Family claim Sydney's St Vincent's hospital is refusing to give their young daughter a life-saving lung transplant because she won't get Covid jabs

109 comments

Dazelle Peters, a 17-year-old Leukemia-sufferer who was reportedly denied a life-saving lung transplant after refusing to receive FIVE Covid vaccines, has died.

According to the Daily Mail, the Sydney hospital treating Dazelle said, her lack of a Covid vaccination was a factor in her not being put on the lung transplant waiting list.

A hospital spokesperson told the Daily Mail, their 'policies and guidelines wouldn't support transplantation' of an unvaccinated person.

'Vaccination status against various infections is a critical part of this assessment in order to ensure optimal prospects of survival post-transplant,' a St Vincent's hospital spokesperson said. ([source](#))

Despite saying she was 'sorry' to learn of Dazelle's situation Assistant Health Minister Ged Kearney had advised 'the Australian Government is unable to intervene in clinical decisions'.

Mr Kearney's response was in reply to a letter sent to her by outspoken Liberal

MP Russell Broadbent, who raised both the plight of Dazelle and Victorian mum Vicki Derderian, who is being denied a heart transplant for refusing the jabs.

'The priority and treatment given to an individual is ultimately a clinical decision made by the treating hospital and transplant teams involved,' Ms Kearney's letter stated.

However, it clarified there is no official mandate barring the unvaccinated from getting transplants.

The Guidelines do not prevent a patient who has not received a Covid-19 vaccination from being placed on a transplant waitlist,' Ms Kearney stated.

Ms Kearney said the states are ultimately responsible for transplant practices.

'Each state and territory is responsible for the delivery of the jurisdictional health services, including hospital and transplantation services,' it read.

Dazelle's family say that while the consulting surgeon described Dazelle as a 'complex' case he also said she needed to 'do the right thing' and get the vaccines, which take nine months to administer, to keep other patients and staff safe.

Australia joins Canada in a race to the bottom as 2 unvaccinated Canadians were murdered by local health officials in 2023 for being unvaccinated:

May 22, 2023 - Sudbury, Ontario - 35 year old Garnet Harper died after being denied a kidney transplant for being unvaccinated, leaving behind wife and five children. ([click here](#))

Aug. 25, 2023 - Sheila Annette Lewis was denied access to the lung transplant list by corrupt Alberta Health Services Executives and Judges in Alberta, Canada.

My Take...

I work in a large Cancer Centre (Cross Cancer Institute, Edmonton, Alberta) and I have been involved in many life and death decisions.

Make no mistake, Dazelle was murdered in a premeditated manner via a decision that was made all the way up the bureaucratic ladder. This was not a decision made by her treating doctor, Dr. Mark Benzimra (who was guaranteed protection by his bureaucratic bosses including the medical board).

The decision to murder Dazelle was made at the highest bureaucratic levels - the politicians simply gave the green light and a promise they wouldn't intervene.

- ✓ LOGO DESIGN

Director of NSW Respiratory and highly respected pulmonary specialist Dr Mark Benzimra got in touch with Total Medical Design to help launch a new brand – NSW Respiratory. This meant the creation of an eye-catching logo, a dynamic and modern website design and development, along with messaging and copywriting that instilled trust and reassurance for prospective patients.

In Canada, Lung Transplant patient Sheila Annette Lewis was murdered by Alberta's top health officials: Alberta Health Services Executives Dr.Verna Yiu and Dr.Francois Belanger, their lawyer Mark Jackson and four Alberta Judges - Justice Paul Belzil, Justice Frederica Schutz, Justice Michelle Crighton and Justice Dawn Pentelchuk.

- "Lewis's lawyer said her client was **informed in June 2021** that she had to be vaccinated in order to remain on the transplant list. Pejovic said that forced Lewis to make an agonizing decision. "
- The top healthcare bureaucrat in Alberta at the time was AHS CEO Dr.Verna Yiu.
- **AHS CEO Dr.Verna Yiu also implemented an illegal COVID-19 Vaccine mandate on all of Alberta's 105,000 healthcare workers on Aug.31, 2021.**
- **Dr.Verna Yiu is also directly responsible for murdering many of my 2456 Alberta Cancer patients at Cross Cancer Institute from 2016 to 2022.**
- **As a reward for all her crimes against humanity (and all the vulnerable Cancer patients, COVID patients and Transplant patients she helped murder), she was appointed Vice President of University of Alberta on Jan. 1, 2024.**

Unvaccinated patients are murdered to serve as an example of non-compliance.

These decisions have nothing to do with medicine or science.

COVID-19 mRNA Vaccines are already causing Lung Transplant rejection in some cases.
From 2022 paper by Alsunaid et al:

COVID-19 Vaccine Triggered Rejection in Lung Transplant Recipients: A Case Series

S. Alsunaid  • V. Caputo • K. Stryker • ... J. Borgi • S. Forest • A. Mansour • Show all authors

Purpose

Anti-severe acute respiratory syndrome corona virus 2 (SARS-CoV-2) vaccination is recommended by AST, ISHLT, and CDC in all transplant recipients. Lung transplant recipients (LTR) are at a higher risk of developing severe symptoms due to higher immunosuppression (IS) and baseline compromised graft function. Limited antibody response to messenger RNA (mRNA) vaccines has been reported in LTR, with the majority mounting a response after the 2nd dose. In this series, 3 patients developed new and significant respiratory compromise after their 2nd vaccine dose consistent with antibody mediated rejection (AMR). To our knowledge, this is the first published case series of vaccine induced rejection in LTR.

Methods

Retrospective chart review of our cohort showed 46% fully vaccinated and an additional 2.5% partially vaccinated patients. Three fully vaccinated patients with approved mRNA vaccines (2 Moderna, 1 Pfizer-BioNTech) were identified after developing severe respiratory compromise post 2nd vaccine dose. Evaluation revealed AMR as the underlying etiology.

Results

All patients were female, ages 50-70 years old, between 6 months and 2 years post-transplant. No previous rejection episodes. All were on standard IS as per institution protocols. Two were hospitalized with hypoxic respiratory failure within 2 weeks of their 2nd vaccine dose. The 3rd was seen at clinic for milder similar symptoms, later progressing and requiring supplemental oxygen (O₂) and hospitalization. Imaging showed new lung infiltrates, infectious work up was negative. Biopsies did not show any cellular rejection. All developed new DSAs and received treatment for AMR with plasmapheresis, IVIg, and Rituximab. Two recovered their lung function and are off supplemental O₂, the 3rd did not and is re-listed for transplant.

Conclusion

While LTR have a diminished response to SARS-CoV-2 vaccines making them more vulnerable to the disease, their immune system's response may not always be clear. We report three cases of patients developing severe AMR from new DSAs that appear to be triggered by the COVID-19 vaccine. This vaccine responses should be collected in a database where each case can be investigated to help better understand the mechanism behind them and hopefully identifying LTR at risk. This can then be used to modify vaccination strategies and aid in preventing adverse outcomes in this vulnerable group of patients.

So why would health officials take the risk of murdering an unvaccinated patient?

Well, first, there is NO RISK. Everyone involved in the murder is guaranteed protection. Dr. Benzimra was guaranteed protection. He will never have to worry about his job or license. He will be taken care of very well.

Every doctor and nurse who killed unvaccinated patients in the hospitals, with lethal protocols including Remdesivir, was guaranteed protection ahead of time.

Every health worker who euthanized a Long Term Care resident with Midazolam and Morphine and recorded it as a COVID death, was guaranteed protection.

In Canada, and now in Australia, murder is legal.

But it has to be in the service of an ideology or narrative.

In these cases, these murders of unvaccinated patients are carried out deliberately, in a premeditated manner, in order to send a message that the penalty for non-compliance IN THE FUTURE, is DEATH.

The objective of the murder is to send a message to the rest of the population: comply or die. And by getting Judges involved, they make it clear to us that they can get away with this any time. And do it to anyone.

This is one of many reasons why it is not possible to “move on” from COVID.

Not only has justice not been served, there has been a complete perversion and inversion of Justice.

The Worldwide Corona Crisis, Global Coup d’Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. -Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden "plandemic"; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that "there is no causal relationship between the virus and economic variables." In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. -David Skripac

A reading of Chossudovsky's book provides a comprehensive lesson in how there is a global coup d'état under way called "The Great Reset" that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
