Global Research, June 20, 2007

20 June 2007

Was it really 'collapses' we saw on TV?

Was it really because of the planes impact and the following fires that World Trade Center 1 & 2 came to the ground? Or did they in fact [explode](#) from top to bottom?

It all happened very fast. The Twin Towers were 417 meters tall – 63,5 x 63,5 meters wide – and were more or less pulverized in approximately 12 seconds. Many critics claim this is almost free fall speed. That would mean zero(0) resistance from the buildings own steel and concrete structure on the way down.

But the towers were supported by a core of 47 massive [steel beams](#) and 236 on the outer sides. Could this fast a total demolition be possible without some kind of explosives?

The video and photographic evidence show something that does not at all resemble collapses. You can see hundreds of thousand tons of concrete and steel beams being thrown like confetti several hundred meters to the sides and up in an arch – as the towers are being [pulverized](#).

Many people do not know that a **third** building 'collapsed' that day.

[World Trade Center 7](#) – a 47 storey high steel framed skyscraper – that was not hit by any airplane or suffered any severe fires – collapsed to the ground perfectly symmetric into its own footprint – in less than 7 seconds. More than 7 hours after WTC 1 & 2. Never before in the history of mankind has a steel framed high rise building collapsed due to fire. WTC 1, 2 & 7 were the first three...

The FBI has a section on their website called [Ten Most Wanted](#). There you can see Usama bin Laden on the top right. But if you read through what he is being accused of – you will find **nothing** about the attacks on September 11.

The lady at the FBI's central switchboard told me "maybe it hasn't been posted yet". Independent journalist Ed Haas of [The Muckraker Report](#) also called. He got the following answer "he [Osama] has not been formally indicted and charged in connection with 9/11 because the FBI has **no hard evidence** connecting bin laden to 9/11".

We all know by now that Saddam Hussein did not have weapons of mass destruction – or any connection to the 9/11 attacks – the White House [admits](#) this.

So if neither Saddam Hussein nor Usama bin Laden was behind the attacks on September 11, 2001 - **who were?**

World Trade Center 1 & 2 and 7

A compilation of video clips from amateur as well as mainstream news sources.

North Tower (WTC 1)

[#1](#)

World Trade Center - North Tower 'Collapse'

Unknown news footage: This clip really shows the enormous force used to blow this building up. Note the way hundreds of thousand tons of concrete and massive steel beams are being thrown like confetti more than 100 meters to the sides and UP in an arch away from the tower. Hardly a 'pancake collapse'...

Source [Video Google](#)

[#2](#)

This is live CNN footage from september 11 2001. Note the way hundreds of thousand of tons of concrete and massive steel beams being thrown like confetti more than 100 meters to the sides and UP in an arch away from the tower, as it **explodes**. Or do you still believe it 'collapsed'.

Source [Video Google](#)

[#3](#)

World Trade Center - North Tower 'Collapse'

This footage was recorded by Rick Siegel as he was filming from across the Hudson River. Note how fast it comes down. The Twin Towers were 417 meters tall - 63,5 x 63,5 meters wide and were more or less pulverized in approximately 12 seconds. Critics claim this is almost free fall speed. That would mean zero(0) resistance from the buildings own steel and concrete structure on the way down. But the towers were supported by a core of 47 massive steel beams and 236 on the outer sides.

[#4](#)

World Trade Center - North Tower 'Collapse'

The Twin Towers were 417 meters tall - 63,5 x 63,5 meters wide and were more or less pulverized in approximately 12 seconds. You can see hundreds of thousand tons of concrete and massive steel beams being trown like confetti hundres of meters up and to the sides, as

the Twin Towers are being pulverized. Not only one of them, but both. **Totally**, from top to bottom. Hardly a 'pancake collapse'.

[#5](#)

World Trade Center - North Tower 'Collapse'

German News Footage. Note how it all starts. It looks like the antenna drops first. The very top of the roof starts off. Then followed by the horizontal explosions as it's being pushed downwards, by an unknown undescrivable force...

Source [Video Google](#)

[#6](#)

World Trade Center - North Tower 'Collapse'

Good quality amateur footage. Showing the mushroom shaped explosion of the South Tower. Note the force of the concrete and massive steel beams being thrown 100s of meters to the sides and UP in an arch.

[#7](#)

World Trade Center - North Tower 'Collapse'

9/11 Demolition Analysis of the North Tower Looking at the north west corner of world trade center 1. This short clip was made to show part of the mechanics of the demolition of the north tower (WTC1). Both sides of the corner are strategically targetted, almost like undoing a zipper!

[#8](#) **World Trade Center - North Tower 'Collapse'**

CNN Live News footage from 11 september 2001. It really shows the enormous force used to blow up this building. Note how fast it comes down. The Twin Towers were 417 meters tall - 63,5 x 63,5 meters wide and were more or less pulverized in approximately 12 seconds.

Source [Video Google](#)

[#9](#)

World Trade Center - North Tower 'Collapse'

Seldom seen ABC News footage taken from just below as the South Tower (WTC 2) comes down. Both towers were pulverized in approximately 12 seconds. Critics claim this is almost free fall speed. That would mean zero(0) resistance from the buildings own steel and concrete structure on the way down. But the towers were supported by a core of 47 massive steel beams and 236 on the outer sides. So this was hardly possible without the use of some kind of explosives or high-tech weaponry.

South Tower (WTC 2)

[#1](#)

World Trade Center - South Tower 'Collapse'

Amateur footage. Close up and collapse of WTC 1 - The South Tower. You clearly see the plausible use of thermite in order to weaken the structure, and how it then sags inwards just before the collapse/implosion/explosion/demolition or whatever we shall name it...

Source: [Camera Planet](#)

[#2](#) World Trade Center - South Tower 'Collapse'

Amateur footage: Shot from a short distance to the WTC -front of Trinity Church. It gives you a clear view of the structure as it sags and lean inwards just before it come to the ground. The camera continues to roll as the people start running away to safety.

Source: [Camera Planet](#)

[#3](#)

World Trade Center - South Tower 'Collapse'

Amateur footage: This video begins with close up - revealing what happened to the structure just before it exploded. Note the enormous heat burning like welding or molten metal, pouring down along the side You also hear the spectators reaction as the South Tower eventually comes down.

Source: [Camera Planet](#)

[#4](#)

World Trade Center - South Tower 'Collapse'

Amateur footage taken by Brandon Marcus. New angle showing tons and tons of concrete and steel slamming down on the streets. It give you perspective of the enormous amount of mass that was exploding and burying everything underneath.

World Trade Center – South Tower ‘Collapse’

Peter Jennings & Don Dahler reporting live from **ABC News** 11 september 2001. Listen to both of them referring to controlled demolition as they try to describe what they just witnessed.

Don Dahler: Yes Peter its Don Dahler down here. I’m 4 blocks North of the World Trade Center. The second building that was hit by the plane ... all » has just completely collapsed. The entire building has just collapsed as if a demolition team setoff (pause) when you see the old demolition of these old buildings. It just folded in on itself and it is not there anymore...

Peter Jennings: If you wish to bring, if anyone has ever watched a building being demolished on purpose knows, that you’re going to do this you have to get at the, at the under infrastructure of a building and bring it down... Thanks Don very much. Umm, just looking at that, I don’t know why but when was the last time the United States was attacked in this fashion, it was Pearl Harbour in 1941.
