

Does the PCR Test Detect the Virus?

The Corona Simulation Machine: Why the Inventor of The “Corona Test” Would Have Warned Us Not To Use It To Detect A Virus

“Scientists are doing an awful lot of damage to the world in the name of helping it. I don’t mind attacking my own fraternity because I am ashamed of it.” -Kary Mullis, Inventor of Polymerase Chain Reaction

In the US, we have all but abandoned classical diagnostic medicine in favor of biotech, or lab result medicine. This has been going on for a long time and is a dangerous turning. The “Corona test” is named with characteristic tech-tedium: “CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel.” That means it is a needle in a DNA haystack test. A PCR test.

It finds fragments, nucleic acids. According to Nobel Laureate Dr. Kary Mullis inventor: “PCR detects a very small segment of the nucleic acid which is part of a virus itself. The specific fragment detected is determined by the somewhat arbitrary choice of DNA primers used which become the ends of the amplified fragment. “

Celia Farber (quoted from complete article)

What do we mean when we say somebody has ‘tested positive’ for the Corona Virus? The answer would astound you. But getting this “answer” is

like getting to a very rare mushroom that only grows above 200 feet on a Sequoia tree in the forbidden forest.

I say that for dramatic effect, but also because I wound up, against all odds, finding it.

Every day I wake up and work at shedding one more layer of ignorance —by listening carefully. I got lucky with scientists many years ago; Epic, incredible scientists, happening to cross my path when nobody else wanted to talk to them. Now their names are emerging, their warnings and corrections crystallizing. True “science” (the nature of the natural world) is never bad news. Globalist science is nothing but bad news.

How many of us are “infected” with this novel Corona virus, and how scared should we be?

People die—yes. But people don’t die at the mercy of malicious, predatory pathogens, “lurking” on every surface, and especially other humans. That’s not “science.” That’s social engineering. Terrorism.

Let’s proceed.

What do we mean when we say a person “tests positive” for Covid-19?

We don’t actually mean they have been found to “have” it.

We’ve been hijacked by our technologies, but left illiterate about what they actually mean. In this regard, I spent time with, and interviewed the inventor of the method used in the presently available Covid-19 tests, which is called RT-PCR, (Polymerase Chain Reaction.). His name is Kary B. Mullis, (image left) he passed away in August of last year. He was one of the warmest, funniest, most eclectic-minded people I ever met, in addition to being a staunch critic of HIV “science,” and an unlikely Nobel Laureate, i.e. a “genius.”

One time, in 1994, when I called to talk to him about how PCR was being weaponized to “prove,” almost a decade after it was asserted, that HIV caused AIDS, he actually came to tears.

The people who have taken *all* your freedoms away in recent weeks, they’re social engineers, politicians, globalist thought leaders, bankers, foundations, HO fanatics, and the like. Their army is composed of “mainstream media,” which is now literally a round-the-clock perfect propaganda machine in support of the so-called “Pandemic”.

Kary Mullis was a *scientist*. He never spoke like a globalist, and said once, memorably, when accused of making statements about HIV that could endanger lives: “I’m a scientist. I’m not a lifeguard.”

That’s a very important line in the sand. Somebody who goes around claiming they are “saving lives,” is a very dangerous animal, and you should run in the opposite direction when you encounter them.

Their weapon is fear, and their favorite word is “could.”

They entrap you with a form of bio-debt, creating simulations of every imaginable thing that

“could” happen, yet hasn’t.

Bill Gates has been waiting a long time for a virus with this much, as he put it, “pandemic potential.” But Gates has a problem, and it’s called PCR.

Of Mullis’ invention, Polymerase Chain Reaction, the *London Observer* wrote:

“Not since James Watt walked across Glasgow Green in 1765 and realized that the secondary steam condenser would transform steam power, an inspiration that set loose the industrial revolution, has a single, momentous idea been so well recorded in time and place.”

What does HIV have to do with Covid-19?

PCR played a central role in the HIV war (a war you don’t know about, that lasted 22 years, between Globalist post-modern HIV scientists and classical scientists.) The latter lost the war. Unless you count being correct as winning. The relentless violence finally silenced the opposition, and it seemed nobody would ever learn who these scientists were, or why they fought this thing so adamantly and passionately.

And PCR, though its inventor died last year, and isn’t here to address it, plays a central role in Corona terrorism.

Celia Farber is half Swedish, raised there, so she knows “socialism” from the inside. She has focused her writings on freedom and tyranny, with an early focus on the pharmaceutical industry and media abuses on human liberties. She has been under ferocious attack for her writings on HIV/AIDS, where she has worked to document the topic as a psychological operation, and rooted in fake science. She is a contributor to UncoverDC and The Epoch Times, and has in the past written for Harper’s, Esquire, Rolling Stone and more. Having been gravely injured in legacy media, she never wants to go back. She is the recipient of the Semmelweis International Society Clean Hands Award For Investigative Journalism, and was under such attack for her work, she briefly sought protection from the FBI and NYPD. She is the author of “Serious Adverse Events: An Uncensored History of AIDS,” and the editor of The Truth Barrier, an investigative and literary website. She co-hosts “The Whistleblower Newsroom” with Kristina Borjesson on PRN, Fridays at 10am.
