"On December 15, about three weeks after her third Pfizer booster shot, Princess Bajrakitiyabha Narendira Debyavati collapsed with heart issues and went into a coma.

"The 44-year old eldest daughter of the King in Thailand, and likely heir to the throne, had reported to be in excellent health prior to the vaccination and collapse while [training her dogs](#).

The media seemed to generally lose interest after a January 9 update in which it was reported the princess remained in a coma and, according to the palace, has now been diagnosed with "severe heart arrhythmia resulting from inflammation following a mycoplasma infection.

One authority recently suggested that Thailand was preparing to declare its contracts for Pfizer vaccine "null and void" and go after the vaccine maker for damages.

Propagandists in the media have launched into overdrive to try to discredit such news, and to claim "no evidence" of a vaccine tie to the sudden illness of the princess (without mentioning that there is no evidence exonerating the vaccine, either).

Google and other Big Tech companies, as well as their "fact-checkers" have repeatedly disseminated disinformation and censored accurate information on Covid and vaccines on behalf of vaccine industry interests." ([Sheryl Attikson](#))

"One daughter of the present king Rama X collapsed and is in a coma... within 23 days after the third shot, 44 years old, never been seriously ill, collapsed and is now in a coma.

The diagnosis that was given by the authorities and by the university is so ridiculous - she's supposed to have a bacterial infection that will never do what she suffered from.

And so we are determined, and the activists in Thailand who have been on this many many months now - great guys, also a professor from the University of Bangkok, he's gotten in touch with the Royal Family, and we are sending information to the Royal Family to alert them to the fact that in all probability the princess is suffering as a victim of this jab, as so many people around the world have been suffering.

Sucharit Bhakdi, fmr. professor of microbiology at University of Mainz,

Is Pfizer in trouble with the Thai government over the Thai Princess' "vaccine injury"? ☐

Top Thai officials are pulling off their gloves against Pfizer Bio N Tech and could become the first country in the world to Nullify the contracts between the government and Pfizer.

Which would mean Pfizer would have to pay back billions of dollars because of their jabs to the Thai people.

Comment by Prof. Michel Chossudovsky

Our thoughts are with Thailand's Princess Bajrakitiyabha

A decision by Thailand to repeal its contractual relationship with Pfizer has to be carefully thought out. What we are dealing with on the part of Pfizer is a criminal endeavor applied Worldwide.

The Royal Thai Government should "nullify" its contracts with Pfizer, while contemplating a formal criminal legal procedure against Pfizer, (which incidentally already has a criminal record for fraudulent marketing with the US Department of Justice) (2009).

We are no longer in the realm of "fraudulent marketing".

The vaccine was launched in mid-December 2020. [A Confidential Report by Pfizer](#) released under Freedom of Information in October 2021, confirms unequivocally based on data recorded from mid-December 2020 to the end of February 2021 that the vaccine is a toxic substance resulting in mortality and morbidity.

The Report which is now in the public domaine. It should be consulted by the Royal Thai Government:

"Pfizer had already received more than 1,200 reports of deaths allegedly caused by the vaccine and tens of thousands of reported adverse events, including 23 cases of spontaneous abortions out of 270 pregnancies and more than 2,000 reports of cardiac disorders."

The evidence is overwhelming. The data compiled from mid-December 2020 to the end of

February 2021 unequivocally confirms “Manslaughter”. Based on that evidence, Pfizer had the responsibility to immediately cancel and withdraw the “vaccine”.

Pfizer’s Worldwide marketing of the Covid-19 Vaccine beyond February 28th, 2021, is no longer an “Act of Manslaughter”.

Murder as opposed to Manslaughter implies “Criminal Intent”.

Pfizer’s Covid 19 Vaccine constitutes a Criminal Act. From a legal standpoint it is an “Act of Murder” applied Worldwide to a target population of 8 billion people. It’s a multibillion dollar project.

What is contained in Pfizer’s “confidential” report is detailed evidence on the impacts of the “vaccine” on mortality and morbidity.

This data which emanates from the “Horse’s Mouth” can be used to confront as well as formulate criminal legal procedures against Pfizer.
