The people behind the Vaccine Adverse Event Reporting System (VAERS) have admitted that [“fewer than 1% of vaccine adverse events are reported”](#) in an early grant:

“Adverse events from drugs and vaccines are common, but underreported. Although 25% of ambulatory patients experience an adverse drug event, less than 0.3% of all adverse drug events and 1-13% of serious events are reported to the Food and Drug Administration (FDA). Likewise, fewer than 1% of vaccine adverse events are reported. Low reporting rates preclude or slow the identification of “problem” drugs and vaccines that endanger public health.”

[VAERS published their later numbers](#), and perhaps we should consider this data representative of fewer than 1% of vaccinated individuals:

- 818,042 Adverse Events
- 127,641 Doctor Visits
- 83,412 Hospitalizations
- 92,017 Urgent Care
- 26,199 Disabled
- 10,179 Bell’s Palsy
- 10,304 Myocarditis
- 8,408 Heart Attacks
- 2,631 Miscarriages
- 17,128 Deaths

Yet, according to Fauci, the vaccine is 100% safe and effective!
