“capsid is **the protein shell of a virus, enclosing its genetic material**”.

*Absolutely bombshell and major reveals on what is in the vaccines, with use of electron and other kinds of microscopy from original research by **Dr. Robert Young** and his team, confirming what the La Quinta Columna researchers found — toxic nanometallic content with cytotoxic and genotoxic effects as well as an identified parasite.*

This is major revelation. Please stay tuned for a major article reporting this at ECC. Meanwhile please share this video widely!
