This was originally published in 2017. Of relevance to the ongoing World crisis.

Filmmaker Regis Tremblay states what few others dare to say.

Humanity is on the brink of extinction!

Nuclear power is not safe. 48 of America’s nuclear power plants are leaking and there is no way to get rid of nuclear waste. America’s reckless provocations of both Russia and China, two nuclear-armed countries, risk a nuclear holocaust from which no one survives. Climate change and global warming, if not mitigated immediately, will end the human experiment on earth sooner rather than later.

A shocking documentary that traces the origins of U.S. genocides, military interventions and wars from the 15th century when the white, colonial explorers first came to the Americas to the very present. American Exceptionalism, Manifest Destiny, and the right to claim the earth and its resources as their own are the beliefs that are the foundation of American foreign policy in the 21st Century that has humanity on the brink of extinction.

Dr. Helen Caldicott, Ray McGovern, Chris Hedges, Ann Wright, Peter Kusnick, Bill McKibben, David Vine and other activists, scholars, and authors explain and clarify the crisis and threats to life on the planet.

The only real hope lies in the result of the epic battle for humanity’s survival between two contrasting world views. On one side is the unipolar, capitalist world-domination by the U.S. enforced by the most lethal military the world has ever seen.

On the other side is a view held by Russia, China and the BRICS nations built on a multi-polar world based on respect, the sovereignty of all nations, international law, the equal value of all people, and cooperation.

So here we are. Humanity's epic battle for survival. An old paradigm based on white, colonial domination and empire versus the shared vision of others who are working for a peaceful world based on justice, international law and the prosperity of all people.

The only question is, will the crazed neocons in Washington, realizing they have lost, take the whole world down with them.

Reviews

"This book is a 'must' resource – a richly documented and systematic diagnosis of the supremely pathological geo-strategic planning of US wars since '9-11' against non-nuclear countries to seize their oil fields and resources under cover of 'freedom and democracy'."

–John McMurtry, Professor of Philosophy, Guelph University

"In a world where engineered, pre-emptive, or more fashionably "humanitarian" wars of

aggression have become the norm, this challenging book may be our final wake-up call.”
-Denis Halliday, Former Assistant Secretary General of the United Nations

Michel Chossudovsky exposes the insanity of our privatized war machine. Iran is being targeted with nuclear weapons as part of a war agenda built on distortions and lies for the purpose of private profit. The real aims are oil, financial hegemony and global control. The price could be nuclear holocaust. When weapons become the hottest export of the world’s only superpower, and diplomats work as salesmen for the defense industry, the whole world is recklessly endangered. If we must have a military, it belongs entirely in the public sector. No one should profit from mass death and destruction.
