

War Propaganda and Canada's War for Terrorism in Syria

By [Mark Taliano](#)

Global Research, February 22, 2017

Region: [Canada, Middle East & North Africa](#)

Theme: [Media Disinformation](#), [Terrorism](#),
[US NATO War Agenda](#)

In-depth Report: [SYRIA](#)

A (criminal war propaganda[1]) article dated February 19, 2017, and published by [TheWeeklyNews.ca](#), entitled "[Canadian military planes flying over Syria](#)", speaks volumes through omission.

Brig.-Gen. Shane Brennan reportedly disclosed that Canadian aircraft have flown between 20 and 30 missions over Syria in recent months. He said "We have done work in Syria," and that "(t)here's lots of work to do in Iraq. We are looking at all of the areas."

The article omitted a few important "details". The seemingly casual reference to doing "work in Syria" indicates Canada's on-going support for the criminal U.S/NATO strategy - as outlined by Defense Intelligence Agency document 14-L-0552/DIA/287-293[2] - to use terrorists, including ISIS, to destroy the sovereign country of Syria and topple its legal government.

They used it all over Syria where these battles have been, but they also armed terrorists with depleted uranium weaponry. The whole country now, where the battles have been whether on battlefields or in urban regions, are all contaminated. And that has to be cleaned up before they rebuild the cities, parts of Damascus, almost all of Aleppo, and villages too[3].

The West also used depleted uranium ordnances in Iraq, so its willful use in Syria, is even more heinous. British Radiation expert **Dr. Chris Busby**, Fellow of the University of Liverpool in the Faculty of Medicine and UK representative on the European Committee on Radiation Risk, claims that, "by illegally using hundreds of tons of depleted uranium (DU) against Iraq, Britain and America have gravely endangered not only the Iraqis but the whole world," and that these weapons have released deadly, carcinogenic and mutagenic, radioactive particles in such abundance that-whipped up by sandstorms and carried on trade winds - there is no corner of the globe they cannot penetrate-including Britain.

For the wind has no boundaries and time is on their side: the radioactivity persists for over 4,500,000,000 years and can cause cancer, leukemia, brain damage, kidney failure, and extreme birth defects - killing millions of every age for centuries to come. A crime against humanity which may, in the eyes of historians, rank with the worst atrocities of all time.[4]

So, Canada's willful engagement in the pre-planned, criminal invasion of Syria - including the criminal sanctions - appears to be ramping up. And the fake MSM media, guilty on all counts of committing war propaganda, continues to aid and abet these crimes against Syria,

these crimes against international law, and these crimes against humanity.

Former high school teacher **Mark Taliano** is an author and independent investigative reporter who recently returned from a trip to Syria with the Third International Tour of Peace to Syria. In this book, he combines years of research with on-the-ground observations to present an informed and well-documented analysis that refutes mainstream media narratives about the dirty war on Syria.

****New Book: Voices from Syria****
