

Weather Modification, Climate Engineering, Russia's "New" Super Speed (Mach 10) Multiple Warhead Missile "Oreshnik"

By [Peter Koenig](#)

In-depth Report: [Climate Change](#), [UKRAINE REPORT](#)

As we know, mostly everything is connected – things do not coincide just by chance.

Let's try to connect the dots.

Weather/climate engineering is now officially admitted at least by one meteorological agency, the Spanish AEMET (see reference below).

They say at least 70 countries around the globe possess this technology to a more or less sophisticated degree. The technology itself had been developed already since the 1940.

This explains the extreme flood Spain went through in the last weeks/months, it explains the extreme flooding in Arizona, and hurricanes and flooding in North Carolina, the devastating hurricanes/typhoons in South East Asia and more. Electromagnetic waves in geoengineering can even cause earthquakes.

The connection to the western climate change hoax becomes clear: it's done to make us, the "idiots", still believe the climate is changing because we use too much hydrocarbons, emitting too much CO₂. **They cannot fathom that we "idiots" know that CO₂ is equally important for our lives on earth, as is oxygen, and that, in fact, oxygen would not exist if there wasn't CO₂ - food for plants - being absorbed and transformed in a process called photosynthesis into oxygen.**

What does that have to do with the Russian missiles?

As people increasingly catch on to the western frauds and lies – and the empire is collapsing, there is no doubt, this empire will do whatever it takes to pull down into the abyss with it as much of the rest of the world as it can. Following the motto, as the empire must go – so must the masses of innocent people, their self-styled enemies like Russia and China – and they want their proxy war in Ukraine to grow into an all-destructive nuclear war, thinking that they the elite will save themselves in their bunkers prepared for years in New Zealand and other "secure" places. I kid you not.

Russia has developed state of the art weaponry – most of them tactical – causing a minimum of human damage, but destroying weapon manufacturing facilities and deposits, as well as vital infrastructure the west needs to carry on their wars with their killer-machine,

called NATO.

A few days ago, President Putin intimated to the west/NATO: “You want war, you can get war, but it will be over in 15 minutes.” (paraphrase, see analysis by [Drago Bosnic](#))

He was referring to the supersonic Oreshnik missile, remote-guided, can shoot from one NATO base to the next, drop its payload, finishing a number of NATO bases with high-energy non-nuclear, all-pulverizing tactical bombs; and that, before the west starts realizing what is happening.

After NATO, through Kiev, launched three American and UK/French-made long-range missiles deep into Russia, Putin launched a supersonic Oreshnik into Ukraine to destroy a weapon manufacturing plant and weapon depot. He called it a test run and a warning for things to come.

As you would expect, the overwhelming arrogance of the west, just laughed, and said Putin was bluffing, not to be impressed by his supersonic weapon that cannot be intercepted by ANY anti-missile system in the world.

Days ago, Russia issued a “notification” in English of what western military/NATO bases could be hit by 30 November. That was last Saturday. Maybe he will refrain from doing so, as long as NATO refrains from sending more long-range missiles into Russia.
