Dr. Annie Bukacek is a longtime Montana physician with over 30 years experience practicing medicine. Signing death certificates is a routine part of her job.

In this brief video, Dr. Bukacek blows the whistle on the way **the CDC is instructing physicians to exaggerate COVID-19 deaths on death certificates.**

Watch the video below and read an excerpt of her speech.

Draft Transcript

“At a time where telling the truth is considered a threat to the national security, we’re very blessed to have a pastor who tells us the truth. We are blessed beyond measure. ...”

“The decision for unprecedented government-mandated lockdown has been based on the alleged death rate of COVID-19. Is this death rate based on truth? ...”

“Are the reported deaths from COVID-19 truly deaths from COVID-19?”

To address this question, we need to discuss death certificates since death certificates are the basic source of information about mortality. ...”

“History-changing decisions are being made due to these figures despite the fact that they are flat-out wrong based on data that is insufficient and often inaccurate. People know how much individual power and leeway is given to the physician coroner or medical examiner signing the death certificate. How do I know this? I’ve been filling out death certificates for over 30 years. More often than we want to admit, we don’t know with certainty the cause of death when we fill out death certificates. ...”

“Physicians make their best guesstimate and fill out the form then that listed cause of death, whatever we list, is entered into a vital records databank to use for statistical analysis which then gives out inaccurate numbers as you can imagine. Those inaccurate numbers are then accepted as factual information even though much of it is false. So even

before we heard of COVID-19, death certificates were based on assumptions and educated guesses that go unquestioned.”

“When it comes to COVID-19, there’s the additional data skewer that there is no universal definition of COVID-19 death.”

“The Center for Disease Control, updated from yesterday April 4th, still states that “mortality” data includes both confirmed and presumptive positive cases of COVID-19. ... The CDC counts both true COVID-19 cases and speculative guesses of COVID-19 the same, they call it death by COVID-19. They automatically overestimate the real death numbers by their own admission. ...”

“We need to understand how the CDC and the National Vital Statistics System are instructing physicians to fill out death certificates related to COVID-19. Brace yourselves, and please pay attention and let what I’m about to tell you sink in. The assumption of COVID-19 death could be made even without testing. Based on assumption alone, the death can be reported to the public as another COVID-19 casualty. The March 24, 2020 NVSS memo states

“The rules for coding and selection of the underlying cause of death are expected to result in COVID-19 being the underlying cause more often than not.” ...

“**Stephen Schwartz**, national director of the division of vital statistics, says an answer to the question as stated in the organization’s COVID-19 alert, “Should COVID-19 be reported on the death certificate only with a confirmed test?” Check out his answer,

“COVID-19 should be reported on the death certificate for all decedents where the disease caused or is assumed to have caused or contributed to death. Certifiers should include as much detail as possible based on their knowledge of the case, medical records, laboratory testing, etc.” ...

“If a patient is positive for COVID-19 and dies from another cause such as pneumococcal sepsis, it may be considered accurate to say that person died with COVID-19 not from COVID-19. Yet the CDC guideline lists this case as one more COVID-19 death and they go to the next questionable death, they label that as COVID-19 and it goes on and on. You could see how these statistics have been made to look scary when it is so easy to add false numbers to the official database. Those false numbers are sanctioned by the CDC as of their memo yesterday, April 4th. ...”

“The real number of COVID-19 deaths are not what most people are told and what they then think. How many people actually died from COVID-19 is anyone’s guess. ...”

“Based on inaccurate, incomplete data, people are being terrorized by fear-mongers into relinquishing freedoms.”

-Dr. Annie Bukacek
