[Dec. 14, 2023](#) - Collierville, TN - Haley Freeman is a young mother and a dedicated Pediatric Nurse and Pediatric Nurse Practitioner. Her husband Billy Freeman is a Firefighter and Paramedic. Both were mandated COVID-19 mRNA Vaccination to keep their jobs. Haley is 4 months pregnant with her second child and developed a large mass in her neck and chest - she was diagnosed with Stage 2 Non-Hodgkin's Lymphoma. Most certainly Turbo Cancer.

Tragically, many young women were forced to take COVID-19 mRNA Vaccines which cause Turbo Cancer and Lymphoma is the most common.

[Dec. 1, 2023](#) - Lucy Richmond was 12 weeks pregnant when she was diagnosed with AML Leukemia. She had a medical termination of pregnancy at 13 weeks.

blood tests and a bone marrow biopsy. Eventually, on June 1st, Lucy was transferred to Leicester Royal Infirmary. Before her transfer, she managed to attend her 12-week scan and catch a glimpse of her baby. Despite feeling fine and healthy, Lucy was confused and in disbelief, constantly thinking that the doctors must have made a mistake, as she did not feel unwell. Unfortunately, June 1st was meant to be the day when Lucy and Josh announced their pregnancy. Instead, it was the day Lucy learned that she has Acute Myeloid Leukaemia (AML). After numerous discussions with consultants and obstetricians, concerns and risks arose regarding continuing the pregnancy while undergoing chemotherapy. Within a few

Lucy Richmond - " My dear boy, you were supposed to be the gift of life, instead you gifted me my life. I simply have no logical understanding to how or why this happened. The only answer I have is that you are a little miracle. if I wasn't pregnant I would not have gone to the doctors and had a blood test, even with symptoms. I truly believe that you were sent here on earth with a job and purpose, to save me and make me aware of my health. My darling boy, you've done your job so successfully and you can rest now with your lovely grandmothers (mine and Josh's mum) I will eternally be thankful to you and owe my life to you. You are my protector, my guardian angel and I will never let you be forgotten.

[Nov. 12, 2023](#) - Appleton, WI - Kendra Lake was diagnosed with Stage 2 Hodgkin's Lymphoma in Oct. 2022 right after having her daughter in July.

Kendra Lake is organizing this fundraiser.

Organizer
Appleton, WI

Hi, I created this Gofund Me to hopefully help my family and I get through winter. I was diagnosed with stage 2 Hodgkin's Lymphoma in October of 2022 right after having our daughter in July. Genetic testing while pregnant was actually what alerted us to the cancer. I then went through chemo treatment which cut down my ability to work as I was admitted to the hospital numerous times with complications. Just when we thought we were in the clear a mass has shown up in my chest very close to my heart. Within the last 2 weeks I went through a few different scans including a PET scan that showed a high sugar intake in this mass, which means higher risk of it being cancerous. I met with my cardiothoracic surgeon a few days later and was informed that surgery needed to be done sooner rather

[Sep. 18, 2023](#) - Mission, TX - Josephine Ponce de Leon was diagnosed with Leukemia while 33 weeks pregnant.

Josephine Ponce de Leon is organizing this fundraiser on behalf of Marco Ponce de Leon.

Hello friends and family. On September 7, 2023 I received news after routine blood work associated with my pregnancy no one ever wants to hear. I was 33 weeks pregnant with my son Daniel Felix Morales at the time. Blood results revealed I was afflicted with B-Cell Acute Lymphoblastic Leukemia with Philadelphia Positive (B-Cell ALL PH +). B-Cell ALL PH + occurs when B-lymphocytes (white blood cells within the bone marrow and blood) are overproduced and begin to change (mutate) abnormally. These cells grow rapidly and build up, forcing out healthy blood cells. This may lead to anemia, low blood counts and issues in other tissues and organs.

To make a bad situation worse my baby boy, Daniel Felix Morales, decided to enter this world seven weeks early. He is currently at Herman Memorial Medical Center in the Neonatal Intensive Care Unit in Houston, Texas for a minimum of seven weeks. I have been

This is a GoFundMe page for Lindsay McDonald! At the beginning of 2023, Lindsay was diagnosed with Hodgkin's Lymphoma after giving birth to her second beautiful daughter.

During Lindsay's pregnancy, she dealt with sever itching that did not stop after giving birth. After consulting with her doctor, Hodgkin's Lymphoma was the diagnosis.

In April, Lindsay started chemo treatments! Lindsay has just completed her 10th round of

[Aug. 1, 2023](#) - Crystal Lake, IL - 31 year old Sarah Johnson is 35 weeks pregnant. At 33 weeks of pregnancy she was diagnosed with Stage 3 Non-Hodgkin Lymphoma.

Pregnant with twins and stage 3 lymphoma

Sarah Johnson is organizing this fundraiser.

My name is Sarah Johnson I'm 31 years old and I'm currently 35 weeks pregnant with twin girls Eliana and Katherine. I'm a mom to 5 other kids an 11 year old, 8 year old, 7 year old, 2 year old and a 1 year old. I found out I was pregnant with twin girls around December 2022. My pregnancy has been complicated from the get go. I've had low blood count, Severe

July 2023 I went in for a routine Ob/Gyn appointment to get blood work done and etc. My blood work came back that I would iron infusions before I could have the babies. This was at 33 weeks of my pregnancy. I finally got into see a hematologist they reviewed blood work of a cbc panel I found out I have blood cancer which is non-hodgkins lymphoma. The dr recommend I'd get a CT scan to see if it has affected any of my organs. I went in for a CT scan last Friday and I got the results back from the CT scan that I was absolutely dreading on Monday of this week that it was in my spleen and liver. Which is considered Stage 3 blood cancer. It is definitely a lot to deal with while being pregnant with twin girls who are

[July 30, 2023](#) - Airdrie, AB - Brooke Blackwell-Trautvetter (Kajdy) was admitted to hospital while 20 weeks pregnant where she was diagnosed with Stage 4 B-cell Lymphoma. She is only 22 years old.

Support for the Kajdy Family

Airdrie, AB

On June 12, 2023, Brooke Kajdy was admitted to hospital while 20 weeks pregnant, where she was diagnosed with Stage 4 B-cell Lymphoma. At just 22 years old, she has been confronted with a life-altering diagnosis and is now facing a grueling fight.

After experiencing inflammation and pain in her legs in March, Brooke spoke with her GP and sought treatment from chiropractors and physios; all of which attributed her symptoms to the pregnancy. After several visits and treatments, with no visible results, Brooke was sent for bloodwork which all came back "normal". In May as her symptoms progressed, Brooke started acupuncture, continued with physio, tried RAPID nfr therapy, started seeing

July 21, 2023 - Spearville, KS - Destiny Barnett, a teacher was diagnosed with Stage 3 Lymphoma that spread to the spleen 3 months after giving birth.

Melissa Barnett is organizing this fundraiser.

Hello! I have created this to help with the financial stressors that are upcoming for my daughter, Destiny Barnett. Destiny was diagnosed this week with Stage 3 Hodgkins Lymphoma that has spread to her spleen, which is a cancer that affects the immune system. She will be on an intense chemo composed of 4 different chemo medications every other week. She just recently moved with her husband and kids to Council Grove. She will be a 4th grade teacher at Council Grove Elementary this upcoming school year. She is a momma to 2 sweet babies, Briley who is 21 months and Swayde who is 3 months. She has been breastfeeding the baby but has been told she will no longer be able to do this due to the

[May 31, 2023](#) - Lutz, FL - Kristen Merryman was diagnosed with B-Cell Non-Hodgkin's Lymphoma while pregnant in Jan. 2023.

Donate to help Kristen and her growing family

Lutz, FL

 Team fundraiser

Nicole and Shelby - and Nicole Ciancio are organizing this fundraiser on behalf of John Merryman.

Fast forward to January 2023, following further scans and a biopsy, Kristen learned she has B-Cell Non-Hodgkin's Lymphoma. This cancer is treatable through 4-6 cycles of chemotherapy. Given that Kristen is now in her second trimester, the doctors believe that the treatment will be safe for the baby. This means that through her pregnancy, Kristen will be receiving chemotherapy. We expect Kristen to be admitted to a hospital in Tampa this Sunday, January 8th, 2023, to begin her first round of treatment.

May 31st, 2023 by Nicole and Shelby -, Organizer

Yesterday, May 30th at 1:20pm, baby Oliver Merryman was born at 4lb 11oz! He was born at 34 and a half weeks and will be spending a little bit of time in NICU, but most importantly, he is doing great! Momma is in recovery, but is also doing really well!

More updates on Kristen's treatment: On Saturday May 20th, Kristen completed her final round of chemotherapy and rang the bell, symbolizing the end of her treatment! In the coming weeks she will be getting a full body PET scan to ensure that there are no more sites of the disease and that she is indeed cancer free.

[May 6, 2023](#) - Elm Creek, NE - Lauren Schnacker was first diagnosed with Hodgkin Lymphoma in 2021 when she was 8 months pregnant with her 1st daughter. By March 2022 she was cancer free. She was pregnant again in Oct. 2022 and her Lymphoma returned again during that pregnancy in Jan. 2023.

Donations to help support Lauren Schnacker

Morgan Schnacker is organizing this fundraiser.

Morgan Schnacker

Organizer
Elm Creek, NE

Hello - My name is Morgan Schnacker, Lauren's older sister. I am creating this Go Fund Me, with hopes to receive donations to help Lauren and her small family ease the financial burden that are to come with Lauren's health issues.

Lauren was first diagnosed with Hodgkins Lymphoma in 2021, when she was 8 months pregnant with her first born daughter, Layla. Thankfully, in March of 2022, it had been determined that Lauren would receive her last chemo treatment and be cancer free!

In October of 2022, Lauren found out that she was pregnant again and our family was ecstatic to have another little one to love on! However, in January of 2023 Lauren had discovered a swollen lymph node in her neck. After a biopsy of the swollen lymph node, it had been determined that unfortunately, the cancer had returned. Due to Lauren being pregnant, she wouldn't be able to start any cancer treatments until after she delivered.

[May 2, 2023](#) - Montevallo, AL - 22 year old Mallory Davis was diagnosed with Stage 4 Hodgkin's Lymphoma while 8 months pregnant and she was induced at 37 weeks on May 2, 2023.

My name is Mallory AKA Rosie, I'm 22 years old. In 2022 I was in a car wreck and at the emergency room they did a CT scan to make sure I was not internally bleeding, they found a mass in my chest. I found out I was pregnant not long after. Months and months of doctor appointments, biopsy results, EKGs, pet MRI scans later a **nd at 8 months pregnant of April 2023 I found out I have stage 4 Hodgkin's Lymphoma.** I was immediately induced at 37 weeks May 2, 2023 and started chemotherapy May 11, 2023. Currently going through chemotherapy and cannot work. If anybody could help me with any amount I am asking for help. My baby Lilly is doing amazing and growing healthy. Keep my family and I in your

March 27, 2023 - Author Mary Ann Bowes (who has 2 mystery novels on Amazon) - her 35 year old niece, Dani, was just diagnosed with Lymphoma while pregnant.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
