

US-Russia Relations, North Korea, Dakota Access Pipeline. Select Shows from Global Research News Hour

By [Michael Welch](#), [Dmitry Orlov](#), and [Prof Michel Chossudovsky](#)

Global Research, August 24, 2017

Region: [Asia](#), [USA](#)

Theme: [Environment](#), [GLOBAL RESEARCH NEWS HOUR](#), [Media Disinformation](#), [US NATO War Agenda](#)

“But we must acknowledge that there is a process of smearing the independent media, which means that more than ever we need our readers to get the word out. In social media and across the land, these issues must be understood and debated. Again, the Global Research News Hour is playing a very important role in this regard.”

– Professor Michel Chossudovsky (May 5, 2017 program).

For the duration of the summer, the Global Research News Hour is highlighting past shows. Broadcasters are welcome and encouraged to use the repeat broadcasts on this webpage. However, broadcasters are free to avail themselves of any of the shows on the Global Research News Hour [webpage](#).

[**Shrinking the Technosphere, U.S. War-mongering Toward Russia**](#)

Interview with Dmitry Orlov. Global Research News Hour Episode 156

In a brilliant new book, author and past guest **Dmitry Orlov** postulates the existence of something called the ‘technosphere’, analogous to the biosphere, which came into existence as soon as human inventions started impacting the natural world. This artificial construct, appears not to embrace life as we know it, nor does it have any affinity for the human species, beyond what can be manipulated into the technosphere’s service!

In one of our program’s most provocative interviews yet, Dmitry Orlov further explains the characteristics of the technosphere, the short-comings of techno-fixes for our ecological crises (eg: ‘renewable energy’), how organized religion and progressive social movements are enabled by and artifacts of the technosphere, and how this force imperiling all life on Earth can ultimately be overcome and human freedom secured.

[Dakota Access Pipeline \(DAPL\): Has the Standing Rock Resistance been Co-opted by the Non-Profit Industrial Complex?](#)

This episode of the Global Research News Hour attempts to take a fearless look at the Dakota Access Pipeline resistance, and what is at stake, not just for the people in the area, but for the future of authentic environmental and Indigenous struggles.

*In the first half hour, we hear from two water protectors, who identify as **Cedar Woman** (Lorraine Clements) and **Wopilawin** (Paula Antoine, an organizer and veteran of a similar anti-Keystone XL action). They spoke from their vantage point on how the camp came together, the violent actions against campers by law enforcement and security personnel, mis-portrayal of the camp by media as 'riotous', and the importance of remaining united in the face of this common struggle.*

*Later on, retired Canadian biophysicist **Dennis LeNeveu** utilizes his own research and provides an assessment of the hazards stemming from the pipeline if it proceeds along the projected path.*

*Finally, London, Ontario based writer and researcher **Cory Morningstar**, returns to the program with a critical evaluation of the many non-profits, celebrities, and even corporations like Unilever, which have jumped on the Standing Rock bandwagon, to the detriment of the Tribal peoples and ecological causes those 'allies' purport to support. Following up on her research into the "non-profit industrial complex" (NPIC) Morningstar reveals the hidden and unwholesome motives of [Warren Buffett, and other 'philanthropists'](#), who finance anti-pipeline activism to the tune of millions of dollars through their foundations.*

[North Korea and the Looming Nuclear Danger](#)

Cuban Missile Crisis in Slow Motion? Interview with Michel Chossudovsky. Global Research News Hour Episode 180

*What is behind this jousting between nuclear powers, and what could be the consequences for the region and the world? These are the questions we hope to address in this week's installment of the Global Research News Hour, featuring this week's special guest **Michel Chossudovsky**.*

Over the course of the hour, the discussion will delve into the true reasons for the Korean War, the intended target of the THAAD anti-missile system, the prospect of Trump's unpredictable foreign policy as a Nixonian 'Madman' strategy, the disturbing normalization of the use of nuclear weapons within Washington's civilian bureaucracy, and the necessary conditions for reversing the drift toward a third and final world war.
