

Unassailable Proof that the COVID Vaccines Are the Most Deadly Vaccines in Human History

Just for the record...Just because the FDA, CDC and the Public Health Agency of Canada have found no issues with the vaccines, doesn't mean they are safe. Here's unassailable proof they aren't.

We have to stop blindly trusting our trusted authorities that they are giving us good information. It isn't warranted. We should always insist on hearing both sides of the story.

We should be extremely suspicious when not a single leading medical advocate of the vaccine is willing to debate a [team of qualified scientists who disagree with the narrative](#).

For example, it is well known that **Merck received approval from the FDA to give Vioxx to 2 year old children just 3 weeks** before Merck pulled the drug for safety issues.

We're doing it again now with our kids and this time the drug companies aren't going to pull it even though there is compelling evidence is in plain sight of everyone.

Here are three pieces of unassailable proof that the COVID vaccines are the most dangerous in history and should be immediately pulled:

1. The [VAERS data](#) shows 8,456 deaths in the US (note: if you are using openvaers, be sure to “flip the switch” to show domestic only). Even using the most conservative assumptions of 223 background deaths (the highest annual death toll in VAERS history for domestic deaths), this is 8,233 “excess” deaths.

Something caused those deaths. That's a HUGE number. **It's a public health disaster.** If it wasn't the vaccine, then what did the CDC find caused all these excess deaths? Nothing! Absolutely nothing! Note that I didn't even have to multiply by the VAERS under-reporting factor (URF) of 41 ([calculated via the CDC's own methodology](#)). There are only 226M vaccinated people. That's a death rate from the vaccine of at least 36 deaths per million vaccinated (assuming the most conservative possible URF of 1). That's **36 times more deadly than the deadliest vaccine in human history**, a vaccine that is too unsafe to use. It has no business being on the market. Note that all reports in VAERS are validated by HHS before they are allowed to appear in VAERS. Mistakes do happen. There are at least 2 records of the 1.6M in VAERS that were gamed, one by Dr. David Gorski (who is proud of breaking Federal law to do that).

2. A prominent group of neurologists with 20,000 patients has had around 2,000 patients with vaccine-related adverse reactions. In the 11 year history of the practice, they've never had a patient with a vaccine-related adverse reaction. While this could happen just by bad luck, the chance of it happening by "bad luck" is less than 1 in 10^{100} , i.e., impossible. This is a huge increase in significant neurological events that is inexplicable if the vaccines are safe. This is further evidence that the increase in the events reported in VAERS is not "stimulated reporting." NOTE: The doctors won't come forward publicly for fear of retribution (loss of medical license). That's why nobody knows. With the doctors' permission, I'm happy to disclose it to the *NY Times* or other allegedly reputable news source under NDA if they want to do a story on it.
3. And then there is the [60-fold increase in the rates of adverse events happening in front of our eyes](#). Hard to explain since it never happened before the vaccines rolled out.

When I say unassailable, I mean that nobody can argue *using evidence* that these happened due to something other than the vaccine as the primary cause. The "using evidence" is key. People make hand-waving arguments all the time to dispute hypotheses. What matters is arguments **with supporting evidence**. That appears to be non-existent in all three cases.

Extra credit

And then I got this which matches what I've heard from others. It's a bit hard to explain if the vaccines are safe. Check with your own neurologist if you don't believe me.

Ely Writes The Truth Patrol · 22 hr ago

I just heard from a cardiologist who stated that since the vaccine rollout, he has seen a 100X increase in cases of myocarditis or pericarditis. These monsters (big pharma, politicians and MSM) are killing people. Totally unconscionable to suppress this information, all for a vaccine that doesn't work.
