Washington is encouraging Russia to wipe out the US in a desperate act of self-preservation.

Russian lawmakers have completed an investigation into Washington’s military-related biological activities at laboratories across Ukraine on the basis of findings made public by Russia’s Radiation, Chemical and Biological Defense Troops over the past year.

Washington is working on a “universal” genetically engineered bioweapon designed to cause severe damage to enemies comparable to that of a “nuclear winter,” a Russian parliamentary commission investigating US biolabs in Ukraine has concluded.

“The United States aims to develop a universal genetically engineered biological weapon capable of infecting not only people, but animals as well as agricultural crops. Its use involves, among other things, the goal of inflicting large-scale and irreparable economic damage on the enemy,” the commission wrote in its final report.

“The covert and targeted use of such a weapon in anticipation of a positive inevitable direct military confrontation could create a significant advantage for US forces over the adversary, even against those who possess other types of weapons of mass destruction,” the commission added. “The possession of such highly effective biological weapons creates, in the view of the US military, the real prerequisites to change the nature of contemporary armed conflicts.”

The question is: what is Putin going to do? Is he going to sit on his butt as in Ukraine and let the threat to Russia widen, or will he decide to protect Russia from Washington?

At some point even a liberal Kremlin will realize that there is no mutual security to be had with a country committed to Russia’s destruction.

He is a contributor to the Encyclopedia Britannica. His writings have been translated into more than 20 languages.

Reviews

“This book is a ‘must’ resource – a richly documented and systematic diagnosis of the supremely pathological geo-strategic planning of US wars since ‘9-11’ against non-nuclear countries to seize their oil fields and resources under cover of ‘freedom and democracy’.”

–John McMurtry, Professor of Philosophy, Guelph University

“In a world where engineered, pre-emptive, or more fashionably “humanitarian” wars of aggression have become the norm, this challenging book may be our final wake-up call.”

-Denis Halliday, Former Assistant Secretary General of the United Nations

Michel Chossudovsky exposes the insanity of our privatized war machine. Iran is being targeted with nuclear weapons as part of a war agenda built on distortions and lies for the purpose of private profit. The real aims are oil, financial hegemony and global control. The price could be nuclear holocaust. When weapons become the hottest export of the world's only superpower, and diplomats work as salesmen for the defense industry, the whole world is recklessly endangered. If we must have a military, it belongs entirely in the public sector. No one should profit from mass death and destruction.

-Ellen Brown, author of 'Web of Debt' and president of the Public Banking Institute
