

Vaccines Cause Sudden Infant Death Syndrome (SIDS)

Even the CDC admits that vaccines can cause serious brain injury and death. Is it any surprise that vaccines can cause sudden infant deaths too?

Executive summary

In this article, I'll present just a few simple examples that demonstrate that vaccines cause autism. If vaccines don't cause autism, these data points are hard to explain away. And note that "they" never show you their data points measuring the same thing that show an opposite result!

Stop or delay vaccination —> SIDS decreases dramatically

If you stop vaccinating, or simply delay when vaccines are given to kids, the rate of SIDS goes down. See [this article](#).

John Hetherington
@JohnHet20486040

Japan paused babies being vaccinated for their first two years, and S.I.D.S disappeared....They know the harm being done!
S.I.D.S is a carbon copy,, so the weirdest part is, why the 'F' are kids being killed, when 2+2 is undeniably 4.

CDC paper admits that vaccines can cause brain damage and death

See [this section in my previous Substack article](#) for the CDC study and be sure to read all the highlighted sections in [this excellent Substack article about the CDC paper](#).

It basically says the vaccine led to brain inflammation which then led either to permanent brain injury or death.

Get it?

Thus, we meet the “biological plausibility” condition in the Bradford Hill criteria with this paper.

But we didn't even need that. The fact that people are hard to kill and that injecting a foreign substance directly into your body (bypassing your normal protection mechanisms) could kill you isn't much of a stretch for most people.

SIDS is much more likely to happen right after vaccination

SIDS seems to happen more often after vaccination, especially if more vaccines are given such as in the example at the start of the article.

Here are some anecdotes which appear to be credible because they are consistent with the evidence I've collected and because the sources appear to be credible as well. You can choose to believe them or not. If you choose not to believe these stories and you have comparable credible evidence that negates these anecdotes, I'd like to see it.

I agree 100% I once spoke to a lady that was a paramedic for 25 years. She told me that there wasn't one time that she went to a call for SIDS that the child hadn't recently been vaccinated!

I use to be a life insurance agent and was in telesales it was one conversation that stuck with me. I was on my cell phone with her. I may be able to go to my records 🥰 I'll see what I can do 100 🥰 my son-in-law was a paramedic in LA County I can have him reach out to some of his ex-coworkers and see if they've experienced the same. I do have a few friends that lost their babies right after vaccines 💉 it wasn't until I spoke to that lady that I reached out to them and asked if their babies had had a vaccine prior to their passing they all said yes!

Figure 14: Age <18 Deaths per Week

Replying to @ChildrensHD

12 years as an ER nurse and every SIDS case had a well visit within 72 hours of their death. Every single one.

My previous article about SIDS

Read the comments in [my previous article which talks about SIDS](#).

My survey results of parents of kids who died from SIDS confirm it was MUCH more likely to happen after a shot than before a shot

Here is [my survey](#).

Here are [the results](#). It is most interesting to read the Notes section written by the parents. I have the contact information for all the parents who responded. There was one gamed entry which I deleted.

I wish someone would replicate this survey, but nobody seems to be interested in doing that. They all want to tell me that my survey is bad, but nobody wants to show the CORRECT results. The lack of interest in doing the "correct" survey tells you everything you need to know, doesn't it?

The results of my survey show the odds of getting SIDS a month before the shot vs. a month after a shot are 2:32 or 1:16.

If the vaccines aren't elevating the risk of SIDS, how do you explain this HUGE discrepancy?

When	Child was NEVER vaccinated ...	17
	Don't remember	7
	DEFINITELY sometime BEFO...	5
	<1 mo BEFORE a scheduled ...	1
	<1 week BEFORE	1
	<1 day AFTER nearest vaccin...	5
	<3 days AFTER	7
	<1 week AFTER	10
	<1 month AFTER	11
	DEFINITELY sometime AFTER...	16
	Outside of those ranges	9
	Total	89

Probably zero Amish babies have ever died of SIDS

I couldn't find any SIDS in unvaccinated Amish kids either. Has anyone else?

Summary

The evidence I'm aware of shows unambiguously that vaccines cause SIDS.

Your interpretation may vary.
