Amply documented, the Covid-19 Vaccine has triggered from the outset in December 2020 an upward trend in mortality and morbidity. The evidence is overwhelming.

And now the Vatican is engaged in a despicable propaganda campaign.

My question to the Vatican: Has Pope Francis been vaccinated?

Has the Vatican taken the trouble to read the bombshell [Pfizer confidential report](#) which acknowledges the deadly impacts of the Covid vaccine.

This [Secret Report by Pfizer](#), is now in the public domain (released under FOI).

On January 29, 2021 a mass funeral protest for children who have died after receiving a Pfizer vaccine was held in Geneva, Switzerland. ([Bitchute Channel](#), and also on our [Telegram channel](#))

And now **Pope Francis**, who lived through the tragic events of “The Dirty War” (*La Guerra Sucia*) in Argentina is promoting the mRNA vaccine on behalf Big Pharma.

*We are demanding that the Covid-19 mRNA vaccine be immediately **withdrawn and discontinued Worldwide.***

Vatican City has issued a new set of coins, one of which shows a young person being vaccinated, presumably against COVID-19.

[#Vatican](#)'s new 20-euro coin dedicated to "theme very close to [#PopeFrancis](#)' heart...the need to be vaccinated...[he] has repeatedly stressed the importance of vaccination,...[& that it] is important to 'continue efforts to immunize even the poorest peoples'." <https://t.co/tWyfKcJjsTpic.twitter.com/qRVB9MdK1W>

The new coin set consists of eight coins that includes a 20 euro silver coin depicting a young person receiving a needle.

The coin itself does not say whether the jab given to the young person is for COVID, but the description on a Vatican website [states that](#) "The 20 euro silver coin, designed by Chiara Principe, is dedicated to a current theme that is very close to Pope Francis' heart: treatments to counter the pandemic and the need to be vaccinated. The coin depicts a doctor, a nurse and a young person who is ready to receive the vaccine."

In addition, the site states that "The Holy Father has repeatedly stressed the importance of vaccination, recalling that health care is 'a moral obligation,' and it is important to 'continue

efforts to immunize even the poorest peoples.”

In total, the set costs 180 euros.

Catholic commentator Dr. Taylor Marshall reacted to the news with a tweet calling to mind a World Earth Day coin that depicted an image reminiscent of the Pachamama theme from the 2019 Amazonian Synod.

American journalist Diane Montagna tweeted the description of the 2020 coin that depicted “a mother carrying the earth in her womb ... ”

Recall Vatican’s 2020 coin to mark 50th World Earth Day, “depicting a mother carrying the earth in her womb, to whom we owe care & love as if it were a daughter, with long ears of wheat in her hair, in a reference between past & future that becomes timeless, & therefore eternal.” <pic.twitter.com/v64jbjLoSw>

COVID vaccines have been associated with numerous instances of [severe side effects](#) that have included permanent injury and death.

In March, it was confirmed that a 34-year-old English woman died of a “[sudden and catastrophic](#)” brain bleed after taking the AstraZeneca COVID jab.

Most major vaccine manufacturers, [including](#) Pfizer, Moderna, and Johnson & Johnson, were created using fetal cells during the production and testing stages.

The potential dangers of taking a COVID jab and the link to abortion has led prominent [Catholics such as Abby Johnson](#) to state their intention to avoid cooperation with the current vaccines for moral and religious reasons.

Pope Francis’ push to vaccinate against COVID with abortion-tainted jabs has made it [difficult for some Catholics](#) to receive religious exemptions from employers due to supposed Church support for vaccination.
