Rest in Peace Francini.
Eternal rest grant unto him.

July 13, 2024 - Louisville, KY - 30 year old lawyer and mom, Hunter Hayes-Price died suddenly on July 13, 2024. "On a recent outing to a waterpark with her children, Hunter suffered a severe heat stroke, which led to cardiac arrest" She was a graduate of 2021 at Appalachian School of Law.

Hunter Hayes-Price
July 17 at 10:58AM · 🌐

Hello everyone it's Brad Woolum, I wanted to come on here and share this because Hunter touched so many lives and now that she has passed we need you to share this post for us, we did not have life insurance to be able to cover all the expenses of this funeral, I have worked with her classmate from law school to make this gofundme to help raise the money, sharing, or donating anything will help us and I wish I had the ability to pay it on my own but unfortunately I do not click this link to view the post for it and anything helps <https://gofund.me/71d3fa55> thank you to anyone who assists us in this journey and we will be having funeral service Friday from 11-12 for family and 12-1 for friends then having the service after that.

Thank you all so much for your kind words

GOFUNDME.COM

Dear Friends, Family, and Kind Strangers,

It is with a heavy heart that we share the sudden and tragic loss of our beloved Hunter Hayes-Price (Woolum). Hunter, a vibrant and loving 30-year-old, was an incredible attorney who had recently embarked on the brave journey of starting her own family law practice in Louisville, Kentucky. She was a graduate of the Class of 2021 at the Appalachian School of Law, where she nurtured her passion for justice and helping others.

Hunter's life was not an easy one. She faced numerous hardships growing up, but she always persevered, protecting and caring for those around her with unwavering resilience. Despite her challenges, she became a pillar of strength for her family and an advocate for justice in her community.

Hunter was not only a fierce and dedicated professional but also a tough, strong, kind, and loving woman. Her resilience and compassion touched the lives of many, both in her professional and personal life. She was exceptionally intelligent and used her sharp mind to excel in her career and to help those in need.

As a young mother, Hunter did everything she could to support her two young children, Holden, 8, and Honour, 6. Her greatest passion was her family, and she worked tirelessly to provide for them. Tragically, on a recent outing to a waterpark with her children, Hunter suffered a severe heat stroke, which led to cardiac arrest. Her sudden passing has left her family in a state of profound grief and financial uncertainty. As the primary provider for her family, Hunter's untimely death has created a significant financial burden on her husband Brad and their two young children.

July 3, 2024 - BRAZILIAN DOCTOR DEAD - 23 year old Sao Paulo medical student Maria Eugenia Assis Lins died suddenly on July 3, 2024 ("she had myocarditis").

Who was the 23-year-old medical student who died in SP after a bad flu; details

4 July 2024 · by Juliana Gomes

ADS

On July 3, medical student Maria Eugenia Assis Lins, 23, died. She was the daughter of businessmen Wesley Lins and Eugenia Assis Lins, owners of a fuel company. The young woman was studying in Sao Paulo.

The student did not resist after having presented a strong flu. Doctors suspect her death was caused by complications she developed after contracting COVID-19. She had myocarditis, and at the time, her condition led to intubation and she faced life-threatening.

Despite the situation, the young woman managed to recover, but was left with sequelae resulting from the disease. And recently, upon returning to her studies in the medical field, she contracted a strong flu, and because of the sequelae of myocarditis, her health condition worsened with each passing day.

Maria Eugenia was hospitalized, but unfortunately she could not resist and had her death confirmed. The news of his death caused a great commotion among family, friends and colleagues.

ADS

The young woman was described as promising, dedicated to studies and with a bright future ahead. Her death represents a priceless loss for all those who knew and admired her.

Her body will be veiled and buried in the town of Petrolina, where friends and family can pay their respects and say their last goodbye. The Lins family thanked them for all the support they are receiving at this difficult time.

June 24, 2024 – South Portland, Maine – 37 year old Emma Brosnan died unexpectedly in her home on June 24, 2024. She was a pharmacy technician.

Apr 6, 2020 · 🌐

Emma Brosnan, 37, of South Portland, Maine passed away unexpectedly in her home on June 24, 2024. Emma was born on August 14, 1986 to Åsa and Michael Brosnan in Stockholm, Sweden.

Emma graduated from Gorham High School (NH) in 2004, where she was captain of her soccer team and a successful alpine racer. She went on to study at Parsons in NYC and graduated in 2023 from Southern Maine Community College. She worked over twelve years at Maine Medical Center in different capacities but mostly as a pharmacy technician.

Emma is survived by her daughter, Rowynn, 8 years old, who meant everything to her, and whom she loved dearly. Emma is also survived by her parents, Mike and Åsa ; her brother Nick, his wife Tess; their children Svea and Lochlan, her brother Håkan and wife Tamzen and their children Tilia and Cypris.

Emma lived in South Portland, Maine and loved going to the beach and enjoying the water. She was an active person who loved the outdoors and going on adventures and exploring with her daughter. Most importantly , Emma was known for her warmth, fun and caring personality. She had a generous heart, always ready to lend a helping hand to those in need. She loved strongly those around her and her kindness and compassion touched the lives of many. She will be sorely missed by all who had the privilege of knowing and loving her.

June 17, 2024 - Tunisian Influencer 36 year old Farah El Kadhi died suddenly on June 17, 2024 from a cardiac arrest while on holiday in Malta. She died in her sleep. She had 1.1 million followers on Instagram.

Influencer Farah El Kadhi Dies at 36 After Suspected Heart Attack: Reports

A Tunisian social media influencer, Farah El Kadhi had 1.1 million followers on Instagram

By [David Chiu](#) | Updated on June 21, 2024 04:50PM EDT

[Farah El Kadhi](#), a popular Tunisian social media influencer, died at the age of 36 from a suspected heart attack, according to multiple reports.

She was reportedly vacationing on the European island of Malta when she went into cardiac arrest on Monday, June 17, according to the [Times of Malta](#) and [Malta Today](#).

An architect with the firm Key Concept based in Tunisia, Farah boasted a following of 1.1 million on her Instagram account, which was filled with posts that showed her wearing stylish outfits.

Her most recent Instagram post was shared on July 7. In the image, which was tagged as being taken in Mykonos, [Kadhi wore a red and white dress](#). The caption read, "Les violettes sont bleues.. les roses sont rouges.. ❤️🌹", which translates into English as "Violets are blue.. roses are red."

A day earlier, she posted a photo of herself sitting outdoors and carrying a chic black handbag, which she [captioned](#), "I can spend my life eating spaghetti alle vongole o al pomodoro, drinking prosecco, wearing Prada and singing Eros Ramazzotti 's songs !"

Soulayma Hneynia, a North African influencer who also appeared on [Love Island Malta](#), said in an Instagram Story post that El Kadhi died "peacefully in her sleep," per the [New York Post](#) and [The Times of Malta](#).

She also called her friend a "truly wonderful person, known for her kindness, generosity, and warmth."

Commenters shared tributes to the influencer on her last Instagram post, with one user writing: "No words ❤️ May your memory be eternal 🌹".

[Farah El Kadhi](#), a popular Tunisian social media influencer, died at the age of 36 from a suspected heart attack, according to multiple reports.

She was reportedly vacationing on the European island of Malta when she went into cardiac arrest on Monday, June 17, according to the [Times of Malta](#) and [Malta Today](#).

In a statement to PEOPLE on Friday, June 21, a Malta police representative confirmed that "a 36 year old Tunisian female was certified dead at Mater Dei Hospital" on June 17.

June 11, 2024 - Lebanon, KY - 35 year old Traci Leann Wright died suddenly in her sleep on June 11, 2024.

Our beloved and beautiful Traci died on June 11th, 2024. She was 34 years old. She went peacefully in her sleep. Just as beautiful and gorgeous as ever.

Traci was the heart, soul, and home to her family and friends. Charismatic to anyone who met her. A loving and fierce mother to her two children, dedicated as a mother, wife, sister, daughter, niece, and cousin. Traci was known for her laugh and smile that could light up a room. She was the light in the darkness. She was known for always for her beauty, always looking stunning. She loved putting make-up on her nieces and playing princess dress-up. Her spirit was rare to say the least. She was down for adventure of any kind. She was the dare-devil child in the family which stayed with her for her entire life.

Obituary &

June 2, 2024 - Hoffman, MN - 30 year old Shaylee Anderson died unexpectedly at home on June 2, 2024. She was found dead in her bed without a pulse. Her father thought she was just resting.

Shaylee P. Anderson
 October 27, 1993 – June 2, 2024
 Hoffman

Shaylee P. Anderson, age 30, of Hoffman, died unexpectedly on Sunday, June 2, 2024, at her home.

A funeral service will be held at 11 a.m., Monday, June 10, 2024, at Vie Church in Alexandria with Pastor Patrick Herzog, Sr. officiating. Music is provided by the Vie Worship Team. Interment will take place at Reno Mission Cemetery, rural Lowry.

Visitation is 5-8 p.m., Sunday, June 9th, at Lind Family Funeral Home in Alexandria and will continue one hour prior to the service at the church on Monday.

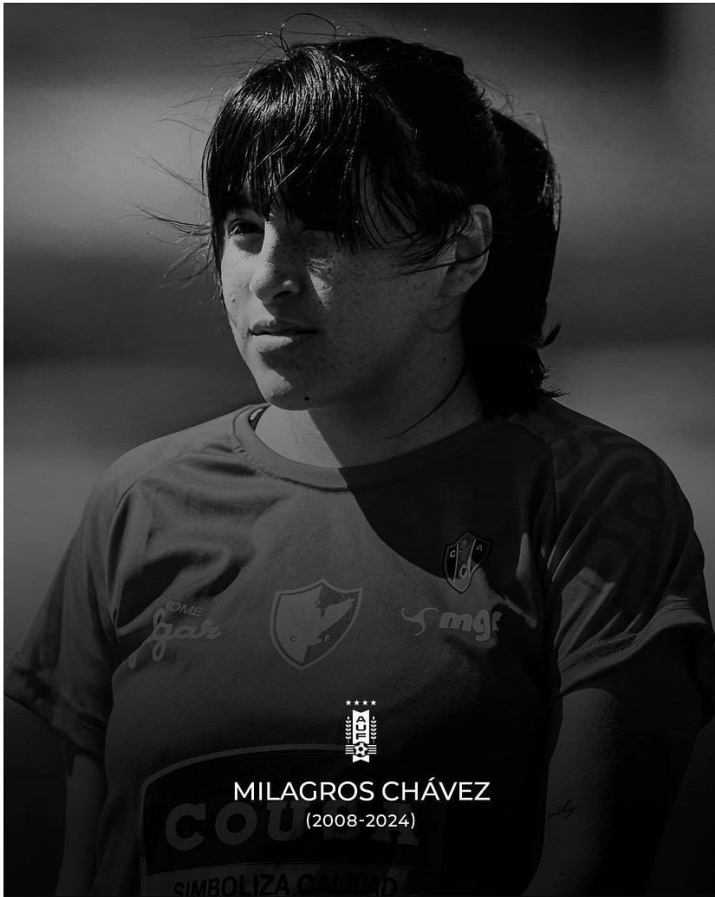

Shaylee Paige was born on October 27, 1993, in Asuncion, Paraguay. She was adopted by Thomas and Kimberly (Quiggle) Anderson of Holmes City at the age of two months. Her family moved to Hendersonville, Tennessee when she was five years old.

Shaylee age 30, of Hoffman, died unexpectedly on Sunday, June 2, 2024, at her home.

She was not feeling well the last few weeks but they didn't think it was anything serious. She was found 'unresponsive' at her home with no pulse/dead in her bed. Her dad said she appeared to be resting before her death. Her dad said there were no signs of 'foul play' and that they are doing an autopsy to find out her cause of death which will take 6-8 weeks.

June 2024 – Buenos Aires, Argentina – 15 year old Milagros Chavez, soccer player U16 at the River Plate Athletic Club died suddenly in June 2024.

“Sudden And Unexpected”  @toobaffled

“We regret to inform the passing of Milagros Chavez, player of Fénix.”

From River Plate Athletic Club we send our deepest condolences to family, friends and the Phoenix Athletic Centre at this difficult time.”

Women’s football: ending the year with three titles

River has ended the year with the U-16 and Reserve teams being crowned champions of their corresponding AFA tournaments and the First Division winning the Federal Cup.

May 18, 2024 – Stony Plain, AB, Canada – 18 year old Hayley Janice Power died on May 18, 2024 from complications of a sudden cardiac arrest.

Hayley Janice Power

8 SEPTEMBER, 2005 - 18 MAY, 2024

September 8th, 2005 – May 18th, 2024

It is with profound sorrow that we announce the passing of Hayley Janice Power, born September 8th, 2005, in Whitehorse, Yukon. Hayley passed away on May 18th, 2024, at the age of 18 years from complications of a sudden cardiac arrest.

Although her time with us was brief, Hayley leaves an indelible legacy of compassion and empathy to those who were fortunate to have known her, which was adorably extended to her immense love for animals. She enjoyed spending time with her close friends, passion for minerals in the form of crystals and cuddling with her pets, especially her cat Pumpkin.

Proceedings will take place at the Best Western Sunrise Inn & Suites in Stony Plain on June 1st, 2024. Beginning with a viewing at 11 am, a service celebrating Hayley's precious life will be held at 12 pm, followed by a reception, where we will share memories, laughter and tears of a life that was truly a gift to us all.

May 2024 – “My daughter Melissa died of a heart attack at 35. She didn't have to”. Melissa died in 2023.

My Daughter Died of a Heart Attack at 35. She Didn't Have To.

May 9, 2024

By Stephanie Guevara

My daughter Melissa was the type of person who dropped everything for the people — and animals — she loved. Whether she was helping her twin sister, Emily, as she recovered from a stroke or saving stray dogs from the side of the highway, she always took care of everyone around her.

Tragically, Melissa passed away from a heart attack at age 35 in 2023. But her death did not have to happen. It's now my mission to share her story with the hope of saving lives and preventing other mothers from experiencing what no parent should.

Melissa had a very active lifestyle. Growing up, she played various sports — from swim team and tennis to skiing and hiking in the Colorado mountains where we raised her — and that carried into adulthood. Her biggest passions were staying active, taking care of dogs and spending time with Emily. I think she may have liked animals more than people, which is hard to imagine as she always made friends wherever she went.

Once when we were vacationing at our cabin in the mountains, Melissa risked her life to save her dog, Dawson. The dog had darted into the choppy, dangerous rapids of the river by the cabin. Without a second thought, Melissa ran into the water after Dawson. My brother ended up saving them both, and although we were terrified at the time, we laugh about the story now because that's just the kind of person Melissa was.

When Emily had a stroke in 2017 due to a rare, unknown blood disorder, Melissa stayed by her side and cared for her as she went through therapy and recovered from several brain surgeries. While the girls were different, they shared an unbreakable bond. Melissa was constantly dragging Emily with her all around the country to travel to new places.

Emily made the call I'll never forget. On June 6, 2023, our phone rang at 4:30 a.m., and Emily told us that Melissa had collapsed and to meet her at the hospital. Once my husband and I arrived, my stomach dropped when I saw the look on the doctor's face. I asked if Melissa was going to be okay, and the doctor said she didn't know. We asked if we could see her to say goodbye.

When we entered the room, more than a dozen doctors surrounded Melissa doing everything they could to try to revive her heart — but there was no heartbeat. We learned later that she most likely died in the ambulance.

The autopsy report told us that Melissa suffered from an anterior ST-segment elevation myocardial infarction (STEMI) heart attack. It occurs when there's a blockage preventing blood from flowing through the left anterior descending (LAD) artery. The report showed that her LAD was more than 80% blocked.

We were stunned. How could this have happened? My daughter was young, healthy and active. She didn't smoke or drink. I needed to find out how doctors missed this.

I accessed Melissa's medical records and discovered her cholesterol levels were out of normal range dating back to 2020. A few weeks prior at her last physical, her triglycerides levels shocked me. They should be below 150 — Melissa's were 318. The only note I found from the doctor was to switch to a plant-based diet, when Melissa should have immediately been prescribed statins, a cholesterol-lowering drug, and gone through additional testing.

Later, Emily told us Melissa complained of heartburn the night of her heart attack and a few days leading up to it. A few weeks before, she experienced vertigo. We also noticed she sweated a lot more than the rest of the family — even in cold weather. While we didn't think much of it at the time, these symptoms combined with her high cholesterol were warningsigns.

Melissa didn't have to die. But I hope her story inspires other women to know their symptoms and advocate for their health. Many doctors dismiss women's complaints as hormonal or blame them on eating "too many cookies." I urge all women to get their numbers checked and demand that their doctors explain their results and provide medical intervention.

My Take...

No one is protecting these young women. No one is fighting for them either.

COVID-19 mRNA Vaccines cause cardiac damage in 1 in 30 within the first week after vaccination

Study #1 - [Thailand study \(2022, Mansangan\)](#) 202 boys ages 13-18, from two different schools, 7 of them developed subclinical myo/pericarditis after 2nd Pfizer COVID-19 mRNA dose. That's 1 in 30 per Pfizer dose.

Study #2 - [Swiss Study \(2023, Muller\)](#) - 777 healthcare workers had Moderna COVID-19 mRNA booster shot, 22 had evidence of myocardial injury (22/777 = 1 in 35 per Moderna dose).

"Conclusion: mRNA-1273 vaccine-associated myocardial injury was more common than previously thought, being mild and transient, and more frequent in women versus men."

Doctors are still not allowed to discuss these risks with their patients as part of informed consent. That is an ongoing crime being committed by American Medical Boards and Canadian Colleges of Physicians and Surgeons.

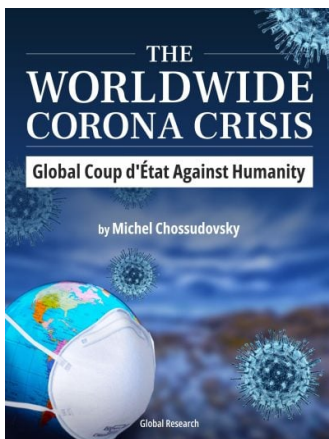

Our politicians tell us people have the choice to get the COVID-19 Vaccines for themselves or their children. That's false. Where there is no informed consent, there is no choice.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. -Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden "plandemic"; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that "there is no causal relationship between the virus and economic variables." In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. -David Skripac

A reading of Chossudovsky's book provides a comprehensive lesson in how there is a global coup d'état under way called "The Great Reset" that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
