

Unscrupulous Special Interests and Their Vaccine Crusade

By [F. William Engdahl](#)

[New Eastern Outlook](#)

Polio is something I have more than a passing acquaintance with. Two days before my fifth birthday a medical doctor in Minneapolis diagnosed me with polio. I only learned decades later that it was not polio, poliomyelitis or infantile paralysis as it was also called. It was shortly after World War II. Then a few years later we were presented Jonas Salk and the polio vaccine, and the world believed that because of that vaccine and the Sabin variant, polio had been stamped out. The reality was that polio was not and is not a “virus,” nor did the vaccines of Salk or Sabin eradicate.

The symptoms that were given the name “polio” had dramatically declined several years before the first vaccine and Salk claimed the credit for his vaccine which was released in 1955. The symptoms that got the name polio came from a team at the Rockefeller University in 1910. Those symptoms were listed as fever, severe headache, stiff neck and back, deep muscle [pain](#). Pretty vague.

Many, many things can cause fever and such symptoms in a small child, for example being raped by someone they thought loved them or experiencing other trauma. It has been suggested that there was a major wave of in-family child rapes as soldiers returned from the traumas of their own war experiences in World War II. It was convenient for some to label the upsurge in such symptoms as polio and create a national media scare that was to most Americans in the early 1950’s more terrifying than Joe Stalin and communism. The drug industry got a huge boost and today, even newborns are jabbed multiple times in the first weeks of their fragile lives with concoctions that have been documented not to prevent viral infection but to make weak, sick and in some tragic cases autistic or even dead children.

The Rockefeller University in New York had begun literally playing around with children with the symptoms later formalized as polio as far back as 1910. Simon Flexner, first director of the predecessor to the Rockefeller University, the Rockefeller Institute for Medical Research, had produced the symptoms later named polio. He did that in a rhesus monkey which then transmitted the disease from one animal to another. Flexner was a close friend and advisor of John D. Rockefeller, Jr., son of the founder of the Standard Oil trust.

Albert Sabin, creator of the Sabin polio vaccine had come out of the [Rockefeller University](#). Human experiments with untested versions of the polio vaccines were done on already crippled children in care homes, on children in homes for the mentally insane and on that Rockefeller family plantation for human experiments, Puerto Rico.

Since that time the Rockefellers, some of the world’s most ardent financial backers of eugenics, have been at the center of the developments around what was named polio and

its “vaccine.”

Eugenics was a fraudulent social theory that a “better society” could be created by eliminating “undesirable” human blood lines and promoting the desirable types like those of Rockefellers or DuPonts or their likes. To the present day eugenics is the guiding ideology of the very rich, loveless American oligarchs including Bill Gates and David Rockefeller. To this day the major financial backers of the criminal activities of the UN WHO (World Health Organization) and their fraudulent swine flu pandemic scares are the Rockefeller Foundation and the Bill and [Melinda Gates Foundation](#).

GAVI

Several years ago, the Bill and Melinda Gates Foundation and the Rockefeller Foundation, along with the World Bank, UNICEF, the WHO and a group of pharmaceutical companies, united all in something called GAVI and set out to bring massive polio vaccination first to India. GAVI: The Vaccine Alliance was founded by the Gates Foundation in 2000 as a “public-private partnership” to unite in assaulting poorer developing countries with the Big Pharma vaccine industry they would otherwise be [spared](#).

In India Gates, Rockefellers and WHO with their Big Pharma partners convinced the Indian government to spend some \$8 billion of their scarce funds, along with a tiny amount of “seed” money from GAVI partners, to vaccinate Indian children.

The result?

An article in the Indian Journal of Medical Ethics in 2012 concluded,

“In 2011, there were an extra 47,500 new cases of NPAFP. Clinically indistinguishable from polio paralysis but twice as deadly, the incidence of NPAFP was directly proportional to doses of oral polio received. Though this data was collected within the polio surveillance system, it was not investigated.”

Instead, Gates and Company proclaimed India “polio” [free](#).

They ignored the fact their “polio” vaccines were killing and paralyzing 48,000 Indian children because the WHO definition of polio allowed them the casuistry. NPAFP stands for Non-Polio Acute Flaccid Paralysis. The medical-industrial complex are masters at coming up with names.

By calling it non-polio, they defined polio as eradicated in India. But their vaccines are killing and paralyzing tens of thousands of children. So by the WHO semantics the GAVI vaccines did not cause a single case of “polio.” It did cause 48,000 cases of something far deadlier and more damaging, Acute Flaccid Paralysis, a condition the WHO admits is clinically indistinguishable from polio and which occurred in direct proportion to the doses of polio vaccine received.

A similar phenomenon took place at the same time in neighboring Pakistan. In 2011 the Paktstan Tribune reported,

“A government inquiry has found that polio vaccines for infants funded by the

Global Alliance for Vaccination and Immunisation are causing deaths and disabilities in regional countries including Pakistan. Geneva-based officials of GAVI, Jeffrey Rowland and Dan Thomas, were contacted by e-mail but they did not respond. “

GAVI spent a mere 7.8% of the total cost of the mass vaccination in Pakistan, of Rs26 billion. The Tribune continued, “Pakistan will be spending Rs24.2 billion from its own resources on the purchase of new and under-used vaccines at much higher cost as compared to their equivalent vaccines.” The Gates-Rockefeller-WHO polio vaccination program in Pakistan killed an estimated 10,000 and crippled tens of [thousands more](#).

Now the focus has moved to another US warzone, Syria.

Polio in Syria?

For two decades Syria has been polio-free. Now, beginning 2013 in the wake of their criminal efforts in Pakistan and India, the WHO has declared the presence of polio outbreaks in Syria and accused President Assad of refusing vaccine teams - the previous ones in Pakistan, laced with [CIA agents](#).

The “polio” spreading in war-ravaged Syria, where the CIA and Pentagon and their assets such as ISIS and CIA-funded opposition have destroyed homes and driven millions into refugee status, is vaccine-caused, just as in India and just as in Pakistan. The polio spreading through Syria is “vaccine-derived polio,” specifically, the same strain of “non-polio acute flaccid paralysis” as in India and Pakistan that coincided with the mass vaccinations with Sabin oral vaccines by GAVI. The vaccine originated from the oral polio vaccine developed by former Rockefeller University researched, Sabin, which contains an attenuated vaccine-virus or active polio virus along with unknown adjuvants or boosters the drug companies prefer not to [reveal](#).

Kindah al-Shammat, Syrian Minister of Social Affairs, said at the time that, “The virus originates in Pakistan and has been brought to Syria by the jihadists who come

from [Pakistan](#).”

Vaccines which Trigger Abortion?

If this sounds improbable take a close look at a recent expose by a concerned group of Kenyan doctors about a vaccine developed by WHO in conjunction with the Rockefeller and Gates foundations. The Kenya Catholic Doctors Association discovered an antigen that causes miscarriages in a tetanus vaccine that is being administered to 2.3 million girls and women by the World Health Organization and UNICEF. Since 1972 the Rockefeller Foundation has worked in secrecy with the WHO and various pharmaceutical companies to fund a WHO program in “reproductive health.” There they developed an innovative tetanus vaccine.

In the early 1990’s, according to a report from the Global Vaccine Institute, the WHO oversaw massive vaccination campaigns against tetanus in Nicaragua, Mexico and the Philippines. Comite Pro Vida de Mexico, a Roman Catholic lay organization, became suspicious of the motives behind the WHO program. When they tested numerous vials of the vaccine they, like in Kenya today, found they contained the same Human Chorionic Gonadotrophin, or HCG. They found that to be very curious in a vaccine designed to protect people against lock-jaw arising from infection with rusty nail wounds. Tetanus is also rather rare, so why a mass vaccination campaign and that for only women of child-bearing age?

HCG is a natural hormone needed to maintain a pregnancy. However, when combined with a tetanus toxoid carrier, it stimulated the formation of antibodies against HCG, rendering a woman incapable of maintaining a pregnancy, a form of concealed abortion.

The pattern is clear. The tools of choice include wars everywhere from Afghanistan to Pakistan to Libya to Syria to Ukraine. It includes campaigns of massive select vaccinations in war-torn countries. It includes setting the CIA and Mossad to the job of creating fake Islamic “jihadist” terrorists to kill and maim and create the cover for a Washington “war on terror.” Their only problem of late is that these strategies are failing. That’s bad news for the paranoid oligarchs, good news for sane remnants of the human race, human beings.

F. William Engdahl is strategic risk consultant and lecturer, he holds a degree in politics from Princeton University and is a best-selling author on oil and geopolitics, exclusively for the online magazine [“New Eastern Outlook”](#).
