

Washington's Hegemonic Ambitions in Ukraine: Sleepwalking Again into A Destructive Conflict

In-depth Report: [UKRAINE REPORT](#)

On the 100th Anniversary of World War 1, the Western powers are again sleepwalking into destructive conflict. Hegemonic ambition has Washington interfering in the internal affairs of Ukraine, but developments seem to be moving beyond Washington's control.

Regime change in Ukraine for a mere \$5 billion dollars would be a bargain compared to the massive sums squandered in Iraq (\$3,000 billion), Afghanistan (\$3,000 billion), Somalia, and Libya, or the money Washington is wasting murdering people with drones in Pakistan and Yemen, or the money Washington has spent supporting al Qaeda in Syria, or the massive sums Washington has wasted surrounding Iran with 40 military bases and several fleets in the Persian Gulf in an effort to terrorize Iran into submission.

So far, in Washington's attempt at regime change in Ukraine large numbers of Americans are not being killed and maimed. Only Ukrainians are dying, all the better for Washington as the deaths are blamed on the Ukrainian government that the US has targeted for overthrow.

The problem with Washington's plot to overthrow the elected government of Ukraine and install its minions is twofold: The chosen US puppets have lost control of the protests to armed radical elements with historical links to nazism, and Russia regards an EU/NATO takeover of Ukraine as a strategic threat to Russian independence.

Washington overlooked that the financially viable part of today's Ukraine consists of historical Russian provinces in the east and south that the Soviet leadership merged into Ukraine in order to dilute the fascist elements in western Ukraine that fought for Adolf Hitler against the Soviet Union. It is these ultra-nationalist elements with nazi roots, not Washington's chosen puppets, who are now in charge of the armed rebellion in Western Ukraine.

If the democratically elected Ukraine government is overthrown, the eastern and southern parts would rejoin Russia. The western part would be looted by Western bankers and corporations, and the NATO Ukraine bases would be targeted by Russian Iskander missiles.

It would be a defeat for Washington and their gullible Ukrainian dupes to see half of the country return to Russia. To save face, Washington might provoke a great power confrontation, which could be the end of all of us.

My series of articles on the situation in Ukraine resulted in a number of interviews from Canada to Russia, with more scheduled. It also produced emotional rants from people of Ukrainian descent whose delusions are impenetrable by facts. Deranged Russophobes

dismissed as propaganda the easily verifiable report of Assistant Secretary of State Nuland's public address last December, in which she boasted that Washington had spent \$5 billion preparing Ukraine to be aligned with Washington's interests. Protest sympathizers claim that the intercepted telephone call between Nuland and the US Ambassador in Ukraine, in which the two US officials chose the government that would be installed following the coup, is a fake.

One person actually suggested that my position should be aligned with the "sincerity of the Kiev students," not with the facts.

Some Trekkers and Trekkies were more concerned that I used an improper title for Spock than they were with the prospect of great power confrontation. The point of my article flew off into space and missed planet Earth.

Spock's mental powers were the best weapon that Starship Enterprise had. Among my graduate school friends, Spock was known as Dr. Spock, because he was the cool, calm, and unemotional member of the crew who could diagnose the problem and save the situation.

There are no Spocks in the US or any Western government and certainly not among the Ukrainian protesters.

I have often wondered if Spock's Vulcan ancestry was Gene Roddenberry's way of underlining by contrast the fragility of human reason. In the context of modern military technology, is it possible for life to survive humanity's penchant for emotion to trump reason and for self-delusion to prevail over factual reality?
