*Guest is **Jeannette Bahr**, a graduate biomathematician, been in science and research for 20 years and in the health care for 30 years. Formerly a scientist at the University Medicine Greifswald (UMG).*

This session is about what she experienced when she raised concerns while working at the Greifswald University Medical Center.

She pointed out inconsistencies in the PCR tests used and criticized the lack of validation of laboratory results. She also views the modeling of the virus sequence stated critically:

“RNA code of SARS-CoV-2 is based on computer simulation using algorithms/mathematical models.”

- Conducted an independent analysis of the mRNA vaccine licensure trials that greatly concerned her and led her to express her concern for human health to the public. As a result, she was given extraordinary notice of termination by the UMG.

Pages: 164, 15 Chapters

Price: \$11.50

[Purchase directly from the Global Research Online Store!](#)

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
