Introduction by Colin Todhunter

Dr John Campbell in the UK says vitamin D is more effective than the jabs. It is certainly safer, and he presents several scientific studies that show conclusively it is highly effective in preventing COVID-related hospitalisation/death.

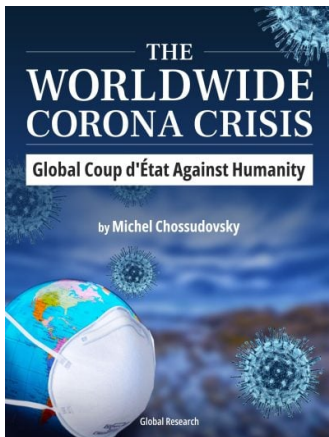

Instead of recommending vitamin D, it was dismissed. Because if proven alternative treatments had been available, the money-spinning jabs could not have been rolled out under emergency use authorisation. The public was locked down, told to wait for the jab and protect the NHS – for which the UK govt now shows utter contempt.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
