Amy Kelly, COO of DailyClout, talks with Dr. Chris Flowers.

Dr. Chris Flowers is an author, academic cancer radiologist, and member of the War Room/DailyClout Pfizer Documents Analysis Project.

Ms. Kelly and Dr. Flowers discuss what may be causing cancers to occur and to escalate much more quickly post-mRNA vaccination, definitions of different types of cancers mentioned in [Pfizer's document](#), the dangers of lipid nanoparticles, and spike proteins and how they enter cells.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
