

VIDEO: Bubbles Visible in Underwater Cams

By [Washington's Blog](#)

Global Research, July 21, 2010

[Washington's Blog](#) 19 July 2010

As of this moment (11:06 Eastern Daylight Time), bubbles are apparent near the blowout preventer from [Hos ROV1 video cam](#) (one of BP's official [underwater video cameras](#)) here:

[Oceaneering - ROV 2](#)

And there is seepage or leakage of some kind now apparent from ROV 2's [BSkandi Neptune video cam](#) at another location here [Update: BP has now changed the view - hopefully someone captured the live video feed from earlier today]:

[BSkandi - ROV 2 \(456854\)](#)

This is easy to see in the larger version [streaming live here](#).

Florida Oil Spill Law also [alleges](#) that the following clip comes from ROV'2 [Boa Deep C video cam](#) on July 19, 2010 at 04:40 EDT:

I have seen no corroboration yet proving that this last clip is real.
