Fascism has made its way back into Europe as Austria has become one of the first countries in the world to declare war on the unvaccinated as they recently announced that a lockdown will be in place for those who refuse the experimental injections, but they also decided to do the same for the vaccinated resulting in another lockdown of the country. What is concerning is the fact that the Austrian government first targeted the unvaccinated which brings us back to the days of the Nazi Germany targeting specific people who did not fit the criteria of being a German citizen. The Associated Press published [‘Austria orders lockdown for unvaccinated people as COVID cases soar’](#) reported that “the Austrian government has ordered a nationwide lockdown for unvaccinated people starting at midnight Sunday to combat rising coronavirus infections and deaths.”

What would a lockdown mean for the Austrian people who remain unvaccinated?

“The move prohibits unvaccinated people 12 and older from leaving their homes except for basic activities such as working, grocery shopping, going for a walk – or getting vaccinated.”

In other words, Austria is in a 1984 Orwellian scenario that’s close to the breaking point of total tyranny.

Austrian authorities are “concerned about rising infections and deaths and that soon hospital staff will no longer be able to handle the growing influx of COVID-19 patients” continued “It’s our job as the government of Austria to protect the people,” Chancellor Alexander Schallenberg told reporters in Vienna on Sunday. “Therefore we decided that starting Monday ... there will be a lockdown for the unvaccinated.”

At this point, it should not surprise anyone. We saw this coming. Now there are protests taking place not only in Austria but in other countries as well including the Netherlands, Croatia and Italy against government lockdowns and vaccine passports. The point is that

the unvaccinated are being targeted. There are even celebrities who are calling the unvaccinated *"the enemy"* such as former KISS icon Gene Simmons, who in my opinion has no talent. According to *TMZ.com* Simmons was recently interviewed on Talkshopleive's Rock 'N' Roll Channel said that *"the far left and the far right, they are both evil. They both spread all kinds of nonsense. Politics are the enemy"* and that *"if you're willing to walk among us unvaccinated, you are an enemy."*

This is just the beginning, but it's not just about lockdowns or celebrities calling those unvaccinated the enemy, doctors who sold out to Big Pharma and obey government orders are also declaring war on the unvaccinated by denying people healthcare services. RT.com published an article written by Dr. R.M. Huffman titled *'As a doctor, here's my message to anyone who thinks it's OK to deny medical treatment to those unvaccinated against Covid'* said that *"some doctors are openly discussing refusal to treat patients who decline, for whatever reason, to get the jab. This would set a dangerous precedent and shatter fundamental tenets of medical practice"* and that *"An insidious sentiment has begun metastasizing throughout the United States and Britain, expressed by politicians, pundits, and - most disturbingly - by physicians themselves: that the unvaccinated who contract Covid-19 should be denied medical care."* This is clearly a declaration of war on the unvaccinated where doctors themselves are allowing patients to get sick or even die if they are not vaccinated. Huffman sounded the alarm on this disturbing trend in the healthcare industry:

It gets worse. A former US senator from Missouri, Claire McCaskill, also wants the unvaccinated to have their insurance rates raised. Piers Morgan, the British TV personality, demands to his nearly 8 million Twitter followers that the NHS must refuse them hospital beds. An emergency medical physician in Arizona responds to a video clip of people unmasked in a grocery store with a message, "Let 'em die". A liver surgeon at Massachusetts General suggests that declining a Covid vaccine should be treated by doctors as a functional Do Not Intubate/Do Not Resuscitate order. These are neither private thoughts nor quiet conversations with overworked colleagues: these are calls to action, shared on social media, intended for public consumption. This should terrify you

They are already denying people medical care because they did not get vaccinated. According to news channel *wkyc.com* who published ['Organ transplant surgery canceled due to new Cleveland Clinic policy requiring COVID-19 vaccination'](#) reported that a man named Mike Ganim was about to receive a life-saving kidney transplant surgery, but his wife Debi said she was notified that the surgery was canceled due to the donor not being vaccinated:

Debi Ganim said they were informed on October 8 that Cleveland Clinic implemented a new safety policy that required both living donors and organ recipients to be vaccinated against COVID-19. Mike is fully vaccinated, but the donor is not

Yet, those who are vaccinated are witnessing breakthrough cases all around the world. Back on July 18th, 2021, the Scottish-based news website *The Expose* posted an article ['5,522 people have died within 28 days of having a Covid-19 Vaccine in Scotland according to Public Health Scotland'](#) showing what *Public Health Scotland* (PHS) released under the freedom of information request called the [Covid-19 Statistical Report](#) admitted the following:

Between 8 December 2020 and 11 June 2021, a total of 5,522 people died within 28 days of receiving a COVID-19 vaccine in Scotland (number of days between vaccine and

death is 0-27, where 0 is the day of vaccination, all age groups). A breakdown of these deaths by day and vaccine type is available in the spreadsheet provided along with this report

On August 16th, 2021, *science.org* published an article on the breakthrough cases coming out of Israel [‘A grim warning from Israel: Vaccination blunts, but does not defeat Delta: with early vaccination and outstanding data, country is the world’s real-life COVID-19 lab’](#) stated what the reality is for the Israelis who received “the shot”:

What is clear is that “breakthrough” cases are not the rare events the term implies. As of 15 August, 514 Israelis were hospitalized with severe or critical COVID-19, a 31% increase from just 4 days earlier. Of the 514, 59% were fully vaccinated. Of the vaccinated, 87% were 60 or older.

“There are so many breakthrough infections that they dominate and most of the hospitalized patients are actually vaccinated,” says Uri Shalit, a bioinformatician at the Israel Institute of Technology (Technion) who has consulted on COVID-19 for the government. “One of the big stories from Israel [is]: ‘Vaccines work, but not well enough

On November 12th, Dr. Anthony Fauci admitted on *The New York Times’* podcast *The Daily* on the current data coming in from Israel on the steady rise of “breakthrough infections”:

They are seeing a waning of immunity not only against infection but against hospitalization and to some extent death, which is starting to now involve all age groups. It isn’t just the elderly,” Fauci said. “It’s waning to the point that you’re seeing more and more people getting breakthrough infections, and more and more of those people who are getting breakthrough infections are winding up in the hospital

For those in the United States who are vaccinated also have some bad news heading their way as the *Associated Press* (AP) has admitted that the vaccinated are the real problem in an article titled [‘COVID-19 hot spots offer sign of what could be ahead for US’](#) reported on the increase of Covid-19 infection rates among the vaccinated:

New Mexico is running out of intensive care beds despite the state’s above-average vaccination rate. Waning immunity may be playing a role. People who were vaccinated early and have not yet received booster shots may be driving up infection numbers, even if they still have some protection from the most dire consequences of the virus

With a 100% vaccination rate, Gibraltar is considered one of the most vaccinated countries on earth has also witnessed an increase of “47 cases per day in the last seven days” as reported by *express.co.uk* in article titled [‘Gibraltar cancels Christmas celebrations amid Covid spike’](#) stated the following:

While the government has called upon the public to “exercise their own judgement”, they have “strongly” advised against any social events for at least the next four weeks, discouraging people from holding private Christmas events. Gibraltar has seen a steady increase in active cases of COVID-19 throughout October and November, which has gained pace over the past few days

Now the medical establishment is pushing for never-ending booster shots to give you

supposedly added protections. Big Pharma, the *World Health Organization* (WHO) and various governments who mandated vaccine requirements for federal, state, and local government employees and private businesses are pushing their agenda through the mainstream media with the narrative suggesting that the unvaccinated is becoming a problem. But that is a lie, it's clearly the vaccinated who are getting sick, many are even dying. In the US today, terrorists are now gun owners, anti-war activists, real journalist organizations such as Wikileaks and other anti-establishment organizations and individuals, soon it will be the unvaccinated. A new enemy has been added to the list and they are called the anti-Vaxxers. It is certain that governments and Big Pharma will launch a fascistic crusade against the unvaccinated. Public television channel C-Span.org published a video by the *Atlantic Council* who interviewed Pfizer's CEO Albert Bourla who claimed that his corporation is "getting briefings from the CIA and FBI" on the "spread of misinformation" by what he called "criminals" because "they literally cost millions of lives." The war on the unvaccinated by fascistic governments and multinational corporations such as Big Pharma has already begun.

How far would they go to get people to roll up their sleeves and take the shot? They are already denying people healthcare and are locking down the unvaccinated in Europe, so what's next? Will governments start banning people who are unvaccinated from buying food? As they say, you give them the finger then they take your arm. The good news is that there is a resistance against this medical tyranny with people from all walks of life and it will keep growing because many see it as the only way to stop a broader agenda by those who want total control over the world's healthcare system with Big Pharma moving up on the pyramid of global power. I am optimistic that we will win this battle, I can say with confidence, it's inevitable.
