

WHO Announces Monkeypox Global Emergency: Corrupt Global Leaders Preparing for the Next Pandemic

An AFLDS Issue Brief for Citizens and Policymakers. DO NOT lock down; DO NOT inoculate; DO NOT FEAR.

On July 23, 2022, The World Health Organization declared monkeypox a global emergency of international health concern.[1] Back in May 2022, we brought you [AFLDS’ position on the monkeypox story](#). As suspected, the corrupt global leaders, working side-by-side with The World Health Organization (WHO) aren’t missing a beat in their quest for a perpetual worldwide pandemic. Regarding the decision to declare the “global emergency,” mainstream media reported:

WHO Director-General Tedros Adhanom Ghebreyesus made the decision despite a lack of consensus among experts on the U.N. health agency’s emergency committee, saying he acted as “a tiebreaker.” It was the first time a U.N. health agency chief has unilaterally made such a decision without an expert recommendation.[1]

This is proof of what we have stated before. Global leaders have been preparing for the next pandemic and the one after that. If everything goes according to plan, Covid Theater will now morph into Monkeypox Theater. Marburgvirus Theater is currently being developed in the background. You’ll most likely also be hearing about Ebola, a disease that presents similarly to Marburg. We expect to report more specifically on Marburgvirus appearance and preparations soon. In the meantime, remember, *We The People* are awake, and we see them working in the dark shadows.

An important piece of the puzzle is H.R. 4350 – National Defense Authorization Act for Fiscal Year 2022. If you download H.R. 4350 and word search “public health” you will be alarmed. H.R. 4350 is 3268 pages. Buried in those pages is a nefarious plan to use public health as a means of using the military to form a dictatorship over every agency in the executive branch of the government with no congressional oversight. [2]

Another piece of the complicated puzzle is the U.S. Department of Health & Human Services Public Health Emergency Declaration[3]. Corrupt leaders of this country are hungry to be able to operate under the powers of the Public Health Emergency Declaration continuously. If you read the declaration, you may be quite shocked at the sheer number of protections that are waived (without our consent) under the guise of a public health emergency.

What Is Monkeypox?

Monkeypox is a variant of the smallpox virus and is not new. The first recorded case of monkeypox was in 1970, we have been living with this virus in existence for decades. This virus was not a threat to us then, and it is not a threat to us now.

As of right now, the virus is only spread through direct contact with an infected person's respiratory secretions or other bodily fluids. This is not an airborne virus and it is rarely ever fatal. The CDC currently claims that asymptomatic people cannot spread the virus.[4] As of right now, it appears most people who have reported getting monkeypox have gotten it from someone they had sexual contact with. The best thing you can do to protect yourself and your family is to avoid sexual contact with strangers or people who could be affected and turn off the propaganda on your television.

As we have seen with the Covid pandemic, the information listed on the CDC website is subject to constant change to fit the narrative. We, as always, will monitor the situation on all fronts moving forward. We are here to assure the American people that monkeypox is nothing to worry about. You don't need a vaccine to protect you. We must stand strong against this and any other disease the WHO attempts to label as a threat. We know the true threat and it is not a disease or pandemic.

Unite and Stand Strong.

In the past two and a half years, we have seen the tyranny that will ensue if we submit to this declared emergency and the next one after that. We should be very concerned, but not about any viruses. These declarations of emergency always precede the next wave of tyranny. This is your reminder, regardless of which virus they push, regardless of the propaganda they spread, *WE MUST NOT* fear, *WE MUST NOT* lock down, and *WE MUST NOT* be bullied into inoculation.

Our medical freedom colleagues at Truth for Health Foundation (www.truthforhealth.org) have already prepared and just updated helpful Fact Sheets and Treatment Guides on both monkeypox[5] and marburgvirus/ebola (hemorrhagic fever viruses)[6]. Organizations like AFLDS and Truth for Health Foundation are in the same war against evil tyrants and we appreciate the opportunity to share these materials with our constituents.

In closing, we will bring you comments of the dearly departed Dr. Vladimir Zelenko on July 21, 2022, shortly before he passed away:

There are emerging biological terror threats. The key is not to panic but to have a rational strategy on how to deal with it.

1. Don't trust anything WHO, AMA, CDC, FDA, NIH say. I suggest doing the exact opposite. They have consistently proven themselves to be the enemies of the people.

2. Understand that all Covid-19 strains, Flu, RSV, Marburg, and Ebola are single-stranded RNA viruses that use similar pathways for replication. They use RNA-dependent RNA polymerase (RDRP) to make copies of their genome.

3. Zinc inhibits RDRP. HCQ, IVM, Quercetin, and EGCG are Zinc Ionophores that help Zinc enter cells.

Above all, resist fear.
