*This one almost slipped through the net, hats off to Kentucky Rep. **Thomas Massie** for bringing it up on September 27*

*They were planning on filling lettuce that you buy in the supermarket with mRNA!*

The U.S. House of Representatives on Tuesday [passed an amendment](#) that would prohibit funding for transgenic edible vaccines — vaccines grown in genetically engineered plants for consumption by humans or animals.

The [amendment](#), introduced by **Rep. Thomas Massie** (R-Ky.) to the agricultural appropriations bill [H.R. 4368](#), would bar the U.S. Department of Agriculture (USDA) and the U.S. Food and Drug Administration (FDA) from funding the vaccines for fiscal year 2024. ([Childrens’ Health Defense](#))

Scientists, funded with your tax dollars, are trying to turn edible plants like lettuce and spinach into mRNA vaccine factories. It's dangerous to play God with our food. The House just passed my amendment to prohibit USDA funding of this research. [pic.twitter.com/XEyWGGZm5q](https://pic.twitter.com/XEyWGGZm5q)
