*Guest is **Dr. Ariyana Love**, a Naturopathic Doctor & Investigative Journalist. Her elder son was vaccine injured at age two and diagnosed with High Functioning Autism at age 7. She applied her knowledge of Naturopathic Medicine and designed a dietary protocol that resulted in a near total reversal of her son’s debilitating symptoms. In 2017, she was awarded the official title of Goodwill Ambassador to Palestine via the Palestinian Authorities.*

In this session, she talks about Covid-19 vaccine-patents and how they’re able to target and permanently delete genetic codes on genetic lineages in humans, and also encode new genetic sequences into the genome of targeted cells – about the role of gene-deletion in Autism or AIDS. Further, she discusses about the 115 different animal venoms contained within the “spike protein” (“Glycoprotein S”) and about the transmissibility of this bioweapon using graphene oxide nanoparticles as vectors. “They are not using viruses in any vaccines. It’s always been deadly bacteria extractions, like E. coli, to create lab generated Mycoplasmas and this is the root cause of all chronic illness.”
