This incisive article by award winning author Manlio Dinucci was first published in May 2019

The decision by the United States to exit the Iranian nuclear agreement – signed in 2015 by Teheran with the five permanent members of the UN Security Council plus Germany – causes a situation of extreme danger not only in the Middle East.

To understand the implications of such decision, taken under pressure by Israel that describes the agreement as “the surrender of the West to the axis of evil led by Iran”, we must start from a precise fact: Israel has the Bomb, not Iran.

For over fifty years, Israel has been producing nuclear weapons at the Dimona plant, built with the help mainly of France and the United States. It is not subject to inspections because Israel, the only nuclear power in the Middle East, does not adhere to the Nuclear Non-Proliferation Treaty, which Iran signed fifty years ago.

The evidence that Israel produces nuclear weapons was revealed more than thirty years ago by Mordechai Vanunu, who had worked in the Dimona plant: published by The Sunday Times on October 5, 1986, after being screened by leading nuclear weapons experts. Vanunu, kidnapped by the Mossad in Rome and transported to Israel, was sentenced to 18 years of hard jail time and, after being released in 2004, subject to severe restrictions.

Mordechai Vanunu: The Sunday Times articles

The Sunday Times' Insight Team was the first to reveal Israel's nuclear secrets to the world after the paper published leaks from Morechai Vanunu. Here is how the newspaper chronicled the story, from Vanunu's original claims, to how he was captured.

Sunday October 5, 1986: Headline: Revealed - the secrets of Israel's nuclear arsenal/ Atomic technician Mordechai Vanunu reveals secret weapons production

THE SECRETS of a subterranean factory engaged in the manufacture of Israeli nuclear weapons have been uncovered by The Sunday Times Insight team.

Hidden beneath the Negev desert, the factory has been producing atomic warheads for the last 20 years. Now it has almost certainly begun manufacturing thermo-nuclear weapons, with yields big enough to destroy entire cities.

Israel has today (though without admitting it) an arsenal estimated at 100-400 nuclear weapons, including new generation mini-nukes and neutron bombs, and produces plutonium and tritium in such quantities as to build hundreds more.

The Israeli nuclear warheads are ready to launch on ballistic missiles, such as the Jericho 3, and on F-15 and F-16 fighter bombers supplied by the USA, to which the F-35 are now added.

As confirmed by the numerous IAEA inspections, Iran has no nuclear weapons and commits not to produce them, according to the agreement under strict international control.

However - writes former US Secretary of State Colin Powell on March 3, 2015 in an email that has come to light -

"the boys in Tehran know Israel has 200 nuclear weapons, all targeted on Tehran, and we have thousands".

The US European allies, which formally continue to support the agreement with Iran, are basically aligned with Israel. Germany supplied Israel with six Dolphin submarines, modified so as to launch nuclear cruise missiles, and approved the supply of three more.

Germany, France, Italy, Greece and Poland participated, with the USA, in the Blue Flag 2017, the largest international aerial warfare exercise in Israel's history. Italy, linked to Israel by a military cooperation agreement (Law No. 94, 2005), participated in the exercise with

Tornado fighters of the 6th Wing of Ghedi, assigned to carry US B-61 nuclear bombs (which will soon be replaced by B61-12). The US participated with F-16 fighters of the 31st Fighter Wing of Aviano, assigned to the same function.

The Israeli nuclear forces are integrated into the NATO electronic system, within the framework of the “Individual Cooperation Program” with Israel, a country which, although not a member of the Alliance, has a permanent mission to NATO headquarters in Brussels.

According to the plan tested in the US-Israel Juniper Cobra 2018 exercise, US and NATO forces would come from Europe (especially from the bases in Italy) to support Israel in a war against Iran. It could start with an Israeli attack on Iranian nuclear facilities, like the one carried out in 1981 on Osiraq nuclear reactor in Iraq. In the event of Iranian retaliation, Israel could use a nuclear weapon by starting a chain reaction with unpredictable outcomes.

Reviews

“This book is a ‘must’ resource – a richly documented and systematic diagnosis of the supremely pathological geo-strategic planning of US wars since ‘9-11’ against non-nuclear countries to seize their oil fields and resources under cover of ‘freedom and democracy’.”

–John McMurtry, Professor of Philosophy, Guelph University

“In a world where engineered, pre-emptive, or more fashionably “humanitarian” wars of aggression have become the norm, this challenging book may be our final wake-up call.”

–Denis Halliday, Former Assistant Secretary General of the United Nations

Michel Chossudovsky exposes the insanity of our privatized war machine. Iran is being targeted with nuclear weapons as part of a war agenda built on distortions and lies for the purpose of private profit. The real aims are oil, financial hegemony and global control. The price could be nuclear holocaust. When weapons become the hottest export of the world’s only superpower, and diplomats work as salesmen for the defense industry, the whole world is recklessly endangered. If we must have a military, it belongs entirely in the public sector. No one should profit from mass death and destruction.

–Ellen Brown, author of ‘Web of Debt’ and president of the Public Banking Institute
