Reuters 30 June 2008

Jun. 13 – Japanese company Genepax presents its eco-friendly car that runs on nothing but water.

The car has an energy generator that extracts hydrogen from water that is poured into the car's tank. The generator then releases electrons that produce electric power to run the car. Genepax, the company that invented the technology, aims to collaborate with Japanese manufacturers to mass produce it.

SOUNDBITE: Kiyoshi Hirasawa, CEO, Genepax.
