

Turbo Gastric Cancer: Diagnosis to Death in 12 Days, Tragic Story of a 49-year-old Army Nurse

Many cases are being reported after Pfizer & Moderna COVID-19 mRNA vaccination!

"Turbo cancer" is a non-medical term that has arisen to describe very aggressive and rapidly progressive cancers following Pfizer or Moderna COVID-19 mRNA vaccination and suppression of the immune system.

I have written 12 substacks about turbo cancers so far:

- turbo cancers in Canadian doctors ([click here](#))
- turbo cancer leukemias ([click here](#)) and children ([click here](#)) and ([click here](#))
- turbo cancer lymphoma ([click here](#))
- turbo brain cancer glioblastomas ([click here](#)) and ([click here](#))
- turbo cervical cancer ([click here](#))
- turbo testicular cancer in athletes ([click here](#))
- turbo cancer of appendix ([click here](#))
- turbo sarcomas ([click here](#))
- turbo colon cancers ([click here](#))

Today's focus is on turbo gastric cancer.

UK - 49 year old army nurse Billie-Joe Graham ([click here](#))

Billie-Joe Graham served on the frontlines during the Gulf War. After leaving the Army, Billie-Joe became a midwife. She was working as a midwife for South Tyneside Healthcare Trust at the time of her death.

After suffering stomach pains, which she thought might be gallstones, she visited her doctor. She was diagnosed with stomach cancer on March 29, 2022 and passed away 12

days later on April 10, 2022.

She was due to start cancer treatment on April 11, 2022. She died before she could even start treatment.

UK - 37 year old father of two, Danny Johnston ([click here](#))

Danny Johnston, 47 with his wife, Charlene before his awful diagnosis (Image: Charlene Johnston)

Starting in November 2022, 37 year old Danny Johnston would regularly vomit blood. He thought he had a stomach ulcer. He had an endoscopy on Nov.30, 2022 but there was no evidence of cancer.

He was diagnosed with cancer on Jan.14, 2023 and died a month later on Feb.17, 2023.

He was about to start chemotherapy but he died before he could start treatment.

UK - 37 year old dad, Jamie Thompson, died weeks after going to emergency for stomach pain ([click here](#))

37 year old Jamie Thompson visited emerg beginning of Nov.2022 complaining of stomach pain.

Tests revealed the 37-year-old from Middlesbrough had cancer in his stomach, chest and lung.

A couple of weeks later his friends called an ambulance when he took a turn for the worse. He was sent for another scan and the mass on his stomach had grown significantly.

Jamie had a biopsy and suffered a cardiac arrest shortly after. He had also suffered a brain bleed and died on Nov. 22, 2022.

UK - 39 year old dad who complained of sore stomach on honeymoon died 2 months later of gastric cancer.

Alan Fraser's wife Myra has been left devastated by her husband's death (Image: Daily Record)

Dad who complained of stomach pain on honeymoon died of cancer just two months later

Alan Fraser, 39, was on his honeymoon with wife Myra and complained of a sore stomach and pain in his side, with doctors later finding a cancerous tumour rather than the hernia he had assumed

"We came back from our honeymoon in July, and a week later he went to hospital with pain in his stomach. He never left hospital again.

"It was two months between diagnosis and him passing away."

UK - 39 year old UK man died 1 week after appointment for hernia ([click here](#))

A 39-year-old man died just a week after going to the hospital for a hernia in his groin.

It turned out he had advanced stomach cancer that had been spreading to several parts of his body.

There is another pattern of stomach cancers that are not as rapidly lethal, and usually take about a year to kill:

UK - 39 year old mom of 3 dies battling very rare stomach cancer for 14 months ([click here](#))

Mum-of-three Lisa Britton, 39, died from stomach cancer in July

'Beautiful' mum-of-three, 39, dies of illness 'rarer than being struck by lightning'

A family has asked people to 'check their symptoms' after a 'beautiful' mum-of-three died from a cancer doctors said was 'rarer than being struck by lightning'

Lisa's oncologist reportedly told her she had more chance of being struck by lightning than getting this form of cancer.

"Even when she was battling this horrible disease alongside intense chemo, radiotherapy and suffering a blood clot on her lung, She never once complained."

Cedar Hill, MO - 31 year old Northwest High School teacher Jessica Kozlen died after 16 month battle with stage 4 metastatic jejunal adenocarcinoma ([click here](#))

Northwest teacher dies after battle with stomach cancer

By Katelyn Mary Skaggs Nov 9, 2022

Jessica Kozlen

On July 4, 2021 she called her brother and asked him what it felt like when he had appendicitis. He told her to go to emerg.

“They ran a lot of tests and they ended up doing a CT scan and it revealed that she had late stage cancer that had spread to her colon and liver and it had already spread significantly” he said.

Stephen said he was told Kozlen’s cancer basically has no symptoms until it is in an advanced stage.

“It’s a very rare form of cancer that is very hard to treat,” he said.

She started chemotherapy right away, had some success, but then it started to fail. She died on Nov.1, 2022.

Japan – 31 year old national volleyball player Naonobu Fuji died on March 10, 2023, after battling stage 4 gastric cancer for 12 months.

Naonobu Fuji passed away on 10 March 2023, Friday. Many say that she passed away because of stomach cancer. You will get complete details about Naonobu's death. Keep reading for more information.

On Feb. 27, 2022 he announced publicly that he had stage 4 gastric cancer with brain metastases.

Washington Post editor, 35 year old Roshania Patel died on Oct. 25, 2022 from gastric cancer.

What is gastric cancer? Symptoms explored as Washington Post editor Neema Roshania Patel dies aged 35

My Dad was 6 years cancer free from stomach Cancer. Took 2 Pfizer shots. Started filling up with fluid 2 weeks after the 2nd shot. They drained fluid and found cancer cells and he was dead a week later. **Came back so aggressively then didn't get a chance to treat him.** F @pfizer

A girl, 19, died in Greece today. Cancer diagnosis (stomach) and death within 45 days.

I have 22 cases of cancer in my circle. 3 of them (women) have been diagnosed with stomach cancer. Irreversible. Pfizer 2, 3 and 3 shots respectively.

My uncle was diagnosed with stomach cancer last May and was dead within 4 weeks. I have never seen cancer kill anyone so quickly. He had 3 Pfizer shots.

Replying to @BuddforAll

Thanks, Bud, we lost my middle sister's 39-year hubby to stomach cancer only 19 days before Bob had his massive Pfizer heart attack. It was a horrible holiday season for my family.

My Dad was diagnosed with Stomach Cancer in July, '21, five months after getting his two shots of MODERNA.

NO HISTORY OF ANY CANCER IN OUR FAMILY. ZERO. He is cancer FREE & in remission after getting treatment & surgery as of July '22. NO DOUBT IN MY MIND. IT WAS THE CV.

PrYzM @DavidSherman7 · Jan 12

Replying to @DeAnna4Congress

I've also got a female friend who developed stomach cancer in the middle of 2022 after having had 2x AZ and 2x Moderna jabs. Did the jabs

contribute? who knows, some experts say it's possible but it might just have been bad luck on her part.

Micky Solo @MickySolo · Apr 30

I had 2 moderna shots and one booster. After that booster I began having symptoms that were ultimately diagnosed as stomach cancer. I blame the booster for my cancer.

My dad is in hospital today with gastric cancer he is having a stent fitted and he had 2 Pfizer V's first he was in for sepsis then pancratitis now has cancer all with in a year of the V.

My Take...

The underlying mechanism of turbo cancer is most likely some type of COVID-19 vaccine induced immune system suppression that gives rise to rapidly growing and rapidly progressive cancers of the breast, lung, colon, gastric, gallbladder, pancreas, brain, lymphoma, leukemia and so on.

There are a number of theories in regards to what is causing COVID-19 vaccine induced immune system dysfunction: TLR suppression, T-cell dysfunction, IgG4 shift, DNA contamination of mRNA vials with plasmids containing SV40 promoter, p53 inhibition, PD-L1 elevation, NK cell exhaustion and many more.

PD-L1 has been associated with gastric cancer ([click here](#)). PD-L1 is a protein called “the ligand of programmed cell death 1” and is found on immune cells. It binds PD-1 which is also found on immune cells (activated T-cells & others).

The interaction of PD-1 with its ligand PD-L1 induces a suppression of T-cell receptor signaling and results in a down regulation of the immune response, which enables cancer cells to escape immune destruction. ([click here](#))

There are new cancer drugs that target PD-L1/PD-1 to restore cancer cell directed immune response and killing of cancer cells.

COVID-19 mRNA Spike protein upregulates PD-L1 and this is even more pronounced with Omicron spike than with original Wuhan spike. Although the authors of one study concluded that this promotes immune evasion of COVID-19 and causes severe disease, upregulation of PD-L1 will also allow cancers to evade the immune system. ([click here](#))

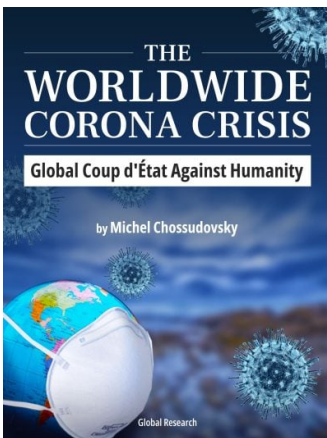

Pfizer & Moderna mRNA vaccines may be upregulating PD-L1 which could be causing several types of aggressive “turbo” cancers, including gastric cancers.

Even more concerning, it is possible that bivalent Omicron COVID-19 mRNA boosters may be causing even higher PD-L1 levels than the original strains of COVID-19, which could mean that if the original COVID-19 mRNA vaccines are indeed carcinogenic (via upregulation of PD-L1), the Omicron COVID-19 boosters are even worse and more likely to cause aggressive cancers.

The Worldwide Corona Crisis, Global Coup d’Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
