Acquired immunodeficiency syndrome (AIDS) is surging among people who received Covid mRNA vaccines, a shocking official UK government report has admitted.

The UK government's PHE Vaccine Surveillance Report reveals that doubly vaccinated 40-70-year-olds have lost 40% of their immune system capability compared to unvaccinated people.

Their immune systems are deteriorating at around 5% per week (between 2.7% and 8.7%).

If this continues then 30-50 year olds will have 100% immune system degradation, zero viral defence by Christmas and all doubly vaccinated people over 30 will have lost their immune systems by March next year.

The 5 PHE tables below from their excellent Vaccine Surveillance Report, separated by 4 weeks, clearly show the progressive damage that the vaccines are doing to the immune system's response.

People aged 40-69 have already lost 40% of their immune system capability and are losing it progressively at 3.3% to 6.4% per week.

Weekly Decline in doubly vaccinated immune system performance compared to unvaccinated people...

Age group	Week36 Decline	Week37 Decline	Week38 Decline	Week39 Decline	Week40 Position	Average Weekly Decline	Weeks before total immune system failure (100% degradation)
18-29	-2.5%	-1.9%	-4.0%	-4.3%	+40.5%	-3.2%	44 weeks (140.5/3.2)
30-39	-6.0%	-7.0%	-10.5%	-11.4%	-3.3%	-8.7%	12 weeks (96.7/8.7)
40-49	-5.2%	-5.3%	-8.1%	-6.9%	-46.6%	-6.4%	9 weeks (53.4/6.4)
50-59	-4.0%	-2.4%	-3.9%	-5.7%	-40.1%	-4.0%	15 weeks (59.9/4)
60-69	-4.2%	-2.9%	-4.2%	-2.1%	-40.9%	-3.35%	18 weeks (59.1/3.35)
70-79	-4.1%	+0.7%	-3.9%	-3.6%	-34.4%	-2.7%	25 weeks (65.6/2.7)
80+	-5.6%	-7.1%	-3.1%	-2.5%	-9.8%	-4.6%	20 weeks (90.2/4.6)

Everybody over 30 will have lost 100% of their entire immune capability (for viruses and certain cancers) within 6 months. 30-50 year olds will have lost it by Christmas.

These people will then effectively have full-blown acquired immunodeficiency syndrome and destroy the NHS.

The vaccine booster shots have to be the same as the vaccines themselves because it takes forever to do clinical trials and get approval for something different.

So if you take a booster shot, these figures show that you are giving yourself an even faster progressive form of acquired immunodeficiency syndrome (after a couple of months of effectiveness).

Pfizer originally claimed a 95% efficiency for their vaccine (calculated as in the last column above).

The figures above indicate that their figures may well have been correct immediately after vaccination (the younger age groups have had the vaccine for the shortest time).

But the figures above also show that the vaccines do NOT merely lose efficiency over time down to zero efficiency, they progressively damage the immune system until a negative efficiency is realized.

They presently leave anybody over 30 in a worse position than they were before vaccination.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying PCR test - which to this day is being pushed on a majority of people who have no clue. His conclusions are evidenced by renown scientists.

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —David Skripac

A leading researcher Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
