The battle lines over mandatory COVID-19 vaccines are now going full steam ahead in the U.S. as the Biden Administration is announcing today that all federal employees must now get a COVID-19 shot as a condition for employment, and that they are eliminating the testing opt-out.

The argument that only COVID-19 shots will end the endless “pandemic” and the lie that hospitals are over 90% full of unvaccinated people are being used as justification for mandatory mass vaccination.

It doesn't take much research on one's own to bypass the corporate media and find out that they are lying, and that there are numerous reports that the exact opposite situation is now happening in the U.S. and around the world, which is that the hospitals are full of people who have already been vaccinated with COVID-19 shots and that the ones who have survived are now filling our hospitals.

This is evident from the last release of data into the government Vaccine Adverse Event Reporting System (VAERS) database, which as of last Friday shows that following COVID-19 shots, there have been 13,911 deaths, 18,098 permanent disabilities, 76,160 ER visits, 56,912 hospitalizations, [2,933,377 injury symptoms](#), and 14,327 life threatening events.

And these are just the cases that have been reported and that the CDC has allowed to be released to the public. Many healthcare workers have stated that there is pressure from doctors and hospital administrations to NOT relate injuries to the COVID-19 shots and to not report them in VAERS, which one nurse stated takes over 30 minutes to do for a single case and is very time consuming.

We have previously exposed the government's lies on who it is filling the hospitals today. See: [CDC Director Lies to America Announcing Latest “Pandemic” - “Pandemic of the](#)

[Insanity Rules in the U.S. as Hospitalizations and Deaths Among Vaccinated “Breakthrough” Cases Surge While Health Authorities blame the “Unvaccinated”](#)

And just this past week, the [Toronto Sun](#) ran a story reporting that more than 100 Ontario youth were sent to the hospital for vaccine-related heart problems.

A report [quietly released last week by Public Health Ontario](#) (PHO) tallies the number of people in the province who have presented to hospital with heart inflammation following mRNA vaccination, and it skews heavily towards young people.

As of Aug. 7, there were 106 incidents of myocarditis/pericarditis in Ontarians under the age of 25. That’s slightly more than half of the total of all such incidents. ([Full article.](#))

Here is a video report I put together with testimony from nurses, a doctor, and an occupational therapist explaining what they are currently seeing in the hospitals, so you can hear it yourself from the frontline workers.

This is from our [Rumble channel](#), and it should be up on our [Bitchute channel](#) shortly as well.
