement: “Depopulation should be the highest priority of US foreign policy towards the Third World.” (1974 National Security Council Memorandum)

The political implications are far-reaching.

What kind of government will we have in the wake of the crisis?

Concluding Remarks

There is a lot of misunderstanding regarding the nature of this crisis.

Several progressive intellectuals are now saying that this crisis constitutes a defeat of neoliberalism. “It opens up a new beginning”.

Some people see it as a “potential turning point”, which opens up an opportunity to “build socialism” or “restore social democracy” in the wake of the lockdown.

The evidence amply confirms that neoliberalism has not been defeated. Quite the opposite.

Global capitalism has consolidated its clutch. Fear and panic prevail. The State is being privatized. The tendency is towards authoritarian forms of government.

These are the issues which we must address.

That historical opportunity to confront the power structures of global capitalism, -including the US-NATO military apparatus- remains to be firmly established in wake of the lockdown.

[The Globalization of Poverty and the New World Order](#)

In this expanded edition of Prof. Michel Chossudovsky's international best-seller, the author outlines the contours of a New World Order which feeds on human poverty and the destruction of the environment, generates social apartheid, encourages racism and ethnic strife and undermines the rights of women. The result as his detailed examples from all parts of the world show so convincingly, is a globalization of poverty.

This book is a skillful combination of lucid explanation and cogently argued critique of the fundamental directions in which our world is moving financially and economically.

In this updated and enlarged edition - which includes ten additional chapters and a new introduction - the author reviews the causes and consequences of famine in Sub-Saharan Africa, the dramatic meltdown of financial markets, the demise of State social programs and the devastation resulting from corporate downsizing and trade liberalization.

"This concise, provocative book reveals the negative effects of imposed economic structural reform, privatization, deregulation and competition. It deserves to be read carefully and widely."

- Choice, American Library Association (ALA)

*"The current system, Chossudovsky argues, is one of capital creation through destruction.*

*The author confronts head on the links between civil violence, social and environmental stress, with the modalities of market expansion."*

- Michele Stoddard, *Covert Action Quarterly*
