

US Terror-Bombed Syria with Toxic Depleted Uranium(DU) Weapons

[Militarization and WMD](#)

America uses banned depleted uranium (DU) weapons in all its wars, ongoing since first developed during the Vietnam era.

The 1925 Geneva Protocol and succeeding Geneva Weapons Conventions prohibited use of chemical and biological agents in any form as weapons of war.

Although no Geneva Convention or other treaty specifically bans radioactive uranium weapons, including DU ones, they're illegal de facto and de jure under the 1907 Hague Convention, prohibiting use of any "poison or poisoned weapons."

DU munitions are radioactive, chemically toxic and poisonous. America is a signatory to the Hague and Geneva Conventions. Using these weapons in combat is a war crime.

US Code, Title 50, Chapter 40, Section 2302 defines a WMD as "any weapon or device that is intended, or has the capability, to cause death or serious bodily injury to a significant number of people through the release, dissemination, or impact of (A) toxic or poisonous chemicals or their precursors, (B) a disease organism, or (C) radiation or radioactivity."

Armor-piercing DU munitions enable their ability to penetrate targets, enhancing their destructive capability. On detonation, depleted uranium aerializes, contaminating land, air and water, acting as a miniature dirty bomb.

It caused an epidemic of cancer, numerous other diseases and serious birth defects in Iraq - including children born with two heads, one eye, and legs grown together.

Miscarriages are frequent. Hundreds of newborns had cleft pallets, elongated heads, overgrown or short limbs, and other malformed body parts.

Iraq remains a toxic wasteland. So do other US war theaters. The Pentagon admitted using thousands of DU rounds in Syria in 2015, falsely claiming attacks were against ISIS, imperial foot soldiers America created and supports.

Pentagon warplanes began terror-bombing Syria in September 2014, conducting thousands of airstrikes, continuing under Trump against infrastructure and government targets.

It's unknown if DU weapons were used throughout this period, as well as against Iraq since US terror-bombing began in June 2014 - on the phony pretext of combating ISIS.

Whatever the Pentagon admitted to is likely a small fraction of what it's done. Its high crimes are notoriously whitewashed.

In March 2015, US-led coalition spokesman John Moore lied, saying its warplanes "have not been and will not be using depleted uranium munitions in Iraq or Syria..."

Now we know part of the truth. Most of it remains hidden.
