March 2021 began with a mix indiscriminate air strikes by Saudi Arabia, of incredible Houthi activity, and calls for them to halt their attacks, which testifies to their efficacy.

This new round of hostilities is a kind of common occurrence in the Middle East, as the standoff between Iran and the U.S. and its allies appears to be ramping up.

Starting from March 2nd, Ansar Allah, or as they are more colloquially known – the Houthis have been launching steadily increasing waves of suicides drones and missiles on various locations in eastern and southern Saudi Arabia.

It all began with a single Qasef 2K drone being used to target the Abha Airport. On the very next day, to claim that no damage had been done, Riyadh released a video showing that the drone had been intercepted.

There was a short lull in activity, with the intensity of attacks increasing again on March 5th. Several attacks happened all in the same day. Initially, the Houthis targeted the Abha Airport and the King Khalid Airbase with 3 Sammad-3 drones and a Qasef 2k drone. Then, again, Ansar Allah targeted the King Khalid Airbase with 5 Qasef 2k drones.

On the next day the attacks continued, with the Houthis targeting the King Khalid Airbase with a Sammad-3 drone.

On March 7th, the Houthis went even further and targeted the Jeddah Airport with several drones.

Later on the same day, Houthi spokesman Brig. Gen. Yahya Sari said that a total of 14 suicide drones and six missiles were used in the operation codenamed "Deterrent Balance 6."

Ten Samad-3 suicide drones and a Zulfiqar ballistic missile were launched at one of Saudi Arabia's major oil ports, Ras Tanura, on the Persian Gulf.

The Houthis also launched 4 Qasef-2K suicide drones and six Badir artillery rockets at targets in the southern Saudi provinces of 'Asir and Jizan.

The Saudi-led coalition announced the interception of only two missiles, meaning that the Houthis could consider the operation as a success.

This level of activity from the Houthis has been unseen in recent months, and the group appears to be making progress. In response, Saudi Arabia also began carrying out airstrikes with an intensity that has been absent for a while.

Saudi-led coalition warplanes carried out a series of powerful airstrikes on the Yemeni capital, of Sanaa, and other areas held by the Houthis. Despite the attempt at a Saudi counter-offensive, the Houthis seem undeterred and the attacks are ramping up.

Riyadh, a typical US ally, and an enemy of the Iran-led Axis of Resistance is struggling in the fight, and Houthi raids are likely to increase in the upcoming days and weeks.
