Transcript. Translated from German

Kla.TV: Peter König worked as an economist at the World Bank for over 30 years and has implemented water projects in developing countries on various continents. I am pleased to welcome Peter König to Kla.TV. Can you tell us something about your current job?

Peter Koenig: First: Thank you for allowing me to be with you and speak to you. I am an economist and geopolitical analyst and try as best as possible to reflect the ever-changing "today's"/ resp. to analyze "tomorrow's" situations. In other words, to connect the dots: the dots between Covid, the Ukraine war, the reset, the QR code that is becoming more and more obtrusive, the planned "Fourth Industrial Revolution" by Klaus Schwab.

This includes the plan to digitize everything including the human brain etc etc. So there are a lot of dots that can and must be connected in order to understand what is going on and what is planned. We have to know that in principle nothing is and remains stagnant, except for the big goal at the moment: The Great Reset, UN Agenda 2030, and the 4th Industrial Revolution. These are different descriptions for the same goal. You have to know that. They may have been made that way to confuse. But in principle it's the same.

Kla.TV: How would you describe the current financial situation? For the average consumer, everything is still - yes - pretty much in balance. He's actually still doing pretty well.

**PK:** Yes, that's right. The average Joe living in Switzerland is relatively well off. But here in Switzerland, too, poverty has increased, and considerably so. Only here in Switzerland we don't talk about it. It is taboo to be poor. The official unemployment figures in Switzerland in May this year were 2.1%, in April it was 2.3%, while at the end of December last year it was almost 5%. In my opinion, these figures are greatly manipulated. It's the same everywhere in the West, by the way.

One would also need to know the unemployment criteria: what is classified and considered as unemployment? How is day work, part-time work assessed? How are the different "classes" of jobs - construction work, clerical work, managerial/elite work, etc. - how are they included in the statistics? They're not uniform. And I suppose I'm assuming that's not being said either - these analyzes are available, that's quite clear (in the statistics) - but they're never published. And I wouldn't be at all surprised if a lot of people today had to deal with part-time work and were classified as full-time employees.

In 2020 - the last number you can find openly - it was officially 8.5% of the people who were poor. How is poverty defined? A family of four with an income of less than 4,000 francs a month is poor in Switzerland. However, this criterion is not officially applied in Switzerland. Unofficially yes. But there is, I think, only in the canton of Geneva - recently - CHF 4,400 was named as an official poverty threshold number.

Kla.TV : You say that we are in the final phase of a demonic plan. They set this with the UN Agenda 2030, the so-called 'Great Reset' or the '4. Industrial Revolution'; they are the

same. Can you tell us what you think are the goals of this plan or of the 'Great Reset'?

**PK** : Yes, I would like to say very briefly as an introduction: The entire 'Great Reset' - the Ukraine war, by the way, is an integral part of it. You just don't notice it. The war is typically another... - a divider of people. True, war can never be justified, nor any kind of killing. But one can explain how it came to this: The constant provocation of NATO, which opposed the promise of the Allies "Not One Inch Further East than Berlin" at the time of the collapse of the Soviet Union - that was what the US Secretary of State, then James Baker, said and actually promised. And nobody respected that.

On the other hand, if you mention even a half-hearted argument for Putin, you are a frowned upon and hated as a Putin lover. There are even Swiss officers who did that, who worked in Ukraine, who were in NATO and see the matter clearly. That's what they said. They are now censored. Imagine that. This is also known as "divide and conquer". The media play a powerful role in indoctrinating the population with lies practically 24 x 7 and for the last - more than two years - they have been very successful. They are literally subsidized with billions, these lies. So that means the media were and are "subsidized", or rather corrupted.

In short, what the West, especially the United States, has always wanted is control of the largest and richest country in the world, Russia. With by far the most mineral resources in the world. All natural resources that the West needs, not least for their war industry. The "rare earths". So these are metals that are used primarily in electronics. The biggest consumer in electronics is the war industry and of course our western luxury lifestyle. In order to maintain that, we also need these raw materials, which can mainly be supplied by Russia and China.

In my view, the 'Great Reset' has three equal and devastating but related goals:

First: depopulation: That means massive depopulation. The eugenists are at work.

That was a plan of the 'Club of Rome' 50 years ago. And it was clearly stated in their report "Limit to Growth" from 1972. It was also part of the basis for the first formulations for the European Union.

Covid-19 was the targeted and psychologically sophisticated method of intimidation with a virus that you don't see, of course, that never existed as such.

A new virus that has never been identified. It is flu-like and has a mortality rate roughly equal to that of the annual flu. About 0.07 to 0.1 percent of infections.

And this applies above all to older people who are already suffering from other comorbidities. But the fear mongering has caused that, mostly under pressure and blackmail, between 60 and 80% of the western population let themselves be "vaccinated".

And so I put "vaccination" in quotation marks, because it's not a vaccination. And that's why I prefer to call it, they got vaxxed.

With a substance or substances containing genetically alterable components mRNA plus various toxins, like graphene oxide that cause serious diseases like heart failure , various types of cancer , kidney failure and so on. And in many cases, as we have seen, they are

obviously fatal.

In fact, far more people have died from the effects of the so-called vaccination than from the effects of Covid. In addition, there is not one vaccination, there are different injections with different biochemical compositions. And we have to keep this in mind: There isn't just one vaccine, one type of chemical that's injected, there are different ones. I think to remember that real scientists once pointed out that there are at least five different species. But probably even more. And some of them are used in a targeted manner in certain countries and certain societies. So fear is the enemy's greatest and strongest weapon, we must always keep that in mind.

Second: So the second reason behind this trilogy is the shift of private and public-private capital, i.e. the combination of public and private, from the bottom and the middle to the top.

Through artificially created economic crises, bankruptcies, etc., capital is shifted from below and from the middle up to a relatively thin layer of control-seeking, I would even call them criminal elites.

One can also call these groups a cult. And I actually think they live by certain cult standards. In the cults, certain habits and certain groups of people are classified as a cult because they have to follow these norms in order to be successful.

According to Forbes, the economics analyst, there were 2,668 billionaires on April 5 of this year (2022).

An Elon Musk is apparently number one with 219 billion.

You can clearly see that while the world population has become poorer, the wealth of the rich and especially the super-rich has multiplied. Bill Gates' wealth, just one example, has increased from \$96 billion in 2019 to \$129 billion this April (note: 2022). That's about 34 percent more.

While he is partially responsible for this plandemic - I call it a plandemic because it wasn't a pandemic but a planned pandemic - for which he is responsible, for tens and tens of thousands of vaxx deaths.

Then there are the financial companies like BlackRock, Vanguard, State Street and also Fidelity and many others. And most importantly, the top three intertwined co-shareholders BlackRock, Vanguard and State Street are estimated to control somewhere between US\$20 and US\$25 trillion (1 trillion = 1 with 12 zeros).

They have leverage power of over \$100 trillion. In contrast, the world gross national product is about US\$ 95 trillion, that was at the end of last year (note: 2021). And with that power, they can coerce and blackmail literally any country, any government, any society. And we've seen that before. Those who do not participate are so-called "neutralized". There are quite a few of them, especially in Africa.

These are people, behind BlackRock, Vanguard, State Street et al - along with other billionaires - that you can in good conscience - I would say, call sick. That's why they, who have such capital powers at their disposal, have to control people. But actually - we can't imagine that, at least I can't - what that can do for you.

This is the state of the world today and we are only at the beginning of the 2030 Agenda. As long as people, the majority of people, suffer from what is called cognitive dissonance, we will continue to be dominated and manipulated until it comes to the next step. And so far this has been true. There are so many people, psychologists say, that this kind of affection, you can call it a disease, which is called cognitive dissonance, is one of the worst psychologically because it's almost impossible to get rid of.

Kla.TV : What do you think is the next step then?

PK: This is precisely the third item in this diabolical trilogy, the 'Reset'. This is total digitization. Money, people, surveillance and control of everything. Humans become

transhumans.

Klaus Schwab even said that in an

interview on Swiss French television in 2016.

On top of that, we have the so-called QR-code. QR stands for "Quick Response". And the associated technology that allows storing at least 30,000 data of each individual- up to now, and that can be increased. What and where you are, buy, where you go, who you circulate with, who you talk to, your health status, your bank account, your police report - everything, everything, is being watched and recorded.

The most important tool for full digitization is 5G. That's why we already find antennas everywhere. And 5G is already active in certain cantons. I was in Ticino the other day and my phone already showed 5G. Not yet here in the Geneva area. And 6G will probably come soon. Because the only reason, by far the biggest reason for this is the digitization of everything and above all of people.

So: the QR code and the so-called VC derived from it - i.e. the "vaccine code" or "vaccine certificate code" ("vaccination certificate" in English) are the most dangerous thing that threatens us, what we face if we do nothing do about it. Because that means total surveillance. And once we're there, it's very, very difficult to get out of there.

Kla.TV: But let me tell you: the QR code is now an integral part of everyday life. We have that everywhere. And you see it as the most dangerous thing that can happen to us. Can you describe the danger of this QR code in a little more detail?

PK: We can even be condemned to starvation via the QR code. How so?

To do this, the QR code - or its successor, whatever it is called - has to be implanted in

people in some way. And that's what Klaus Schwab said back then in this short interview with Swiss-French television in Geneva, and that six years ago - he said: In about 2025, we will all have a chip either in our clothes or under our skin. Well, that was, maybe that's his dream, I hope it doesn't come to that, but he already announced it.

And so we're in an electro-... we become an electromagnetic field. We people. There are already test groups in Sweden, volunteer test groups, who have implanted a chip in their hand, about the size of a grain of rice. At the moment, as I said, these are only volunteers who are involved. And so they need this code, i.e. this chip, mainly for digital payment transactions. But they can of course be expanded. Their potential is practically unlimited.

This is the basis for the QR-code, implanted into your body, and manipulable via 5G, or later 6G. One can easily imagine that someone who doesn't live conform to the systems / the dictatorship's requirements will be excluded from the payment system. That could mean, the person would not be able to buy food. The perso's digital bank account may also be blocked, including the money in the account.

The west is doing this routinely - maybe less with individuals, but with countries that dare not living up to the demands of the US empire. Europe, especially NATO countries usually follow suit stealing other countries' assets. Mind you, this is totally illegal under international law. But nobody even cares anymore about international law.

Among the most sanctioned countries are Russia, China, North Korea, Iran, Venezuela, Syria - and many others.

[See also this on 5G.](#)

Kla.TV : Mr König, you said that everyone now has a QR code, how do you understand that?

**PK:** Yes, well I'm assuming that everyone has at some point paid an invoice with a QR code on it. Even if you don't need it to pay the bill, you still have associated your name, i.e. your own name, with this QR code and paid the bill, because that is an integral part of the payment slip that you use via the Bank paid or paid at post office counter.

But more importantly, probably all of us - or almost all of us I'm assuming - have done a PCR test, either because we wanted to travel or because we wanted to go to a theater somewhere, or something... In the last two years you could yes hardly go to a restaurant or in many restaurants you could not go at all around here without either being vaccinated or having a QR test. Then. everyone who has a PCR test, has a QR code, and a personal QR code at that.

This personal QR code, which is then just spread over or further used via an app on your cell

phone. And this app is of course connected to a control center, we can't do anything about it. The mobile phones are all already set up in such a way that they can be accessed from anywhere, even if you turn off the GPS, they know exactly where we are and what we do. If you don't want this control, you literally have to throw your phone away. Or leave it at home. Very few people are willing to do that.

But apart from that: at some point you need this cellphone again and then you are connected to it, and if you just like I said, we talked about the injection that contains graphene oxide and graphene oxide is very, very electromagnetic. That's the substance that's needed, probably one of the substances, maybe the most important, that's needed to manipulate us with 5G. It may be soon. I don't know when that will happen, but it certainly can... maybe it's already started for certain people.

And then when that happens, the graphene oxide injection, we've practically got this substance of a QR code already built into our system. That's how it works. And we can't do anything about it, we don't even know anymore. Most people... - I suppose very few people know that they have been vaccinated with a vaccine, so-called vaccine, which consists of graphene oxide, a highly magnetizable and electronically manipulable substance, very few people know that.

And that's why they don't even know that they probably already carry their QR code somewhere in their body. And those who haven't done it yet have it on their cell phones. And we have to do something about that. There are people, there are effectively people, who say: We should try to go back in time, not to use cell phones anymore.

The smart phone has been gradually and persistently - and ever more persistently, infiltrated into our lives that we cannot imagine a life, especially the younger people, the younger generation, without this cellphone at all can no longer imagine. Most people find this QR code great. When I talk to people, especially younger people, they think it is superb, because you use it to pay a bill in the supermarket or restaurant directly with your phone, just swipe it by a cashier's device - and bingo, the bill is paid. They have absolutely no idea what the aim is, no idea at all, and they don't want to listen either. I'm a weirdo. I'm sorry, this is unfortunately our world today.

The digitized way of life, is driven into our brains with a flagrantly sophisticated lie-propaganda. When you know how much even the Swiss government, subsidized the media, or corrupts the media, it sounds unbelievable. The amount per capita in Switzerland - we only have 8.4 million inhabitants - is significantly higher than in the USA. A figure that has circulated is 1.7 billion Swiss francs (about the same in US dollars) over a period of 2 or 3 years. Just so, that the media say what the Swiss government and very likely WHO and the WEF wants them to say.

Kla.TV : Would that be the transformation from "human" to "transhuman", as Klaus Schwab had specified somewhere or was also prescribed or advertised by his diabolical top advisor, the author and historian Yuval Noah Harari? Harari talks about how "humans" will be hacked in the future...?

**PK:** Harari literally calls us humans "animals that can be hacked". Those are his words, meaning "animals that can be hacked". "Hacked" in the sense of "electronically infiltrated" and can be manipulated. "Animals that can be hacked" are us.

I'm assuming that this arrogant kind of impudence from Harari was exploited by Klaus Schwab, probably even encouraged, to scare people. The first motto of avoidance, of resistance, is not to be afraid – NEVER.

I've said that before and I'll keep repeating it. Have no fear. Fear is their greatest weapon. That's the worst. In other words, many of those who have already been vaccinated, i.e. the so-called vaccinated, have had graphene oxide injected. And graphene oxide works very well as an electromagnetic field through which one may be manipulated.

And already with this manipulation a certain transhumanism is present. Most people don't even know that. With 5G you can easily make remote-controlled transhumans out of it. That would be the total enslavement of the survivors; those who have just survived the reduction

in world population. From my point of view, this would be a life no longer worth living, but we would probably hardly notice it, because we are under the spell of artificial intelligence (AI) [= artificial intelligence (AI)], algorithms or just as Klaus Schwab called it “You will own nothing but be happy.”

The dark cabal or cult's goal as I like to call it, to reach this point by 2030, upon fulfillment, after the implementation of the UN Agenda 2030 – so there are still 8 years to go – or also with the fulfillment of the 'Great Reset', or the fulfillment of the '4. Industrial Revolution'. As already mentioned, these are goals that are identical in the three synonymous programs, the terminologies are just different in order to confuse us.

Kla.TV: Yes, do you see a possibility that these goals of total enslavement can still be prevented?

PK: Yes, there is still a lot missing, providing time to really wake people up, to wake up the majority. But it has to come to that. It is impossible for nature to be intimidated by such people — I can hardly call them people anymore, they are no longer humane.

So: take consciousness to a higher level to avoid the manipulation of the dark cult. That's a priority.

In order to do that, we must-so I repeat-we must not be afraid. We must accept the acknowledgment of the lie that we have probably been exposed to for a lifetime. Because that is the power for overcoming of the so-called cognitive dissonance.

And very important, very important, we must not feel or express hatred towards these perpetrators. Because if we do that – that's basically what they want, if they scare us or intimidate us, then their aim is to cause hatred. Then we sit down on the same deep level as they are themselves. We're not allowed to.

So according to the motto – “We shall overcome” – we will master the situation – WITHOUT FEAR, I repeat again, WITHOUT FEAR, live towards the light and decide in peace for

humanity. And so we can – I am convinced – save ourselves.

Kla.TV : Yes, Peter König, thank you very much for the interview. Thank you for taking the time. And yes, we will overcome together. Many Thanks.

Peter König : Nothing to thank for. I am grateful to you for letting me speak on your program and hopefully this message will reach some who are willing to get involved – also get involved spiritually. Many Thanks.
