*There is a problem in Gaza. It is called Western-supported GENOCIDE. Western-supported Zionists are deliberately causing starvation, and disease and mass death by [all methods](#). Zionists destroy hospitals and [health care](#). Zionists destroy [water treatment facilities](#). Zionists [bomb and displace](#) and mass-slaughter civilians. All of these policies are intentionally genocidal. There is nothing humanitarian about this genocide.*

Now the IDF is proposing to vaccinate the remaining population against polio, under the pretext of “health”. The vaccination program is no doubt a biowarfare operation, a track and trace operation, and Lord knows what else. It recalls the “medical facade” that nazis used during WW2 to paint Auschwitz and other death camps as healing centers. (1) Will Zionists use the polio vaccination operation to create an illusion of legitimacy for genocide?

In the video below, Gazan journalist Bisan Owda identifies some of the risks inherent in trusting a genocidal occupier to provide “health services” to a prey population.

Western-Supported Zionists seek to portray genocide as “humanitarian”, and the jabs are part of the illusion, they are part of a “full spectrum” genocide toolkit.

None of this should be a surprise since governments globally have been maiming and killing their own people (2) for some time now using experimental mRNA biowarfare beneath the false pretext of a public health emergency. Experimental jab-induced excess mortalities and morbidities are skyrocketing right now and it is not an accident. The dangers are known and documented (3) and yet the jab roll-outs continue unabated.
