Region: [Middle East & North Africa](#)
Theme: [Intelligence](#), [US NATO War Agenda](#)
In-depth Report: [SYRIA](#)

The Kurdish separatist militia SDF and its affiliates from PYD and Asayish are burning wheat fields in the territories under their occupation northeast of Syria.

Some of the most fertile lands as well as territories rich with oil are under the occupation of the US-sponsored separatist SDF militia. The US and its illegal International Coalition of evil states are preventing the Syrian state from restoring the country from terrorists and separatists.

A video widely spread on social media shows a vehicle of the Kurdish Asayish thugs, the security arm of the PYD and SDF Kurdish militia, driving through a wheat field in the city of Qamishli northeast of the country with strong flames of fire coming from it to burn out the entire field.

Two pick-up trucks seen in the video, one of the vehicles has reportedly caught fire itself, as per some of the local activists.

Farmers who refuse to hand over their wheat to the criminals get detained, tortured, and their fields get torched by these thugs.

Kurdish separatist militias are trying to carve out a large part of Syria to establish their Israel-style entity, similar to what their brethren did under the US occupation of Iraq. The land they're claiming belongs to the people whose grandfathers hosted the Kurd refugees who were fleeing the oppression of the Ottomans, and this is how their grandchildren are paying back.

Many US-linked news sites have been falsely claiming that the Syrian state is behind these heinous acts until the evidence indicting their own-grown terrorists is overwhelming and spreading thanks to brave activists from the region.

Syria, prior to the current War Of Terror waged by the US and its allies including armies of terror, used to be not only self-sufficient in agriculture produce, especially wheat, but also was exporting the surplus.

Burning the wheat fields is very much a US state policy with Turkey and Israel working as the US's lackey in our region, where they destroy local fields then provide their poisonous US-produced GMO grown wheat and maize [seeds] . [Syria has banned growing and importing all sorts of GMO products in 2012](#) making sure the country's population does

not get harmed by these products.

Locals have been protesting the [ill-treatment and heinous acts](#) against them by the SDF militia and its affiliates east of the Euphrates in Der Ezzor, Raqqa, and Hassakah provinces. Kurdish [Asayish has also ambushed and slaughtered 13 Syrian security personnel in Qamishli](#) last September to prevent the Syrian state from protecting its citizens and farmers under the SDF/US occupation.

The separatist Kurds have worked very efficiently as Trojan horses luring in Turkey into Syria in the northwest of the country and still working on luring it in the northeast of the country, also have been working relentlessly to serve the USA and Israel as much as they could in return for recognizing them as a self-governing entity on stolen Syrian land, especially after the heavy western propaganda campaign showing them as liberating the areas from [ISIS](#) when on the ground it was merely a flag-changing act for the media [under the US supervision](#).

While the US is continuing its destructive War Of Terror against Syria, including **Economic Terrorism** against our country, US sponsored forces on the ground are starving our people in all the areas they have penetrated: [Rukban Concentration Camp](#) in Tanf, [Al-Hol](#) concentration camp in Hasakah, and all the land east of the Euphrates.
