*Why are the world's top vaccine promoters, like Paul Offit and Peter Hotez, frantically warning us about the unique and frightening dangers inherent in developing a coronavirus vaccine?*

*Scientists first attempted to develop coronavirus vaccines after China's 2002 SARS-CoV outbreak. Teams of US & foreign scientists vaccinated animals with the four most promising vaccines.*

*At first, the experiment seemed successful as all the animals developed a robust antibody response to coronavirus. However, when the scientists exposed the vaccinated animals to the wild virus, the results were horrifying.*

Vaccinated animals suffered hyper-immune responses including inflammation throughout their bodies terminating with fatal lung infections. Researchers had seen this same "enhanced immune response" during human testing of the failed RSV vaccine tests in the 1960s. Two children died.

Offit, Hotez and even Anthony Fauci (in an unguarded moment), have warned that any new coronavirus vaccine could trigger lethal immune reactions when vaccinated people come in contact with the wild virus. Instead of proceeding with caution, Fauci has made the reckless choice to fast track vaccines, partially funded by Gates, without animal studies (that could provide early warning of runaway immune response).

Gates is so worried about the danger that he says he won't distribute his vaccines until governments agree to indemnify him against lawsuits.

On Feb 4th 2020, when there were only 11 active CV cases in the USA, the U.S. quietly pushed through Federal regulations giving coronavirus vaccine makers full immunity from liability. Are you willing to take the risk?
